

## Pulses Domestic Fundamentals:

### Today's Update:

- **At planting front Indian farmers have covered 12.84 lakh ha as on 12, July-2019. It is lower by 21.73% from last year. Normal area till date is 18.27 lakh ha and normal of the whole season is 43.00 lakh ha. The major growing state like Karnataka & Maharashtra planting is running behind by 32.80 % to 2.96 and 23.64 % to 3.82 lakh ha so far. Normal area in these states are 8.62 and 12.53 lakh ha. In AP normal area for tur is 2.37 lakh ha. However, farmers have covered only 0.06 lakh ha so far against 0.24 lakh ha last year. Against it, farmers in Telangana have covered 2.66 % higher area to 1.73 lakh ha this year so far. In MP area under tur is running behind by 27.23 % to 1.47 lakh ha. Normal area in M.P. is 5.80 lakh ha. Area in UP and Orissa has improved from last year by 28.35 and 32.86 % to 1.14 and 0.37 lakh ha so far. Situation is expected to improve in coming weeks.**
- **With better rainfall in growing region pressure on tur market continues and it lost Rs 100 more to Rs 5700 in Gulberga market. It may decrease to Rs 5600. At this level buyer would be active once again. Lower crop size last year and bleak prospects this year too would not allow market to decrease beyond a certain level. Stockiest are unwilling to sell at current level despite higher import quota of 4 lakh MT and possibility of 1.75 lakh MT more import through G2G basis. Govt. is willing to keep supply side at ease. So, any major spike in tur market in the near term is unlikely.**
- **Chana cash market trades under pressure taking clue from weak futures and ample stock available in central pool. Millers are unwilling to buy in bulk quantity as demand from retail market remains discouraging. In Delhi market chana is being traded at Rs 4400-4425. It may come down to Rs 4350. At this level buyers are expected to return into market. If Nafed sells chana below Rs 4250-4300, cash market is unlikely to recover in the near term. If it sells around 4400-4500, it may lend some support to cash market. Supply side is at ease amid weak demand. In short price direction for chana market depends on Nafed selling strategy in coming weeks. It is clear that Nafed would not be able to retain stock for more time as kharif procurement season starts in Aug-Sep.**
- **Over all kharif pulses area is lagging behind by 25.16 % to 34.22 lakh ha as on 12<sup>th</sup> July -2019. Arhar area is down by 21.73 % to 12.44 lakh ha so far while normal as on date is 18.27 lakh ha. Even urad area is down by 25.71 % to 8.59 lakh ha against normal of 10.64 lakh ha till date. Moong area is down by 23.99 % to 10.58 lakh ha against the normal of 13.95 lakh ha till date. Kulthi sowing has just started and it running behind by 50.47 % to 0.10 while other pulses coverage is 39.45 % down to 2.51 lakh ha against normal of 6.16 lakh ha. However, with monsoon advancing in growing regions, sowing activities is likely to pick up in coming weeks and farmers will be able to cover the gap in coming weeks.**

### Previous Update:

- **Govt. has increased MSP of pulses for kharif season 2019-20. Increase is considered marginal. Kharif pulses include tur, moong and urad. For arhar, the increase was 2.2 per cent (RS125 per qtl.) from Rs 5,675 a quintal to Rs 5,800 per quintal. The MSP of moong was increased by 1.07 per cent (Rs 75 per qtl) from Rs 6,975 to Rs 7,050 a quintal while that of urad was increased by 1.78 per cent (Rs 100 per qtl) from Rs 5,600 to Rs 5,700 a quintal.**
- **Chickpea/chana dal export from India increased from 13031.02 MT in April to 15294 MT in May. Total export in current MY registered at 28325.03 MT in last two months. Even tur export increased from 265.98 to 917.79 MT in May-2019. Green pea export stay almost steady at 4.03 MT. Lentil export increased from 858.49 Mt to 1759.89 MT in May. Urad export increased slightly to 517.44 MT, pea at 217.51 MT. However, moong export decreased from 1305.12 to 881.36 MT in May.**
- **Govt. has allowed peas import for seed purpose and it is not going to make a big difference on other pea price as seed grade pea is imported with different HS code. As it DGFT has started issuing license to importers. Some applicants have already received it and the rest are in process of getting it soon. There is a condition for importers that they have to import it before Oct-2019.**

### Pulses International Fundamental:

#### Today's Update:

- *As per latest data received from Russian Federal Customs Service chickpeas export from Russia decreased by 16% to 25197 MT in May-2019 in comparison to April when export was registered at 29,858MT. Russia has exported total 99674 MT in this MY against 19,209 MT during the previous calendar year. Pakistan was the major buyers buying 9,797 MT in May, followed by India-6,789 MT and Turkey at 3,766 MT. Demand remains weak as main buyer like India is almost out of the market due to higher availability in domestic market as well as central pool.*
- *Russian export of peas posted slight gain in comparison to March-2019. In April Russia exported 55930 MT peas, up by 8% to 51836MT in March. In current MY Russia has exported total 175,643 MT, down from 380,191 in the same period the last calendar year. Pakistan brought 12,004 MT, followed by India 9,655 MT and Bangladesh at 8,701 MT. Demand is likely to improve in coming months.*
- *Dry pea area in Canada is expected to increase by 12% over last year to 1.6 million ha in 2019-20. The reason behind higher area is mainly attributed to higher return and good demand for export over previous year. The major states like Saskatchewan and Alberta contribute 54 and 42 % in total production in Canada. Production is expected to increase by 12% to 4 MMT over previous year due to higher area coverage. Despite higher production supply side would increase marginally as carryout is lower. Demand from China and B, desh is expected to decline in 2019-20. Carry in may increase slightly to 0.4 MMT in 2019-20.*

#### Previous Update:

- *Even in US dry pea area is expected to increase slightly to 9 lakh Acres in 2019-20 due to higher area coverage in Montana. Production of pea in US is likely to decline by 35 to 0.7 MMT in 2019-20. The major buyers of US pea are Canada, the Philippines and Yemen.*
- *Chickpea area is expected to fall in Canada from 176 to 133 thousand Ha in 2019-20 while production is expected to fall from 3.11 to 2.30 lakh MT. Supply is forecast to increase due to higher carry-in stocks, but softened by lower imports and production. The average price is forecast to fall due to larger world supply, with the expectation of an average grade distribution in 2019-20 as per Canada Stats.*
- *US chickpea area for 2019-20 is forecast by the USDA to decrease by 40% to 0.52 million acres from the previous year. This is largely due to an expected fall in area in Idaho, North Dakota and Washington. Assuming normal yields Production is likely to decline by 43% to 0.33 MT in 2019-20. The major market for Us is EU, Pakistan and Canada*
- *Lentil area in Canada is expected to decline 10% to 1.4 million ha in 2019-20 due to the sharp decline in farm gate lentil prices in the second half of the 2018-19 crop year. Saskatchewan is a major lentil producing state accounting for 91% of the lentil area. Production is likely to decline to 2 MMT in 2019-20. Due to lower production and carryout supply side is expected to fall to 2.8 MMT. Export is likely to be stable at 1.8 MMT in 2019-20. Carryout would decrease to 0.5 MMT. So average price for top grade may increase -in 2019-20.*
- *Lentil Production In US is expected to decline by 29% to 0.55 million acres in 2019-20. The main reason behind this is lower area coverage in Montana and North Dakota. Production of lentil is expected to decline to 0.3 MMT in 2019-20, sharply lower from 2018-19. The main US export markets for lentils are EU, Canada, India and Mexico.*
- *In the month of April'19, red lentil exports from Canada decreased by 179% compared to March'19. Canada has exported 63465 MT of lentils in April'19. Top buyers of Canadian lentil were Bangladesh, India and Sri Lanka with 16950 MT, 15909 MT and 8761 MT respectively.*

**Weekly Outlook:** -Pulses are likely to trade steady to slightly weak.

**Kharif Sowing as 12-07-2019:**

Kharif Pulses Progressive Sowing Area Coverage Till 12.07.2019 ( Area in Lakh Ha)						
Crop Name	Normal Area for whole Kharif Season	Normal Area as on date	Area sown reported
