

Pulses Domestic Fundamentals:

Today's Update:

- **Urad and moong crops in Baran, Bundi, Chittorgarh, Dholpur, Jhalawar & Kota in Rajasthan, Mansore, Neemuch, Bhopal and Hoshangabad in MP & Marathwara and 3 districts in central Maharashtra have suffered a lot due to flooding and continuous rains. In Maharashtra moong and urad crops are at harvesting stages. Total 1.6 to 1.8 lakh ha urad crop in Rajasthan is feared to be washed out. Around 60 to 75 thousand ha moong crop is said to be washed out in Rajasthan.**
- **In M.P districts like Mandsor, Neemuch, Bhopal and Hoshangabad are said to be worst affected. Around 1.0 to 1.25 lakh ha area under pulses is said to be washed out. In Maharashtra flood and heavy rains have affected mature crop of moong and urad in Marathwara region and central Maharashtra. Around 50 to 60 thousand ha is expected to be affected badly.**
- **Total area loss under pulses is over 3 lakh ha. If rains continue damage would increase further. However, crop conditions are excellent in Gwalior and Chambal region of MP, Nagore, Sumerpur, Jaipur and Kishanganj in Rajasthan. In UP urad crops in good condition except Allahabad region. Total crop size loss for urad is expected around 1.5 lakh MT, while 50 to 60 thousand MT loss for Moong is expected.**
- **Indian farmers have covered 132.08 lakh ha area under kharif pulses as on 13 Sep-2019 against 134.83 lakh ha last year till date. Sowing is at last phase now. It is 2.04% lower than last year. Tur area is lower by only 0.35% to 45.37 lakh ha. It was 45.53 lakh ha last year. Urad area is lower by 1.87% to 38.14 lakh ha. It was 38.86 lakh ha last year. Moong area is lower by 9.55% to 30.77 lakh ha. It was 34.02 lakh ha last year. However, area under Kulthi and other pulses is up by 4.12 & 859% to 0.58 & 17.23 lakh ha respectively.**
- **Despite demand of higher import duty on Masur govt has not taken any decision on import duty. However, govt is aware of higher volume of import and may analyze the overall scenario before taking any decision on imposing higher duty. There is a continuous flow of masur from Canada and Australia and it is affecting price in domestic market.**

Previous Update:

- **Despite some improvements seen in futures chana market is unlikely to sustain at higher level. Demand from bulk users has improved taking clue from firm futures. Once Nafed starts selling chana in bulk volume it would come down again. Market is well aware of ample availability of chana in central pool as well as in private hands. If we keep aside reserve stock of 1278453 MT, still there is a availability of 1232136 MT with Nafed for sale. In Delhi market chana is being traded at Rs 4350-4350. If demand improves and Nafed decides not to sell stock, it may move to 4400-4500 maximum. Liquidity crunch too is restricting normal trade. So it is better to sell Chana at every hike of Rs 75-100.**
- **Tur market continued to trade under pressure as demand from bulk users remains subdued against ample supply from private trades and imported stock. Despite some crop loss by flooding in Gujarat, M.P. and Rajasthan crop in other states are in normal condition. Besides, Nafed has around 8 lakh MT stock. It would keep market under pressure in coming weeks. New crop would hit market in December. So there is ample stock for for three months consumption. In Gulberga market tur is being traded at Rs 5650-5700. It may further decrease by Rs 100-150 from current level.**
- **Moong crop in Merta, Shekhawati, Chhoti Khatu and Jayal line of Rajasthan is in excellent condition and is expected to hit market by third week of Sep. Higher price during sowing season encouraged farmers to grow more moong this year. However, old moong price would rule higher until moong from Rajasthan hits the market. There is report of some loss in Kishanganj line. Overall, crop size is larger in Rajasthan.**
- **In Maharashtra moong crop in Akola and Khamgaon line is in very good condition. Summer crop in UP, Bihar, Jharkhand and MP was lower in size. So moong price increased from normal expected level. Now stockiest have resorted to release light quality stock at Rs 5500-5700. Mills are buying moong at this level. It is good time for traders and stockiest to start offloading moong now.**

International Market Update:

- **Pea export from Russia decreased to 28836MT in June against 56283 MT in May-2019.** Total export during calendar year was registered at 2.04 lakh MT, down by 62% from last year. Turkey purchased 8,571 MT, Pakistan 8,554 MT, followed by India at 3,107 MT in June.
- **As per the latest updates by Australia Bureau of Statistics chickpeas export from Australia declined in July to 16632MT against 25805 MT in June-2019.** It is almost 36% down from June. Total export till July was recorded at 275,049 MT, massively down from 671,642 during the last marketing year. Pakistan, B, desh and UAE purchased 4,474 MT, 4,403 MT & 2,455 MT. respectively in July-2019.
- **Chickpeas crop condition is not as satisfactory as local farmers estimate in US and Canada.** There are reports of infestation (ascochyta blight and other diseases) in the crop due to wet weather conditions. Farmers of Western Canada and the northern United States are reporting infestation in standing crops. CDC Orion varieties are more affected than other varieties. If it continues to increase, production in both countries may decline by 10 to 15% from farmer's expectation. Quality of the crop too may be downgraded.
- **Poor domestic and export demand continued to weigh on global chickpea market this week.** Given the supply situation and carry in from 2018-19 buyers are in no hurry to buy. They are active to fulfill their immediate needs. They are not buying for medium or long term basis. As harvesting is delayed by 10 to 15 days, it is difficult to move stock into export market in lesser time. India may pose a challenge as chickpeas market is decreasing and Govt.'s agency like Nafed has excess stock to offload.
- **Dry peas harvest in Canada and US has got momentum despite slower pace of commencement .** It is still running behind of 5 years average. Harvesting of 52% US dry is over now against 70% last year till date. With current harvested area around 4.92 lakh MT peas from new crop would be available for sale this week. It was 5.26 lakh MT last year at this point of time. The 5 years average is 5.98 lakh MT. Against it Canadian farmers have been able to harvest only 12 % dry pea so far due to bad weather condition in growing regions.. In Canada only 4.92 lakh MT new peas is available against 16.6 lakh MT last year till date.

Previous Update:

- **Dry peas production in Canada is expected to increase by 20 % to 43 lakh MT in comparison to last year.** The reason is attributed to higher area coverage in 2019-20 crop year. The major growing state is Saskatchewan accounting 50 % in total production. Alberta is 2nd major growing state accounting 45% of total production. As carry in stock is lower supply side is expected to increase by only 55 tp 4.5 MMT .Export may decrease to 31 lakh MT. Top buyers might be China, Bangladesh and the US. Carry in stock would increase. Average price is expected to be similar as 2018-19.
- **Chickpeas export from Australia increased by 10 % to 27251 MT in June against May when it was registered at 24719MT as per Australia Bureau of Statistics.** Thus total export in current MY reached to 259,863 MT (till June) against 646,411 MT in corresponding period last year. B, desh brought 8,463 MT in June followed by Pakistan at 8,064 MT. UAE purchased 4,991 MT in June.
- **Dry pea stock in US is likely to increase by 0.02 % to 203983 MT in 2019.** It was 199628 MT in 2018. Even lentils stock is expected to be higher by 81% to 144,425 MT in 2019 against 79833 MT in 2018. All chickpeas stock is 294% higher to 157262 MT against 39916 MT in 2018. Out of total small chickpeas stock increase from 12156 to 43318 MT in 2019. It is higher by 256% from last year. Large chickpeas stock is expected to increase by 310% to 113,943 MT in 2019.
- **Lentils production in Canada is likely to increase by 5.16 % to 22 lakh MT in 2019-20** against 20.92 lakh MT last year. However, total supply would decrease by 3.14 % to 28.95 lakh MT due to higher domestic use pegged at almost 6 lakh MT. Carryout would decrease from 7 to 5 lakh MT in 2019-.20. Export has been pegged at 18 lakh MT, similar as last year. Average yearly lentil price is expected to hover in the range of \$430 to 460 per MT.
- **Chickpea area is expected to fall in Canada from 176 to 133 thousand Ha in 2019-20** while production is expected to fall from 3.11 to 2.30 lakh MT. Supply is forecast to increase due to higher carry-in stocks, but softened by lower

imports and production. The average price is forecast to fall due to larger world supply, with the expectation of an average grade distribution in 2019-20 as per Canada Stats.

Weekly Outlook: -Pulses are likely to trade steady to slightly weak.

Kharif Sowing as 13-09-2019:
