

## **Pulses Domestic Fundamentals:**

### **Today's Update:**

*Chana is unlikely to move up despite improved demand due to festive season and weak futures. Futures of chana depends on Nafed selling strategy. In Delhi market chana traded at Rs 4375-4400 .Arrival was reported 50 motors, higher by 20 motor from previous day. Stake holders should avoid retaining stock for longer period.At every improvement of Rs 100, continue to release stock in parts.*

*Nafed Procured 25965.15 MT moong against approved quantity of 58643 MT during Rabi 2019-20 so far. Maximum quantity has been procured in AP.It has procured 12429.05 MT against approved quantity of 19235 MT. Odisha has contributed 6086.06MT,Tamil Nadu-5383.89 MT and Gujarat-2066.15MT so far agaisnt approved quantity of 14210MT,16900 and 7093 MT respectively. This shows that rabi moong procurement is only 44.27% of approved quantity.*

*Poor performance at urad procurement front by Nafed too was seen in rabi 2019-20.Nafed has procured 18240.54MT urad against approved quantity of 130881MT.It is only 13.93 % of approved quantity.The highest contributor was AP contributing 12797.05MT against approval of 70390 MT.Nafed procured 961.8MT in Telangana & 3379.07 in Tamil Nadu agaisnt approved quantity of 963 &58425 MT respectively as on 24July-2019. It procured almost 100% in Odisa (1102.62 against 1163 MT).*

### **Previous Update:**

- **Tur cash market continued to trade stable during the week under review. Old stock** is being released by private trades at prevailing prices despite lower area coverage so far. This year too under prevailing condition crop size is expected to be similar as last year and it would create short supply if allowed 4 lakh MT import is not materialized before 31st Oct-2019.Supply side is balanced right now. So Prices of tur are expected to move range bound in coming weeks. Govt. has started releasing stock from buffer stock to states for distribution through PDS. Uttarakhand govt. would buy around 5000 MT pulses including tur and give subsidy of Rs 15 per kg to ration card holder. Other states too would follow the suit in coming weeks. If incoming crop gets affected, its impact would feel next year. Agriwatch expects tur price to move in the range of Rs 5600-6000 in Gulbarga market. Right now, it is being traded at Rs 5825-5850. CiF quotes in Myanmar have decreased to \$ 750 per MT after touching at \$780 per MT. It is good to release some parts of stock at every hike of Rs100-150.
- **New crop of moong from Karnataka is expected to hit market in the second half of August** and crop condition is said to be good so far. Recent showers of rains have benefitted the standing moong crop in many states. However, situation is critical in Maharashtra. Kharif sowing in Maharashtra is running behind by 30 % and sowing season in the state is almost over now. This year sowing has been reported only 69 % of 5 years average in Maharashtra. It would reduce the crop size by 20 to 25 % this year in the state. So moong is likely to trade firm in coming weeks. Major portion of stock is in strong hands and demand is expected to improve as stock in pipeline is coming down now. In Jaipur market moong is being traded at Rs 6200-6300.It may move further up by Rs200. Major kharif growing states like Rajasthan, Karnataka, Odisha, Telangana, M.P. and Gujarat condition for moong crop is poor in Maharashtra. It may be compensated by Rajasthan as good showers of rains are occurring in Rajasthan ,M.P. and many eastern states. So any major spike in moong cash market is unlikely until and unless moong crop is washed out by flooding in Rajasthan.
- **Indian farmers have covered 82.92 lakh ha under kharif pulses as on 26th July-2019** against 101.84 lakh ha last year. Coverage area has improved last week and may continue to improve.. Farmers have covered 29.58 lakh ha (34.57 lakh ha last year) under tur, 26.15 under urad (28.97 lakh ha last year), 20.48 under moong (27.20 lakh ha last year), 6.56 under other pulses (10.75 lakh ha last year) and 0.15 lakh ha under Kulthi (0.35 lakh ha last year so far. Despite improvement in coverage area last week it is running down by 18.58%.The gap is likely to be minimized in coming weeks.

- **Lentil demand from millers is at lower levels. Furthermore, as per trade sources, importers** have also entered into forward contracts for importing lentils from Canada. The delivery is expected to be mid to end of August. Therefore, continuous imports and low demand will keep lentil prices steady to weak. Lentil container and vessel at port are being quoted at Rs 4100 per quintal and Rs 4000 per quintal respectively. Lentil mill quality at Kanpur is moving in around Rs 4375 per quintal.

#### **International Market Update:**

- **As per the latest estimate by NASS (US) area under total pulses in US is likely to decline by 15.57 % to 2,121,500 acres in 2019 against 2,512,800 acres in 2018.** All Chickpeas area is expected to decline by 34.91 % to 559,500 this year. Small & large chickpeas area is expected to decline by 43.87 & 31.77 % to 125,000 & 434,500 acres in 2019. Even lentils area is expected to decline by 31.41 % to 535,000 acres. However, dry pea area is expected to increase by 17.65 % to 1,027,000 acres in 2019 in US.
- **Dry pea stock in US is likely to increase by 0.02 % to 203,983 MT in 2019. It was 199,628 MT in 2018.** Even lentils stock is expected to be higher by 81% to 144,425 MT in 2019 against 79,833 MT in 2018. All chickpeas stock is 294% higher to 157,262 MT against 39,916 MT in 2018. Out of total small chickpeas stock increase from 12,156 to 43,318 MT in 2019. It is higher by 256% from last year. Large chickpeas stock is expected to increase by 310% to 113,943 MT in 2019.

#### **Previous Update:**

- **Dry pea production in Canada is likely to increase by 20 % to 43 lakh MT in 2019-20 against 35.81 MT produced last year.** Higher production estimate would increase total supply by 6 % to 45.15 lakh MT. Due to higher export estimate (by 5 lakh MT to 31 lakh MT) this year may restrict total supply side from 42.46 to 45.15 lakh MT. Domestic consumption has been pegged at 9.15 lakh MT. Despite higher production carryout is expected to decrease from 7.45 to 5 lakh MT. Average price for the year is likely to hover in the range of \$255 to 285 per MT.
- **Lentils production in Canada is likely to increase by 5.16 % to 22 lakh MT in 2019-20 against 20.92 lakh MT last year.** However, total supply would decrease by 3.14 % to 28.95 lakh MT due to higher domestic use pegged at almost 6 lakh MT. Carryout would decrease from 7 to 5 lakh MT in 2019-20. Export has been pegged at 18 lakh MT, similar as last year. Average yearly lentil price is expected to hover in the range of \$430 to 460 per MT.
- **As per the latest update by US dry peas & lentil council mostly standing pulses crops** are heading towards maturity stage despite some planting is going on in particular regions. Crop condition is normal to good. As demand from India is weak so farmers have changed planting decision to some extent this year. Inventory of chickpeas and lentil has increased. As per USDA estimate area under chickpeas and lentils have decreased by 31 & 35 % respectively. Montana lentil crops benefitted from good rains across the state. 52% of lentil plants are in bloom. The lentil crop rated 4% poor, 52% fair, 43% good and 1% excellent.
- **A tentative comparison from last year shows that carryover stocks are high for all peas, lentils, and chick-peas.** Dry pea stocks are up 2% to 204,117 MT, lentils are up 81% at 144,242 MT. Large chickpeas are up 310 percent or 113,851 MT, while small chick-peas are up 256 percent, or 43,318 MT. Total chickpeas are up 294% for a total of 157,396 MT as per NASS report.
- **As per latest data received from Russian Federal Customs Service chickpeas export from Russia** decreased by 16% to 25,197 MT in May-2019 in comparison to April when export was registered at 29,858 MT. Russia has exported total 99,674 MT in this MY against 19,209 MT during the previous calendar year. Pakistan was the major buyers buying 9,797 MT in May, followed by India-6,789 MT and Turkey at 3,766 MT. Demand remains weak as main buyer like India is almost out of the market due to higher availability in domestic market as well as central pool.
- **Russian export of peas posted slight gain in comparison to March-2019. In April** Russia exported 55,930 MT peas, up by 8% to 518,364 MT in March. In current MY Russia has exported total 175,643 MT, down from 380,191 in the same period the last calendar year. Pakistan brought 12,004 MT, followed by India 9,655 MT and Bangladesh at 8,701 MT. Demand is likely to improve in coming months.

- *Chickpea area is expected to fall in Canada from 176 to 133 thousand Ha in 2019-20 while production is expected to fall from 3.11 to 2.30 lakh MT. Supply is forecast to increase due to higher carry-in stocks, but softened by lower imports and production. The average price is forecast to fall due to larger world supply, with the expectation of an average grade distribution in 2019-20 as per Canada Stats.*

**Weekly Outlook:** -Pulses are likely to trade steady to slightly weak.

*Kharif Sowing as 26-07-2019:*

Kharif Pulses Progressive Sowing Area Coverage Till 26.07.2019 ( Area in Lakh Ha)
