

Pulses Domestic Fundamentals:

Today's Update:

- **Govt. has allowed peas import for seed purpose and it is not going to make a big difference on other pea price as seed grade pea is imported with different HS code.** As it is not for consumption, prevailing price of peas would remain unaffected. As of now 2 lakh MT consumption grade pea can be imported. It was 1.5 lakh MT earlier. It can be increased to 2 lakh MT soon.
- **Haryana government has decided to exempt market fee on pulses/dals used as raw material in food processing industries located within the state by making amendment in Haryana Agri Business and Food Processing Policy-2018.** The Agriculture Department had already approved this exemption in accordance with Rule 30(6) of Haryana Agricultural Produce Markets (General) Rules, 1962.
- **After a major decline in chana cash market on the back of weak futures and Nafed's intention to sell** (despite some bids cancellation at lower price), market seems to adjust undue pressure. Recovery seems on the card now to a certain extent. Nafed selling would be restricted. In Maharashtra it has passed some bids over Rs 4000. The future course of chana price trend depends on Nafed sale price and acceptance of bid price level in coming weeks. Buying by private trades started with new spree as poor kharif sowing acreage remains supportive to market sentiments. Kharif pulses acreage is down around 50% to 3.38 lakh ha this year. However, there is a respite as monsoon progressed well and it is raining in major growing regions.
- **Pulses import in the new financial year starting from April-2019 reached at 152092.96 metric tonne.** It is higher by 15.70 % from April when importers had imported 131445.43 MT. Out of total import in May Chickpea contributed 28338.26 MT, Tur contributed-5245.7 MT, green pea-8407.68 MT, lentil-32749.37 MT, urad-1686.04 MT, Moong -743.21 MT, yellow pea-66284.46 MT and kidney bean-8638.24 MT. While import of tur, lentil and kidney bean decreased in May, while other pulses import increased over April-2019. For details see import table in report.
- **Over all kharif pulses area is lagging behind by 49.70% to 1.70 lakh ha as on 21st June-2019.** Arhar area is down by 55.43 % to 0.41 lakh ha so far while normal as on date is 1.93 lakh ha. Even urad area is down by 37.25 % to 0.32 lakh ha against normal of 0.79 lakh ha till date. Moong area is down by 69.61 % to 0.31 lakh ha against the normal of 1.70 lakh ha till date. Kulthi sowing has not started as yet while other pulses coverage is 24.14 % down to 0.66 lakh ha against normal of 0.97 lakh ha. However, with monsoon advancing in growing regions, sowing activities is likely to pick up in coming months.

Previous Update:

- **Tur prices could not sustain at higher level taking clue from govt's intention to increase supply** in cash market by allowing 2 lakh MT additional tur import through private channel and permission for selling 2 lakh MT tur from buffer stock. Besides, planning of 1.75 lakh MT tur import through G to G basis. Demand got affected too at higher level. So, some sales by private trades at discounted price kept market down during review week. However, market is well aware of lower stock this year and availability of tur in global market too is at lower ebb. Planting of tur is being delayed, so higher area coverage is unlikely now. It would support cash tur market once again. In Gulberga market tur is being traded at Rs5700-5700. Overall trend remains steady to firm in the medium term.
- **Urad market too could not sustain its upward momentum and decreased by Rs 200-300 per qtl.** Despite slower pace of kharif sowing. Farmers have covered only 32000 ha area under urad due to lower rainfall. As monsoon rains started in major growing region, urad sowing is likely to improve in coming weeks. Urad demand at higher level got affected as dal demand from retail market weakened. As import would remain restricted at 1.5 lakh MT, supply side might be tight till new crop hits the market in Aug end /Sep. So more major decline is unlikely. It may trade up by Rs200 to 300 from current level in coming weeks. In Mumbai tur is being traded at Rs 4700-4750 after touching Rs5000. Overall tone seems steady to slightly firm.

Pulses International Fundamental:

Today's Update:

- **As per Eurostat latest data pea import in Spain decreased by 91% to 635MT in April against 7409 MT in March-2019.** In the ongoing MY Spain has imported total 21953 MT against 47045 MT last year till April-2018. France exported 581MT to Spain in April-2019 followed by Canada(48MT) and Belgium (3 MT).
- **Pea Export from Lithuania in April-2019 declined sharply in comparison to previous month(March).** It declined from 28,592 MT(March) to 22,097 MT in April-2019. This MY total export was registered at 94,984 MT, down by 26 % from last year till corresponding months. France brought 13,950 MT, followed by Germany(2,281 MT) & Latvia (2,260 MT)
- **Dry pea area in Canada is expected to increase by 12% over last year to 1.6 million ha in 2019-20.** The reason behind higher area is mainly attributed to higher return and good demand for export over previous year. The major states like Saskatchewan and Alberta contribute 54 and 42 % in total production in Canada. Production is expected to increase by 12% to 4 MMT over previous year due to higher area coverage. Despite higher production supply side would increase marginally as carryout is lower. Demand from China and B, desh is expected to decline in 2019-20. Carry in may increase slightly to 0.4 MMT in 2019-20.

Previous Update:

- **Even in US dry pea area is expected to increase slightly to 9 lakh Acres in 2019-20 due to higher area coverage in Montana.** Production of pea in US is likely to decline by 35 to 0.7 MMT in 2019-20. The major buyers of US pea are Canada, the Philippines and Yemen.
- **Chickpea area is expected to fall in Canada from 176 to 133 thousand Ha in 2019-20** while production is expected to fall from 3.11 to 2.30 lakh MT. Supply is forecast to increase due to higher carry-in stocks, but softened by lower imports and production. The average price is forecast to fall due to larger world supply, with the expectation of an average grade distribution in 2019-20 as per Canada Stats.
- **US chickpea area for 2019-20 is forecast by the USDA to decrease by 40% to 0.52 million acres from the previous year.** This is largely due to an expected fall in area in Idaho, North Dakota and Washington. Assuming normal yields. Production is likely to decline by 43% to 0.33 MT in 2019-20. The major market for US is EU, Pakistan and Canada
- **Lentil area in Canada is expected to decline 10% to 1.4 million ha in 2019-20 due to the sharp decline in farm gate lentil prices in the second half of the 2018-19 crop year.** Saskatchewan is a major lentil producing state accounting for 91% of the lentil area. Production is likely to decline to 2 MMT in 2019-20. Due to lower production and carryout supply side is expected to fall to 2.8 MMT. Export is likely to be stable at 1.8 MMT in 2019-20. Carryout would decrease to 0.5 MMT. So average price for top grade may increase -in 2019-20.
- **Lentil Production In US is expected to decline by 29% to 0.55 million acres in 2019-20.** The main reason behind this is lower area coverage in Montana and North Dakota. Production of lentil is expected to decline to 0.3 MMT in 2019-20, sharply lower from 2018-19. The main US export markets for lentils are EU, Canada, India and Mexico.
- **Chickpeas export from Australia increased sharply by over 90% to 43962 MT in April-2019.** It was 23,066MT in March. It has lifted total export in ongoing M to 208,707 MT. However, it is lower by 64% from last year till April 2018. The biggest buyer was B, desh, buying 28,220 MT, followed by UAE buying 8,663 MT & Pakistan at 2,189 MT. Demand is weak right now. Stock in most exporting countries remain at higher levels relative to prospective demand. So Buyers are in no hurry to buy.
- **In the month of April'19, red lentil exports from Canada decreased by 179% compared to March'19.** Canada has exported 63465 MT of lentils in April'19. Top buyers of Canadian lentil were Bangladesh, India and Sri Lanka with 16950 MT, 15909 MT and 8761 MT respectively.

Weekly Outlook: -Pulses are likely to trade steady to slightly weak.

Kharif Sowing as21-06-2019:

Kharif Pulses Progressive Sowing Area Coverage Till 21.06.2019 (Area in Lakh Ha)						
Crop Name	Normal Area for whole Kharif Season	Normal Area as on date	Area sown reported
