

Pulses Domestic Fundamentals:

Today's Update:

- **Lentil in global market is being traded at higher price and at this price there is disparity for Indian importers .As local stockiest are unable to hold stock for some more time, supply side has eased to some extent. Demand for lentil dal too is weak at this point of time. So lentil bulity price decreased by Rs 50 to Rs 75 per qtl. to Rs 4350-4400.As maximum stock in domestic market is in strong hands and demand is likely to come in the weeks ahead, masur price is expected to move up again. Right now demand for malka and Chalani is weak. Mills in Delhi are buying masur from MP and UP at cheaper rate and it would not continue for two weeks .So ,masur may move up again from current level.**
- **With increased import quota for tur from 2 to 4 lakh MT quotes in Myanmar too moved up to \$775 for new while old was offered at \$675 per MT.Tur red Malawi was offered at \$600 while tur Arusha at \$660 per MT basis Indian ports. Urad FAQ is being offered at \$585 per MT while urad SQ at \$730 per MT. Chana stayed steady at \$680 per MT and oong at \$830.Red Rajma was being offered at \$1040per MT basis Indian port.**
- **As per market source urad stock in Myanmar is said to be around 2lakh MT, while tur stock is around 75000 MT 7 Moong stock is around 20,000 MT.As per quota for import has been fixed at 1.5 lakh MT each for urad and moong, so supply side seems to be tight from Myanmar in coming months. Even, tur stock is lower than last year. New crop in Myanmar will be available not before Dec, so prices of moong and urad would continue to rule at higher level.**
- **Chickpea market continues to be under pressure due to weak buying. Firmness in chickpea market beyond a certain level is highly unlikely due to huge stock position with nafed. NAFED has a stock of 22 LMT (Old plus New) of chickpea. Lower crop size can be easily covered by stock position. Chickpea is expected to remain weak with small technical recoveries.**
