

Pulses Domestic Fundamentals:

Today's Update:

- ***There is gossip in the market that some big groups have sold tur in forward months in large quantity. So, tur market is expected to stay steady in June and once the pressure gets released, market may move up again. Besides, availability of tur at Mumbai and Chennai ports is decreasing fast and import from Myanmar in bulk quantity is unlikely due to lower crop size there. Besides, Quota for applicants will be declared on 11th & 12 June and quota allocation is expected by June end. Lower domestic crop, delayed beginning of planting and stockiest's holding may remain supportive to the market fundamentals. It is being traded at Rs 5900-6000 in Gulberga market. Tur may move up further by Rs 500 from current level but in July. Govt has a close eye on tur price movement and has enough stock to deal with spiraling prices. Range bound movement is expected in the near term. Nafed still has 5.63 lakh MT old stock and 2.75 lakh MT new crop. Thus total stock comes to 8.38 lakh MT.***
- ***Govt has just released 3rd adv. estimate of food-grains for 2018-19. It has estimated 3.5 million MT production of tur against the set target of 4.5 MMT. It has finalized production of tur for 2017-18 at 4.29 MMT. Actually, tur production has decreased in 2018-19 due to drought like condition in South Indian states, Maharashtra and Gujarat.***
- ***Govt has released 3rd adv. estimate for chana and pegged it at 10.09 MMT against the set target of 11.50 MMT. For 2017-18 it has been finalized at 11.38 MMT. However, private trades consider chana production at around 8.8 MMT this year.***
- ***Production of urad has been pegged at 3.21 MMT for 2018-19 in the 3rd Adv estimate against set target of 3.6 MMT. It includes 2.55 MMT in kharif and 0.67 MMT in rabi season. Target for kharif and rabi has been set at 2.8 and 0.8 MMT. Last year total kharif and rabi production has been finalized at 3.49 MMT, including 2.75 MMT in kharif and 0.74 MMT in rabi 2017-18.***
- ***Govt's 3rd adv estimate has pegged moong production at 2.23 MMT in 2018-19 against the set target of 2.25 MMT. It includes 1.55 in kharif and 0.70 MMT in rabi season. For 2017-18 govt has estimated 2.03 MMT moong production. It includes 1.43 MMT in kharif and 0.59 MMT in rabi season.***
- ***Govt has released 3rd adv estimate for pulses and total kharif pulses production estimate has been pegged at 8.52 MMT while rabi pulses estimate has been pegged at 14.70 MMT for 2018-19. Thus total production has been pegged at 23.22 MMT against the set target of 25.95 MMT. Total pulses production in 2017-18 has been finalized at 25.42 MMT***
- ***Chickpea market continues to be under pressure due to weak buying. Firmness in chickpea market beyond a certain level is highly unlikely due to huge stock position with nafed. NAFED has a stock of 22 LMT (Old plus New) of chickpea. Lower crop size can be easily covered by stock position. Chickpea is expected to remain weak with small technical recoveries.***

Previous Update:

- ***Moong market traded lower due to new arrival and poor demand for dhoya dal. New moong in MP was traded at***
- ***Details of other pulses stock in Nafed custody are as follows: Tur-838355 MT (old-562969 & old -275386 MT, Urad-334552 MT (Old-320720, new-13832 MT), Moong-177374 MT (old-162868, new-14506 MT, Masur-191444 MT (old-150802, new 40642 MT.***
- ***DGFT has delayed decision on pea import at least for two months. The reason behind it is attributed to higher import so far. Importers have already imported 1.75 lakh MT pea against set quantity of 1.5 lakh MT. Govt. is in no hurry to allow pea as it may affect market price and prices of other pulses too. If pea prices increase unexpectedly in coming months then govt may consider import. As there is lower stock in domestic market, so prices of pea are bound to go up.***

- **Pressure was seen on cash moong market with the commencement of new arrival. However, lower stock for quality crop and good demand at current level would not allow moong market to decrease beyond a certain level. Summer crop in Bihar, MP and UP is almost ready to be harvested now. However, demand from Papper industries and dal mills continues. It would help market to sustain at current level. Once the pressure from summer crop decreases, moong would trade firm again. It is being traded at Rs6500-6900 in Delhi market**

Pulses International Fundamental:

Today's Update:

- **As per latest update, until 20th May Saskatchewan has sown 94 percent of peas, 93 percent of lentil and 59 percent of chickpea.** Good seeding condition and very few disruptions in the weather has led to such speedy sowing of various pulses.
- **In the month of April'19, red lentil exports from Canada decreased by 179% compared to March'19.** Canada has exported 63465 MT of lentils in April'19. Top buyers of Canadian lentil were Bangladesh, India and Sri Lanka with 16950 MT, 15909 MT and 8761 MT respectively.
- **Australian pulses growers are finding it difficult to sell their nugget type lentils. However, there are buyers for nipper type lentils right now.** There is slight difference of price between nugget and nipper type lentils. Indian importers prefer nugget type while nipper type is preferred by B,desh. In Australian market pulses price has decreased by 17 to 20% since the beginning of the ongoing MY year. The major reason behind this is mainly attributed to Indian import duty (40%) applicable on import from Canada & Australia. Area under pulses in Canada & Australia is bound to decline this year. If India receives less rainfall this year and kharif planting gets affected, govt may consider some relaxation on import duty and quantity restriction on various pulses. Currently, there are ample stocks in central pool and there is no panic at supply front.
- **As per monthly update of Canadian Chickpeas Agriculture Canada chickpeas production** in Canada is expected to decrease from 3.11 lakh MT to 2.3 lakh MT in 2019-20. This year area under chickpeas is expected to decrease from 1.79 lakh ha to 1.35 lakh ha. Export has been pegged at 1 lakh MT in 2019-20 against 90,000 MT this season. Canada had exported 1.16 lakh MT chickpeas in previous season. Domestic use is expected to decrease slightly from 70,000 MT to 68,000 MT in coming marketing season. Carryout is expected to remain at higher level at 1.75 lakh MT. It was 1.95 in 2018-19. In 2017-18 it was only 13 thousand MT.
- **As per the latest data updates by Australia Bureau of Statistics chickpeas export** from Australia declined considerably during March-2019. Australia exported 25364 MT chickpeas in March against 46866 MT in Feb-2019. Australia has exported total 167043 MT chickpeas during the ongoing MY. It is down by 76 % from last year till March 2018. In March B,desh purchased 18525 MT chana from Australia, followed by UAE 2170 MT and Pakistan 2025 MT.
- **Lentil area coverage for the 2019 crop year in US is expected to decrease by 29 %** from last year to 555,000 acres. Area may decline in Montana and North Dakota. Planting intentions in Idaho and Washington are expected to remain unchanged from a year ago. Based on area estimate/intention, it would be the lowest since 2015.
- **US farmers may plant 40% lower area under Chickpeas this year in US.** As per pre sowing intention farmers may plant 5.19 lakh acres in 2019. They may plant 137,000 acres small chickpeas, 382,000 acres large chickpeas around 38 & 40 % lower than last year. It would be the lowest since 2016.
- **As per USDA seeding intention report dry pea area in US is expected to increase by 3% to 8.81 lakh acres.** The latest report shows that dry pea area is expected to rise in Idaho, Montana, South Dakota, and Washington. However, area would decline in Nebraska and North Dakota slightly from last season.
- **Production of lentil in Canada is expected to decrease by 4.39 % to 20 lakh MT in 2019-20** against 20 lakh tonne in 2018-19. Yield for the year has been pegged slightly up at 1.5 MT per ha against 1.4 MT/ha last year. However total supply is expected to decrease from 29.89 to 28.20 lakh MT due to lower production pegged for 2019-20. Export has been pegged at 18 lakh tonne almost unchanged from 2018-19. Carryout is likely to decline from 7.0

lakh Mt to 5.35 lakh MT in 2019-20. Stock to use ratio is expected to decline from 31 to 23 % in 2019-20. Price is likely to hover in the range of \$ 390 to 420 per MT in 2019-20.

Weekly Outlook: -Pulses are likely to trade steady to slightly weak.

Rabi Sowing as on 22nd Feb-2019:
