

Pulses Domestic Fundamentals:

Today's Update:

- **Despite higher prevailing prices in domestic market the farm ministry is unwilling to relax quantitative restriction on yellow peas import as pulses availability in domestic market is ample and prices of other pulses are ruling lower..** Earlier the farm ministry in June had suggested to increase import volume from 1.5 to 2 lakh MT. Before this in March -2019, the pea import quantity was increased from 1 to 1.5 lakh MT. Now food minister says that availability of pulses is ample at 30.7 MMT for 2019-20. It hints that peas import quantity is unlikely to be increased further even in third and fourth quarters.
- **Moong crop in Merta, Shekhawati, Chhoti Khatu and Jayal line of Rajasthan is in excellent condition and is expected to hit market by third week of Sep.** Higher price during sowing season encouraged farmers to grow more moong this year. However, old moong price would rule higher until moong from Rajasthan hits the market. There is report of some loss in Kishanganj line. Overall, crop size is larger in Rajasthan.
- **In Maharashtra moong crop in Akola and Khamgaon line is in very good condition. Summer crop in UP, Bihar, Jharkhand and MP was lower in size.** So moong price increased from normal expected level. Now stockiest have resorted to release light quality stock at Rs 5500-5700. Mills are buying moong at this level. It is good time for traders and stockiest to start offloading moong now.

Previous Update:

- **Govt. started offloading tur stock with tur area crossing last year level due to good rainfall** in growing regions during early August. Nafed has floated tenders for disposing 40259MT tur in Karnataka, Maharashtra and Gujarat. It may pressurize tur market by Rs100-200 from current level. As on 23rd August-2019 Indian farmers had covered 43.42 lakh ha against 42.26 lakh ha last year. As sowing would continue till 15th Sep, area is expected to be around 45 lakh ha, around 2 lakh ha higher than last year. Higher coverage area would compensate the recent loss by flooding and heavy rains. As weather has been favourable at this stage, production is expected to increase from normal expectation.
- **Food ministry is monitoring pulses market closely and if feel necessary, may take action on hoarders.** There is ample availability of pulses in the country and essential commodities prices are expected to stay steady. It has pressurised pulses market and inner tone in the market has weakened.
- **Chana market continued to reel under pressure as buyers remained side-lined .Inner tone** in the market has weakened with food ministry statement that it may take action against hoarders. Besides, Nafed has ample stock and it may start selling chana before kharif pulses procurement starts. In Delhi market chana decreased by Rs Rs50-75 to Rs420-4300. It may decrease to Rs4200. However, demand is expected to increase as soon as market gets stabilized.
- **Lentil prices traded weak in the past week due to continuous imports. As per market sources** vessel (Medi Astoria) is likely to arrive at Mundra port either today or tomorrow with 28620.15 tonnes of lentil. Mill quality lentil at Kanpur fell to Rs 4410 per quintal from Rs 4450 per quintal. As per govt.'s fourth advance estimate released on 19th August-2019 govt. has estimated 1.56 MMT production in 2018-19 compared to final estimate of 1.62 MMT for 2017-18. As per traders view, this estimate is at higher side.
- **New early kharif urad crop from MP is expected to hit market by mid sep.** Crop condition is good so far. However, heavy rains, if continue, may damage urad crop in MP. As far as old stock in private hands is concerned, it is not enough to fulfil market demand despite 1.5 lakh MT import option till 31st oct-2019. However, Nafed still has 3.32 lakh MT stock. Out of total 3.14 lakh MT is old stock. It may restrict urad market to move one way up. If rains damage standing crop, it may move up by Rs250 to 300 from current level. New urad from Gujarat and Maharashtra too would hit market from second week of Sep. However, late sowing heavy rains may impact yield. Quality of imported urad is not good. So quality urad may move up in coming weeks. Urad from Chandausi line is expected in Nov.

International Market Update:

- **Poor domestic and export demand continued to weigh on global chickpea market this week.** Given the supply situation and carryin from 2018-19 buyers are in no hurry to buy. They are active to fulfill their immediate needs. They are not buying for medium or long term basis. As harvesting is delayed by 10 to 15 days, it is difficult to move stock into export market in lesser time. India may pose a challenge as chickpeas market is decreasing and Govt.'s agency like Nafed has excess stock to offload.
- **Dry peas harvest in Canada and US has got momentum despite slower pace of commencement.** It is still running behind of 5 years average. Harvesting of 52% US dry is over now against 70% last year till date. With current harvested area around 4.92 lakh MT peas from new crop would be available for sale this week. It was 5.26 lakh MT last year at this point of time. The 5 years average is 5.98 lakh MT. Against it Canadian farmers have been able to harvest only 12 % dry pea so far due to bad weather condition in growing regions. In Canada only 4.92 lakh MT new peas is available against 16.6 lakh MT last year till date.
- **Global Lentil markets are not comfortable with Canada's first production estimates for lentils** as it is based on estimated yield before harvesting. As on Aug-2019 around 5% harvest of lentil in Saskatchewan was complete. Around 14 % was ready to straight combine while 5% in swath. If weather remains favorable, harvesting activities is bound to pick up in coming weeks.

Previous Update:

- **Dry peas production in Canada is expected to increase by 20 % to 43 lakh MT in comparison to last year.** The reason is attributed to higher area coverage in 2019-20 crop year. The major growing state is Saskatchewan accounting 50 % in total production. Alberta is 2nd major growing state accounting 45% of total production. As carry in stock is lower supply side is expected to increase by only 55 tp 4.5 MMT. Export may decrease to 31 lakh MT. Top buyers might be China, Bangladesh and the US. Carry in stock would increase. Average price is expected to be similar as 2018-19.
- **Chickpeas export from Australia increased by 10 % to 27251 MT in June against May when it was registered at 24719 MT** as per Australia Bureau of Statistics. Thus total export in current MY reached to 259,863 MT (till June) against 646,411 MT in corresponding period last year. B, desh brought 8,463 MT in June followed by Pakistan at 8,064 MT. UAE purchased 4,991 MT in June.
- **As per the latest estimate by NASS (US) area under total pulses in US is likely to decline by 15.57 % to 2,121,500 acres in 2019 against 2,512,800 acres in 2018.** All Chickpeas area is expected to decline by 34.91 % to 559,500 this year. Small & large chickpeas area is expected to decline by 43.87 & 31.77 % to 125,000 & 434,500 acres in 2019. Even lentils area is expected to decline by 31.41 % to 535,000 acres. However, dry pea area is expected to increase by 17.65 % to 1,027,000 acres in 2019 in US.
- **Dry pea stock in US is likely to increase by 0.02 % tp 203983 MT in 2019.** It was 199628 MT in 2018. Even lentils stock is expected to be higher by 81% to 144,425 MT in 2019 against 79833 MT in 2018. All chickpeas stock is 294% higher to 157262 MT against 39916 MT in 2018. Out of total small chickpeas stock increase from 12156 to 43318 MT in 2019. It is higher by 256% from last year. Large chickpeas stock is expected to increase by 310% to 113,943 MT in 2019.
- **Lentils production in Canada is likely to increase by 5.16 % to 22 lakh MT in 2019-20** against 20.92 lakh MT last year. However, total supply would decrease by 3.14 % to 28.95 lakh MT due to higher domestic use pegged at almost 6 lakh MT. Carryout would decrease from 7 to 5 lakh MT in 2019-.20. Export has been pegged at 18 lakh MT, similar as last year. Average yearly lentil price is expected to hover in the range of \$430 to 460 per MT.
- **A tentative comparison from last year shows that carryover stocks are high for all peas, lentils, and chick- peas.** Dry pea stocks are up 2% to 204,117 MT, lentils are up 81% at 144,242 MT. Large chickpeas are up 310 percent or 113,851 MT, while small chick- peas are up 256 percent, or 43,318 MT. Total chickpeas are up 294% for a total of 157,396 MT as per NASS report.

- *Chickpea area is expected to fall in Canada from 176 to 133 thousand Ha in 2019-20 while production is expected to fall from 3.11 to 2.30 lakh MT. Supply is forecast to increase due to higher carry-in stocks, but softened by lower imports and production. The average price is forecast to fall due to larger world supply, with the expectation of an average grade distribution in 2019-20 as per Canada Stats.*

Weekly Outlook: -Pulses are likely to trade steady to slightly weak.

Kharif Sowing as 23-08-2019:
