

Pulses Domestic Fundamentals:

Today's Update:

- **Tur cash market continued to trade under pressure as importers have started releasing** lower quality stock at discounted price. In Gulberga market tur is being traded at Rs 5550-5650 per qtl. down by Rs 100 from last week. Total area coverage under tur is almost same as last year at 45.37 lakh ha. It may end up with 46 lakh ha this year against normal of 43 lakh ha. Crop condition started improving with recent showers of rains in major growing belts despite some losses in Gujarat, Raj and MP. Area loss is likely to be compensated by higher yield in Mah, UP and Gujarat. However, crop condition is poor in Karnataka, the major tur growing states where 11.69 lakh Ha has been covered. Area in Mah crossed 12 lakh ha.
- **Imported tur from Myanmar is said to be poor quality and it is being sold at lower price at Rs5250.**It has affected the price of quality tur. Prices is expected to improve once poor quality imported stock ends. Any major spike in tur market is unlikely as there is ample stock in domestic market including central pool stock. New crop is hardly two months away now. Myanmar is offering lemon tur at \$675 per MT basis Indian ports.

Previous Update:

- **Urad and moong crops in Baran, Bundi, Chittorgarh, Dholpur, Jhalawar & Kota** in Rajasthan, Mansore, Neemuch, Bhopal and Hoshangabad in MP & Marathwara and 3 districts in central Maharashtra have suffered a lot due to flooding and continuous rains. In Maharashtra moong and urad crops are at harvesting stages. Total 1.6 to 1.8 lakh ha urad crop in Rajasthan is feared to be washed out. Around 60 to 75 thousand ha moong crop is said to be washed out in Rajasthan.
- **In M.P districts like Mandsor, Neemuch, Bhopal and Hoshangabad are said to be worst affected.** Around 1.0 to 1.25 lakh ha area under pulses is said to be washed out. In Maharashtra flood and heavy rains have affected mature crop of moong and urad in Marathwara region and central Maharashtra. Around 50 to 60 thousand ha is expected to be affected badly.
- **Total area loss under pulses is over 3 lakh ha. If rains continue damage would increase further.** However, crop conditions are excellent in Gwalior and Chambal region of MP, Nagore, Sumerpur, Jaipur and Kishanganj in Rajasthan. In UP urad crops in good condition except Allahabad region. Total crop size loss for urad is expected around 1.5 lakh MT, while 50 to 60 thousand MT loss for Moong is expected.
- **Indian farmers have covered 132.08 lakh ha area under kharif pulses as on 13Sep-2019 against 134.83 lakh ha** last year till date. Sowing is at last phase now. It is 2.04% lower than last year. Tur area is lower by only 0.35% to 45.37 lakh ha. It was 45.53 lakh ha last year. Urad area is lower by 1.87% to 38.14 lakh ha. It was 38.86 lakh ha last year. Moong area is lower by 9.55% to 30.77 lakh ha. It was 34.02 lakh ha last year. However, area under Kulthi and other pulses is up by 4.12 & 859% to 0.58 & 17.23 lakh ha respectively.
- **Despite demand of higher import duty on Masur govt has not taken any decision on import duty.** However, govt is aware of higher volume of import and may analyze the overall scenario before taking any decision on imposing higher duty. There is a continuous flow of masur from Canada and Australia and it is affecting price in domestic market.
- **Despite some improvements seen in futures chana market is unlikely to sustain at higher level.** Demand from bulk users has improved taking clue from firm futures. Once Nafed starts selling chana in bulk volume it would come down again. Market is well aware of ample availability of chana in central pool as well as in private hands. If we keep aside reserve stock of 1278453 MT, still there is a availability of 1232136 MT with Nafed for sale. In Delhi market chana is being traded at Rs 4350-4350. If demand improves and Nafed decides not to sell stock, it may move to 4400-4500 maximum. Liquidity crunch too is restricting normal trade. So it is better to sell Chana at every hike of Rs 75-100..
- **Moong crop in Merta, Shekhawati, Chhoti Khatu and Jayal line of Rajasthan is in excellent condition and is** expected to hit market by third week of Sep. Higher price during sowing season encouraged farmers to grow more

moong this year. However, old moong price would rule higher until moong from Rajasthan hits the market. There is report of some loss in Kishanganj line. Overall, crop size is larger in Rajasthan.

- **In Maharashtra moong crop in Akola and Khamgaon line is in very good condition. Summer crop in UP, Bihar, Jharkhand and MP was lower in size. So moong price increased from normal expected level. Now stockiest have resorted to release light quality stock at Rs 5500-5700. Mills are buying moong at this level. It is good time for traders and stockiest to start offloading moong now.**

International Market Update:

- **Pulses & edible beans production in China is expected to decline by 10% this year to 44 lakh MT due to lower seeded area and unfavorable weather conditions. Lower prevailing price in local market discouraged farmers to reduce area year on year basis. China's annual pulse consumption per-capita is roughly 1.7 kilograms. Pulses demand in China is increasing due to health awareness and rising income.**
- **Lentils export from Turkey posted smart gains in July in comparison to June-2019 as per available statistics from Turkish Statistical Institute. Turkey exported 13,053 lentils in July against 8608 MT in June. Turkey has exported total 142199 MT lentils during the calendar year so far. It is down by 7% from last year till date. Sudan brought 4406 MT, Saudi Arabia -1144 MT and Iraq -999 MT in July-2019.**
- **Pea export from Russia decreased to 28836 MT in June against 56283 MT in May-2019. Total export during calendar year was registered at 2.04 lakh MT, down by 62% from last year. Turkey purchased 8,571 Pakistan MT, 8,554 MT, followed by India at 3,107 MT in June.**
- **Chickpea & dry edible bean harvest in US has started and around 12% is said to be complete now as per NASS updates. It was 6% last week ending 13th Sep-2019. Idaho completes 37% of the crop is now in the bin, versus 65% last year, while Montana has harvested 58%, down from 76% last year and Oregon reports 45% harvested, compared to 75% last year. In North Dakota only 13% harvest is said to be complete against 72% last year till date. In other states it is in initial stages.**
- **As per the latest updates by Australia Bureau of Statistics chickpeas export from Australia declined in July to 16632 MT against 25805 MT in June-2019. It is almost 36% down from June. Total export till July was recorded at 275,049 MT, massively down from 671,642 during the last marketing year. Pakistan, B, desh and UAE purchased 4,474 MT, 4,403 MT & 2,455 MT. respectively in July-2019.**

Previous Update:

- **Dry peas production in Canada is expected to increase by 20 % to 43 lakh MT in comparison to last year. The reason is attributed to higher area coverage in 2019-20 crop year. The major growing state is Saskatchewan accounting 50 % in total production. Alberta is 2nd major growing state accounting 45% of total production. As carry in stock is lower supply side is expected to increase by only 55 tp 4.5 MMT. Export may decrease to 31 lakh MT. Top buyers might be China, Bangladesh and the US. Carry in stock would increase. Average price is expected to be similar as 2018-19.**
- **Chickpeas export from Australia increased by 10 % to 27251 MT in June against May when it was registered at 24719 MT as per Australia Bureau of Statistics. Thus total export in current MY reached to 259,863 MT (till June) against 646,411 MT in corresponding period last year. B, desh brought 8,463 MT in June, followed by Pakistan at 8,064 MT. UAE purchased 4,991 MT in June.**
- **Dry pea stock in US is likely to increase by 0.02 % to 203983 MT in 2019. It was 199628 MT in 2018. Even lentils stock is expected to be higher by 81% to 144,425 MT in 2019 against 79833 MT in 2018. All chickpeas stock is 294% higher to 157262 MT against 39916 MT in 2018. Out of total small chickpeas stock increase from 12156 to 43318 MT in 2019. It is higher by 256% from last year. Large chickpeas stock is expected to increase by 310% to 113,943 MT in 2019.**
- **Lentils production in Canada is likely to increase by 5.16 % to 22 lakh MT in 2019-20 against 20.92 lakh MT last year. However, total supply would decrease by 3.14 % to 28.95 lakh MT due to higher domestic use pegged at**

almost 6 lakh MT. Carryout would decrease from 7 to 5 lakh MT in 2019-20. Export has been pegged at 18 lakh MT, similar as last year. Average yearly lentil price is expected to hover in the range of \$430 to 460 per MT.

- **Chickpea area is expected to fall in Canada from 176 to 133 thousand Ha in 2019-20** while production is expected to fall from 3.11 to 2.30 lakh MT. Supply is forecast to increase due to higher carry-in stocks, but softened by lower imports and production. The average price is forecast to fall due to larger world supply, with the expectation of an average grade distribution in 2019-20 as per Canada Stats.

Weekly Outlook: -Pulses are likely to trade steady to slightly weak.

Kharif Sowing as 13-09-2019:

Kharif Pulses Progressive Sowing Area Coverage Till 13.09.2019 (Area in Lakh Ha)
