

Pulses Domestic Fundamentals:

Today's Update:

- **New early kharif urad crop from MP is expected to hit market by mid sep.** Crop condition is good so far. However, heavy rains, if continue, may damage urad crop in MP. As far as old stock in private hands is concerned, it is not enough to fulfil market demand despite 1.5 lakh MT import option till 31st oct-2019. However, Nafed still has 3.32 lakh MT stock. Out of total 3.14 lakh MT is old stock. It may restrict urad market to move one way up. If rains damage standing crop, it may move up by Rs250 to 300 from current level. New urad from Gujarat and Maharashtra too would hit market from second week of Sep. However, late sowing heavy rains may impact yield. Quality of imported urad is not good. So quality urad may move up in coming weeks. Urad from Chandausi line is expected in Nov.
- **As per latest update, dry pea production in United States is expected to increase due to increase in acreage in both major producing i.e. Montana and North Dakota.** Dry pea acreage in Montana and North Dakota is expected to increase by 44% and 8% to 1.98 Lakh Hectares and 1.63 Lakh Hectares respectively. Import duties as well as import quota in India has impacted exports from United States.
- **Lentil prices remained weak in past week due to low demand. Prices fell by around Rs 50-75 per quintal.** As of now lentil mill quality at Kanpur is trading around Rs 4400 per quintal. Furthermore continuous and cheaper imports are also keeping the lentil market under pressure. Prices are expected to remain steady to slightly weak in upcoming week. Canadian lentil container and vessel at port are being quoted at Rs 4025 per quintal and Rs 3925 per quintal respectively.
- **Import flow of pulses from Myanmar and Africa during last one week at Indian ports,** many vessels on way to Indian ports and weak demand in domestic market at this point of time has pressurized pulses cash market by 5 to 10 % in four-five days. As supply from imported pulses and from kharif crop is expected to increase by the end of this month, prices of pulses is expected to remain under pressure during festive season. Normally, pulses demand increases during festive season. However, govt, allowed 4 lakh MT tur import, 1.5 lakh MT moong and urad each. Besides lentil is being imported at faster pace. Good rainfall in kharif growing belts too is ensuring better kharif pulses production prospects. So, prices of pulses would remain stable at peak demand season.
- **Decreased arrival of chana in Delhi helped market to recover slightly by Rs 50 to Rs 4400.** As demand has not been up to the mark against supply, any spike is unlikely. Private trades may prefer to lighten their stock at Rs4500 analyzing hefty stock of chana with Nafed. Demand in domestic market is still poor. Almost all pulses are reeling under pressure right now. Good rainfall has increased better kharif prospects. So, any jump in cash pulses market is unlikely in the near term.

Previous Update:

- **Sources say that 20,000 MT tur and 30,000 MT urad vessels are in way to India from Myanmar** and is likely to hit Indian port by mid of August. Loading for another 5 to 10 thousand MT is under process and is expected to start from Myanmar by 10 to 12 August. The millers who have imported tur and urad would not be able to sell it directly to any one as there is a stern penalty if it is sold directly in the market without processing. New crop of tur in Burma is in good condition and under prevailing condition good crop is expected. New crop would hit market just ahead of Indian crop.
- **New arrival of early kharif moong is about to start in Karnataka in Gadag market.** The pressure is likely to build from mid Aug. Arrival of two bags was reported today and was traded at Rs7600-7800 per qtl. MSP for kharif moong is Rs7050 per qtl. Sowing is running behind by 6.7 lakh ha to 20.50 lakh ha and it is 7 lakh ha lower from normal average. However, recent rains in Rajasthan, M.P., and Maharashtra have given much needed respite to standing moong crop. Heavy rains, if occur, may damage crop and its quality in coming weeks.
- **Nafed Procured 25965.15 MT moong against approved quantity of 58643 MT** during Rabi 2019-20 so far. Maximum quantity has been procured in AP. It has procured 12429.05 MT against approved quantity of 19235 MT. Odisha has contributed 6086.06 MT, Tamil Nadu-5383.89 MT and Gujarat-2066.15 MT so far against approved

quantity of 14210MT, 16900 and 7093 MT respectively. This shows that rabi moong procurement is only 44.27% of approved quantity.

Higher production estimate would increase total supply by 6 % to 45.15 lakh MT. Due to higher export estimate (by 5 lakh MT to 31 lakh MT) this year may restrict total supply side from 42.46 to 45.15 lakh MT. Domestic consumption has been pegged at 9.15 lakh MT. Despite higher production carryout is expected to decrease from 7.45 to 5 lakh MT. Average price for the year is likely to hover in the range of \$255 to 285 per MT.***

Export has been pegged at 18 lakh MT, similar as last year. Average yearly lentil price is expected to hover in the range of \$430 to 460 per MT.***
- ***As per the latest update by US dry peas & lentil council mostly standing pulses crops are heading towards maturity stage despite some planting is going on in particular regions. Pakistan was the major buyers buying 9,797 MT in May, followed by India-6,789 MT and Turkey at 3,766 MT.
