

Pulses Domestic Fundamentals:

Today's Update:

- ***Restricted sale of chana by Nafed have eased pressure on chana price. Nafed still have 1.7 MMT stock. Nafed would invite tender once in a week on Thursday now. Nafed may prefer to sell chana near 4400. So, any downward trend in chana is unlikely at this point of time. Apart from this demand for besan has improved and dal millers have shown interests in buying at current level. Arrival in markets have already declined while stockiest are waiting for further improvement. Even NCDEX is trading firm. Demand for seed too is visible in the market. Nafed may decide to sell chana in bulk volume from mid-November. It may restrict uptrend in Chana market. As Nafed is on driver's seat, its selling decision would remain crucial for chana price in Nov, Dec and Jan-2021. Chana in Delhi market is being traded at Rs4475-4550. It may move up to Rs 4650-4700.***
- ***Food & consumer affairs ministry has convened a meeting with commerce ministry and reviewed availability of essential commodities and its prices. A proposal has been tabled regarding extension of time limit from 31 Oct to 30th Nov for pulses import. The proposal is likely to be accepted. Besides, govt. has close eye on price and stock in private hands. In case prices continue to increase, action might be taken to ease market.***
- ***As on 10th Oct-2019 Nafed has 31.26 lakh MT pulses stock. Out of total share of chana is 17.34 lakh MT, tur 8.38, urad-2.31, moong -1.16 and masur-2.07 lakh MT.***
- ***Moong too may continue to trade firm as Procurement by Nafed commences in Tamil Nadu, Telangana & Maharashtra. It is likely to begin soon in M.P., Rajasthan and Gujarat. It has procured 25.75 MT in Tamil Nadu and 3285 MT in Telangana. Nafed sold 470 MT moong in Rajasthan at Rs 6401 per qtl. It was sold in Gujarat at Rs 6285 per qtl. Nafed still has 95989.34 MT moong in its stock. Out of it rabi share is 18281.14 MT. As procurement is on moong may continue to trade firm despite new arrival in Rajasthan is yet to pick up. There is a short supply of quality moong. So stockiest should buy when it comes down by Rs 200-300 on arrival pressure. Poor quality of moong coming into mandis may check one way uptrend in coming weeks. Farmers are selling moong to private trades due to quality issue and set parameters for govt.'s purchase. Overall trend in moong market seems firm until procurements come to an end. In Jaipur market moong is being traded at Rs 6000-6200.***

Previous Update:

- ***Tur coming into various markets is said to be of poor quality and it is affecting tur cash price despite slower pace of arrivals. As quality is poor, trade in Maharashtra and Karnataka markets is taking place at lower level. Arrival in Latur market has decreased to 150 bags only. Stock in private hands is coming down. Besides, demand for tur dal is sluggish and Nafed too is planning to sell it as new crop is only two months away. Market participants are of the view that declining stock may push up tur price to a certain extent before new arrival. As crop condition is good, production size may increase further. Import flow continues and it would continue to restrict tur price. In near to medium term tur may trade 5400-5800 in Gulberga market. Myanmar is quoting lemon tur at \$635 right now. So any spike in tur market is unlikely.***
- ***Recent loss and strong demand for stocking purpose amid sellers unwillingness to sell have lent support to cash urad market. Virtually, sellers have disappeared from market and farmers too have restricted selling. Besides, import flow is lower. So there is a short supply like situation in the market and it is pushing up cash market continuously. The largest producing state like MP have lost 15-20% crop while 30% quality of crop is of inferior quality. Arrival is 90 % lower than last year. Even in other states like Raj, U.P & MH quality of crop is average. All these factors have lent massive support to cash urad market. If stockiest/farmers continue to restrict sale, urad may move up further by Rs300-400. However, at current level stockiest may prefer to release stock by end Oct as around 75-80 thousand MT urad is expected to hit Indian ports by the end of this month, if govt. allows additional 1 to 1.5 lakh MT, as has been demanded by dal mills associations/traders, it may decrease, otherwise it may move further up***

International Market Update:

- ***This year production of green lentils has not been upto the mark. There is a shortage of quality crop in comparison to last year. Prices of no1 and no.2 have been moving up and uptrend is likely to continue. Last year Canada had harvested 28% no -1 lentils,45% no-2 and 22% no-3 and extra -3.This year percentage of no -1 lentils is 16%, No-3 is 55% and the rest is others. - ***Dry peas production in Canada is expected to increase by 20 % to 43 lakh MT in comparison to last year. The reason is attributed to higher area coverage in 2019-20 crop year. The major growing state is Saskatchewan accounting 50 % in total production. Alberta is 2nd major growing state accounting 45% of total production. As carry in stock is lower supply side is expected to increase by only 55 tp 4.5 MMT .Export may decrease to 31 lakh MT. However, total supply would decrease by 3.14 % to 28.95 lakh MT due to higher domestic use pegged at almost 6 lakh MT . Carryout would decrease from 7 to 5 lakh MT in 2019-.20. Export has been pegged at 18 lakh MT,similar as last year. Average yearly lentil price is expected to hover in the range of \$430 to 460 per MT.***
- ***Chickpea area is expected to fall in Canada from 176 to 133 thousand Ha in 2019-20 while production is expected to fall from 3.11 to 2.30 lakh MT. Supply is forecast to increase due to higher carry-in stocks, but softened by lower***
