

Pulses Domestic Fundamentals:

Today's Update:

- **High level officials of DGFT met with the representative of pulses trades and importers** yesterday and requested officials to ease import curbs and allow additional one lakh MT urad import due to recent loss of kharif urad. Trade bodies requested to extend the deadline for import of pulses for next two months till 31st Dec. However, officials would send suggestions and requests to concerned ministry. No immediate action has been taken. DGFT would take decision after finding green signal from ministry and it will take time. Extension in deadline for tur import is necessary as 4 lakh MT import is not possible till Oct end.
- **Buyers in Maharashtra & South India are active in tur buying.** Arrival is decreasing in all markets amid uncertainty over import of Arusha tur from Tanzania. festive demand may encourage demand for dal in coming weeks. All these developments may push up tur price by Rs100-200 from current level. In Gulberga market tur is being traded at Rs 5550-5600 while in Mumbai lemon tur is being traded at Rs 5450 per qtl. In Chennai market it was quoted at Rs 5650-5700.
- **Urad millers and stockiest are active buyers in major producing regions and it is supporting cash urad price in domestic markets.** Area loss over one lakh ha and 30 % dis-colored grain remain supportive for urad cash market. Prices may move up further by 200 to 300 from current level. Myanmar is offering urad FAQ at \$570 per MT. So there is import parity. The difference between domestic and imported price is over Rs1100 per qtl. At port total costing of urad is Rs 4300 per qtl. As import is conditional, so any bulk volume is unlikely in Oct. Import cap is at 1.5 lakh MT. In Chennai market urad FAQ is being traded at Rs5600. It may cross MSP soon. SQ traded at Rs 6600-6650. Procurement drive at MSP too would support market to rule at higher level.

Previous Update:

- **Chana continued to improve in cash market taking clue from firm futures and improved offtake.** Seed demand, restricted sale by Nafed and private trades, unwillingness to sell at current level remain supportive to cash chana market. Delhi chana was traded at Rs 4400-4450. It may cross MSP soon if current demand continues. However, market is unlikely to move up beyond MSP as there is sufficient stock in central pool.
- **This year moong area is almost 9 % lower than last year as per latest sowing updates.** Farmers have planted 31.16 lakh ha against 34.25 lakh ha last year. Crop loss scenario seems rather serious now with current showers of normal to heavy rains in states like Raj, Karnataka, M.P., Mah, Guj and U.P. The major kharif moong growing states are Rajasthan (18.31 lakh ha against 19.02 last year), Maharashtra (3.28 against 4.18 lakh ha last year) Guj (0.93 against 0.63 lakh ha last year), Odisha (1.64 against 1.74 lakh ha last year) Telangana (0.71 against 0.73 lakh ha), MP (3.11 against 4.11 lakh ha). Around one lakh ha is said to be washed out by flooding while 15 % crop in these states are said to be dis-colored due to continuous rains. It may support moong price in coming weeks. Kharif moong production is bound to decline by 1 lakh MT while shortage of quality moong might be felt in Nov -Dec. Arrivals are not increasing as expected at this point of time.
- **Despite demand of higher import duty on Masur govt has not taken any decision on import duty.** However, govt is aware of higher volume of import and may analyze the overall scenario before taking any decision on imposing higher duty. There is a continuous flow of masur from Canada and Australia and it is affecting price in domestic market.

International Market Update:

- **This year production of green lentils has not been upto the mark. There is a shortage of quality crop in comparison to last year. Prices of no1 and no.2 have been moving up and uptrend is likely to continue. Last year Canada had harvested 28% no -1 lentils,45% no-2 and 22% no-3 and extra -3.This year percentage of no -1 lentils is 16%, No-3 is 55% and the rest is others. As no -1 is lower than expectation, prices may rule firm in coming weeks too.**

- **Dry peas production in Canada is expected to increase by 20 % to 43 lakh MT in comparison to last year. The reason is attributed to higher area coverage in 2019-20 cropyear. The major growing state is Saskatchewan accounting 50 % in total production. Alberta is 2nd major growing state accounting 45% of total production. As carry in stock is lower supply side is expected to increase by only 55 tp 4.5 MMT .Export may decrease to 31 lakh MT. Top buyers might be China, Bangladesh and the US.Carry in stock would increase. Average price is expected to be similar as 2018-19.**

However, total supply would decrease by 3.14 % to 28.95 lakh MT due to higher domestic use pegged at almost 6 lakh MT . Carryout would decrease from 7 to 5 lakh MT in 2019-20. Export has been pegged at 18 lakh MT,similar as last year. Average yearly lentil price is expected to hover in the range of \$430 to 460 per MT.**
- **Chickpea area is expected to fall in Canada from 176 to 133 thousand Ha in 2019-20 while production is expected to fall from 3.11to 2.30 lakh MT. Supply is forecast to increase due to higher carry-in stocks, but softened by lower imports and production.
