

Pulses Domestic Fundamentals:

Today's Update:

- Chana traded lower due to decision of selling by Nafed in Maharashtra. The offered quantity is 3690 MT. However, bidders were quoted lower price ranging from3701 to 4005. So all tenders were cancelled. Nafed was willing to sell chana above 4500. Now market would have to wait for new strategy by Nafed over selling. With the announcement of chana selling by Nafed cash market slipped badly and decreased by Rs100-150 in major markets. Agriwatch expects market to recover once again if Nafed accepts bid not below4300 4400.
- Pressure on tur market too continues as buyers are unwilling to buy at current price. Tur market has extended its loss by Rs 100 more to Rs 5650-5750 in Gulberga market. However, lower crop size and stockiest unwillingness to sell tur below 5600-5700 may support cash market once again.

Previous Update:

- In major markets of producing regions like Raj and MP there is no pressure of arrivals. Even in south Indian markets chana stockiest are unwilling to sell at decreased price. Demand for dal is weak right now. So mills have restricted buying. Weak futures and limited buying have pressurized chana market. In Delhi market chana decreased to Rs4500. However, due to disparity of import at higher duty amid decreasing arrivals may restrict downward trend in chana market in coming weeks. Nafed would not sell chana at this point of time in bulk volume. So, buying around Rs4450-4475 seems good for stake holders.
- Lentil in global market is being traded at higher price and at this price there is disparity for Indian importers .As local stockiest are unable to hold stock for some more time, supply side has eased to some extent. Demand for lentil dal too is weak at this point of time. So lentil builty price decreased by Rs 50 to Rs 75 per qtl. to Rs 4350-4400.As maximum stock in domestic market is in strong hands and demand is likely to come in the weeks ahead, masur price is expected to move up again. Right now demand for malka and Chalani is weak. Mills in Delhi are buying masur from MP and UP at cheaper rate and it would not continue for two weeks .So ,masur may move up again from current level.
- With increased import quota for tur from 2 to 4 lakh MT quotes in Myanmar too moved up to \$795 for new while old was offered at \$685 per MT. Tur red Malavi was offered at \$605 while tur Arusha at \$665 per MT basis Indian ports. Urad FAQ is being offered at \$585 per MT while urad SQ at \$730 per MT. Chana stayed steady at \$680 per MT and oong at \$830.Red Rajma was being offered at \$1040per MT basis Indian port.
- As per market source urad stock in Myanmar is said to be around 2lakh MT, while tur stock is around 75000 MT 7 Moong stock is around 20,000 MT.As per quota for import has been fixed at 1.5 lakh MT each for urad and moong, so supply side seems to be tight from Myanmar in coming months. Even, tur stock is lower than last year. New crop in Myanmar will be available not before Dec, so prices of moong and urad would continue to rule at higher level.
- Govt has released 3rd adv estimate for pulses and total kharif pulses production estimate has been pegged at 8.52 MMT while rabi pulses estimate has been pegged at 14.70 MMT for 2018-19. Thus total production has been pegged at 23.22MMT against the set target of 25.95 MMT. Total pulses production in 2017-18 has been finalized at 25.42 MMT.
- Govt has just released 3rd adv. estimate of food-grains for 2018-19. It has estimated 3.5 million MT production of tur against the set target of 4.5 MMT. It has finalized production of tur for 2017-18 at 4.29 MMT. Actually, tur production has decreased in 2018-19 due to drought like condition in South Indian states, Maharashtra and Gujarat.
- Govt has released 3rd adv. estimate for chana and pegged it at 10.09 MMT against the set target of 11.50 MMT. For 2017-18 it has been finalized at 11.38MMT. However, private trades consider chana production at around 8.8 MMT this year.

Pulses International Fundamental:

Today's Update:

- Dry pea area in Canada is exected to increase by 12% over last year to 1.6 million ha in 2019-20. The reason behind higher area is mainly attributed to higher return and good demand for export over previous year. The major states like Saskatchewan and Alberta contribute 54 and 42% in total production in Canada. Production is expected to increase by 12% to 4 MMT over previous year due to higher area coverage. Despite higher production supply side would increase marginally as carryout is lower. Demand from China and B,desh is expected to decline in 2019-20. Carry in may increase slightly to 0.4 MMT in 2019-20.
- Even in US dry pea area is expected to increase slightly to 9 lakh Acres in 2019-20 due to higher area coverage in Montana. Production of pea in US is likely to decline by 35 to 0.7 MMT in 2019-20. The major buyers of US pea are Canada, the Philippines and Yemen.
- Chickpea area is expected to fall in Canada from 176 to 133 thousand Ha in 2019-20 while production is expected to fall from 3.11to 2.30 lakh MT. Supply is forecast to increase due to higher carry-in stocks, but softened by lower imports and production. The average price is forecast to fall due to larger world supply, with the expectation of an average grade distribution in 2019-20 as per Canada Stats.
- US chickpea area for 2019-20 is forecast by the USDA to decrease by 40% to 0.52 million acres from the previous year. This is largely due to an expected fall in area in Idaho, North Dakota andWashington. Assuming normal yields . Production is likely to decline by 43% to 0.33 MT in 2019-20. The major market for Us is EU, Pakistan and Canada
- Lentil area in Canada is expected to decline 10% to 1.4 million ha in 2019-20 due to the sharp decline in farm gate lentil prices in the second half of the 2018-19 crop year. Saskatchewan is a major lentil producing state accounting for 91% of the lentil area. Production is likely to decline to 2 MMT in 2019-20. Due to lower production and carryout supply side is expected to fall to 2.8 MMT. Export is likely to be stable at 1.8 MMT in 2019-20. Carryout would decrease to 0.5 MMT. So average price for top grade may increase -in 2019-20.
- Lentil Production In US is expected to decline by 29% to 0.55 million acres in 2019-20. The main reason behind this is lower area coverage in Montana and North Dakota. Production of lentil is expected to decline to 0.3 MMT in 2019-20, sharply lower from 2018-19. The main US export markets for lentils are EU, Canada, India and Mexico.
- Chickpeas export from Australia increased sharply by over 90% to43962 MT in April-2019.It was 23,066MT in March. It has lifted total export in ongoing M to 208,707 MT. However, it is lower by 64% from last year till April 2018. The biggest buyer was B,desh, buying 28,220 MT, followed by UAE buying 8,663 MT & Pakistan at 2,189 MT. Demand is weak right now. Stock in most exporting countries remain at higher levels relative to prospective demand. So Buyers are in no hurry to buy.
- As per latest update, until 20th May Saskatchewan has sown 94 percent of peas, 93 percent of lentil and 59 percent of chickpea. Good seeding condition and very few disruptions in the weather has led to such speedy sowing of various pulses.
- In the month of April'19, red lentil exports from Canada decreased by 179% compared to March'19. Canada has exported 63465 MT of lentils in April'19. Top buyers of Canadian lentil were Bangladesh, India and Sri Lanka with 16950 MT, 15909 MT and 8761 MT respectively.
- As per the latest data updates by Australia Bureau of Statistics chickpeas export from Australia declined considerably during March-2019. Australia exported 25364 MT chickpeas in March against 46866MT in Feb-2019. Australia has exported total 167043 MT chickpeas during the onging MY. It is down by 76 % from last year till March 2018. In March B, desh purchased 18525MT chana from Australia, followed by UAE 2170MT and Pakistan 2025 MT.
- Production of lentil in Canada is expected to decrease by 4.39 % to 20 lakh MT in 2019-20 against 20 lakh tonne in 2018-19. Yield for the year has been pegged slightly up at 1.5 MT per ha against 1.4 MT /ha last year. However total supply is expected to decrease from 29.89 to 28.20 lakh MT due to lower production pegged for 2019-20. Export has been pegged at 18 lakh tonne almost unchanged from 2018-19. Carryout is likely to decline from 7.0

lakh Mt to 5.35 lakh MT in 2019-20. Stock to use ratio is expected to decline from 31 to 23 % in 2019-20. Price is likely to hover in the range of \$390 to 420per MT in 2019-20.

Weekly Outlook: -Pulses are likely to trade steady to slightly weak.
