

Pulses Domestic Fundamentals:

Today's Update:

- Indian farmers have covered 82.92 lakh ha under kharif pulses as on 26th July-2019 against 101.84 lakh ha last year. Coverage area has improved last week and may continue to improve. Farmers have covered 29.58 lakh ha (34.57 lakh ha last year) under tur, 26.15 under urad (28.97 lakh ha last year), 20.48 under moong (27.20 lakh ha last year), 6.56 under other pulses (10.75 lakh ha last year) and 0.15 lakh ha under Kulthi (0.35 lakh ha last year so far. Despite improvement in coverage area last week it is running down by 18.58%. The gap is likely to be minimized in coming weeks.
- Nafed has procured only 32.75% chana in rabi marketing season 2019-20 till 23rd July against approved quantity of 2367498 MT for all states. It has procured 100% in Telangana against approved quantity of 34500 MT.In M.P.it has procured 50.2% against sanctioned quantity of 1148750MT.It has procured 28.83% in Rajasthan against 417575MT, in Gujarat total chana procurement was registered only 24.31% against70190 MT.In AP it has procured only 2.65% against approved quantity of 130898 MT.In UP it has procured only 0.42% against 176210 MT.In Maharashtra it has procured only 9.07% against approved quantity of 246700MT.In Karnataka only33.4 MT has been procured against131000 MT. In Haryana only 1.77% has been procured against 11675 MT. This shows that Nafed has procured only one third of the sanctioned quantity. Despite lower procurement in rabi season Nafed still has over 3.7 MMT pulses stock in its custody.
- Moong in Jaipur market is being traded at Rs6200-6400 depending on quality of the crop and may move further up before new crop from Karnataka starts hitting the market from August end. Right now new kharif crop condition is good. However, it heavy rains occur in growing reason, it may affect quality of the crop. There is a lack of superior grade moong in the market as mostly are in strong hands. As kharif area is lagging behind, crop size too is expected to be lower. Bulk demand for moong is weak right now.

Previous Update:

- As per All India Dal Millers Association President pulses production this kharif season is likely to decrease by 15 % due to longer period of dry spell and 16 % lower rainfall this season so far. Importers /millers can import only 4 lakh MT tur,1.5 lakh MT urad ,moong and pea each. This means supply for millers is likely to decrease and it would push up market once again.
- Lentil demand from millers is at lower levels. Furthermore, as per trade sources, importers have also entered into forward contracts for importing lentils from Canada. The delivery is expected to be mid to end of August. Therefore, continuous imports and low demand will keep lentil prices steady to weak. Lentil container and vessel at port are being quoted at Rs 4100 per quintal and Rs 4000 per quintal respectively. Lentil mill quality at Kanpur is moving in around Rs 4375 per quintal.
- Tur market seems under pressure due to govt.'s strategy and it would continue to trade stable in the near term despite lower crop size last year and slower planting progress this year. Govt has allowed 4 lakh MT import. Besides, additional 1.75 lakh MT would come through G2G channel. This means 5.75 lakh MT import would ease supply side in coming months. It does not include 2 lakh MT sale reserve stock. There are 4 to 5 consumption months remain before the new crop hits the market. So, availability is unlikely to be so tight. If incoming crop gets affected, its impact would felt next year. Agriwatch expects tur price to move in the range of Rs 5600-6000 in Gulberga market. Right now it is being traded at Rs 5750-5850. CiF quotes in Mayanmar have decreased to \$ 740 per MT after touching at \$780 per MT.It is good to release some parts of stock at every hike of Rs100-150.
- Urad cash market continued to reel under pressure due to sluggish demand from bulk buyers and release of higher quantity by punters/importers. As cash market has started adjusting with the higher supply flow, it may stay steady at current level. Improvement in market is expected in August as there is no crop due in next two months. Planting in Maharashtra (Udgir & Latur) has got delayed by 20 days, so new arrival is expected now in Sept. Besides, market is expecting festive demand and it may help market to recover from current level.

International Market Update:

- As per the latest estimate by NASS (US) area under total pulses in US is likely to decline by 15.57 % to 2,121,500 acres in 2019 against 2,512,800 acres in 2018. All Chickpeas area is expected to decline by 34.91 % to 559,500 this year. Small & large chickpeas area is expected to decline by 43.87 & 31.77 % to 125,000 & 434,500 acres in 2019. Even lentils area is expected to decline by 31.41 % to 535,000 acres. However, dry pea area is expected to increase by 17.65 % to 1,027,000 acres in 2019 in US.
- Dry pea stock in US is likely to increase by 0.02 % tp 203983 MT in 2019. It was 199628 MT in 2018. Even lentils stock is expected to be higher by 81% to 144,425 MT in 2019 against 79833 MT in 2018. All chickpeas stock is 294% higher to 157262 MT against 39916 MT in 2018. Out of total small chickpeas stock increase from 12156 to 43318 MT in 2019. It is higher by 256% from last year. Large chickpeas stock is expected to increase by 310% to 113,943 MT in 2019.

Previous Update:

- Dry pea production in Canada is likely to increase by 20 % to 43 lakh MT in 2019-20 against 35.81 MT produced last year. Higher production estimate would increase total supply by 6 % to 45.15 lakh MT. Due to higher export estimate(by 5 lakh MT to 31lakh MT) this year may restrict total supply side from 42.46 to 45.15 lakh MT Domestic consumption has been pegged at 9.15 lakh MT. Despite higher production carryout is expected to decrease from 7.45 to 5 lakh MT. Average price for the year is likely to hover in the range of \$255 to 285 per MT.
- Lentils production in Canada is likely to increase by 5.16 % to 22lakh MT in 2019-20 against 20.92lakh MT last year. However, total supply would decrease by 3.14 % to 28.95 lakh MT due to higher domestic use pegged at almost 6 lakh MT. Carryout would decrease from 7 to 5 lakh MT in 2019-.20. Export has been pegged at 18 lakh MT, similar as last year. Average yearly lentil price is expected to hover in the range of \$430 to 460 per MT.
- As per the latest update by US dry peas & lentil council mostly standing pulses crops are heading towards maturity stage despite some planting is going on in particular regions. Crop condition is normal to good. As demand from India is weak so farmers have changed planting decision to some extent this year. Inventory of chickpeas and lentil has increased. As per USDA estimate area under chickpeas and lentils have decreased by 31 & 35 % respectively. Montana lentil crops benefitted from good rains across the state. 52% of lentil plants are in bloom. The lentil crop rated 4% poor, 52% fair, 43% good and 1% excellent.
- A tentative comparison from last year shows that carryover stocks are high for all peas, lentils, and chick- peas. Dry pea stocks are up 2% to 204,117 MT, lentils are up 81% at 144,242 MT. Large chickpeas are up 310 percent or 113,851 MT, while small chick- peas are up 256 percent, or 43,318 MT. Total chickpeas are up 294% for a total of 157,396 MTas per NASS report.
- As per latest data received from Russian Federal Customs Service chickpeas export from Russia decreased by 16% to 25197 MT in May-2019 in comparison to April when export was registered at 29,858MT.Russia has exported total 99674 MT in this MY against 19,209 MT during the previous calendar year. Pakistan was the major buyers buying 9,797 MT in May, followed by India-6,789 MT and Turkey at 3,766 MT. Demand remains weak as main buyer like India is almost out of the market due to higher availability in domestic market as well as central pool.
- Russian export of peas posted slight gain in comparison to March-2019. In April Russia exported 55930 MT peas, up by 8% to 51836MT in March.in current MY Russia has exported total 175,643 MT, down from 380,191 in the same period the last calendar year. Pakistan brought 12,004 MT, followed by India 9,655 MT and Bangladesh at 8,701 MT. Demand is likely to improve in coming months.
- Chickpea area is expected to fall in Canada from 176 to 133 thousand Ha in 2019-20 while production is expected to fall from 3.11to 2.30 lakh MT. Supply is forecast to increase due to higher carry-in stocks, but softened by lower imports and production. The average price is forecast to fall due to larger world supply, with the expectation of an average grade distribution in 2019-20 as per Canada Stats.

Weekly Outlook: -Pulses are likely to trade steady to slightly weak.
