

Pulses Domestic Fundamentals:

Today's Update:

- **Continuous rains in Akola region have started affecting tur crop. Besides Akola, some other parts of Maharashtra** is receiving unseasonal rains and farmers are worried for their standing crops, almost approaching at maturity stage. Recent rains have delayed chana sowing at least by two weeks. Under prevailing condition chana and tur crop may get support in cash market. Tur price have moved up by Rs100 in Maharashtra. There is no good news from AP and Tamil Nadu. If heavy rains occur in these states, loss for tur crop would increase while chana sowing would be delayed for 15days. In Sholapur market tur moved up to Rs 5600-5650. In Gulberga market tur is being traded at Rs5500-5600. Myanmar is offering tur at Rs 4805(\$645 per MT). Old crop is being offered at Rs 4483(\$600 per MT).
- **Myanmar offers Urad FAQ at \$700 and SQ at \$800 per MT. It has moved up by \$30 in last few days.** In INR term it comes to Rs 5198 & Rs 5914 per MT. New lemon tur is being offered at \$645 and old at \$600 per MT. Moong Padi Shwewa was quoted at \$975 per MT while Pakaku was offered at \$830 per MT Anya Shweva was offered at \$840 per MT. Chana kabuli was offered at \$650 per MT.
- **An important meeting of Cabinet Committee on pulses may decide import quantity of pulses,** increasing the quantity of urad and extension of time line for pulses import today. Govt may increase urad import quantity from 1.5 lakh MT to 2.5 lakh MT. Import time line might be increased to 30 Nov-2019, previously it was 31st Oct.

Previous Update:

- **Nafed has total 3007514.2 MT pulses stock in its hands as on 21, Oct-2019. Out of total around 17.31 lakh MT is chana,** including 1133230.39 MT from 2018 & 597919.76 MT from 2019. Total moong stock is 102080.55 MT. It includes 4739.66 from kharif -2017, 831 MT from rabi 2017, 74679.7 MT from kharif 2018 & 17029.79 MT from rabi -201. It is 4800.4 MT from kharif -2019. Total urad stock is 219707.08 MT. It includes 7317.59 MT from kharif-2017, 202563.54 from kharif-2018, 9819.1 MT from rabi-2019 & 6.85 MT from kharif -2019. Total tur stock as on 21st Oct-2019 is 854339.39 MT. Out of total 578675.99 MT from kharif-2017 & 275663.4 MT from kharif -2018. Total masur stock is 100237 MT. Out of this 44010.48 MT is from rabi-2018 & 56226.52 MT is from rabi-2019. So stock position seems at comfortable level for tur and Chana only. Other pulses may move up further if rabi sowing gets affected. It would push up price.
- **Restricted sale of chana by Nafed have eased pressure on chana price. Nafed still have 1.7 MMT stock.** Nafed would invite tender once in a week on Thursday now. Nafed may prefer to sell chana near 4400. So, any downward trend in chana is unlikely at this point of time. Apart from this demand for besan has improved and dal millers have shown interests in buying at current level. Arrival in markets have already declined while stockiest are waiting for further improvement. Even NCDEX is trading firm. Demand for seed too is visible in the market. Nafed may decide to sell chana in bulk volume from mid -November. It may restrict uptrend in Chana market. As Nafed is on driver's seat, its selling decision would remain crucial for chana price in Nov, Dec and Jan-2021. Chana in Delhi market is being traded at Rs4475-4550. It may move up to Rs 4650-4700.
- **Moong too may continue to trade firm as Procurement by Nafed commences in Tamil Nadu, Telangana & Maharashtra.** It is likely to begin soon in M.P., Rajasthan and Gujarat. It has procured 25.75 MT in Tamil Nadu and 3285 MT in Telangana. Nafed sold 470 MT moong in Rajasthan at Rs 6401 per qtl. It was sold in Gujarat at Rs 6285 per qtl. Nafed still has 95989.34 MT moong in its stock. Out of it rabi share is 18281.14 MT. As procurement is on moong may continue to trade firm despite new arrival in Rajasthan is yet to pick up. There is a short supply of quality moong. So stockiest should buy when it comes down by Rs 200-300 on arrival pressure. Poor quality of moong coming into mandis may check one way uptrend in coming weeks. Farmers are selling moong to private trades due to quality issue and set parameters for govt.'s purchase. Overall trend in moong market seems firm until procurements come to an end. In Jaipur market moong is being traded at Rs 6000-6200.
- **Tur coming into various markets is said to be of poor quality and it is affecting tur cash price** despite slower pace of arrivals. As quality is poor, trade in Maharashtra and Karnataka markets is taking place at lower level. Arrival

in Latur market has decreased to 150 bags only. Stock in private hands is coming down. Besides, demand for tur dal is sluggish and Nafed too is planning to sell it as new crop is only two months away. Market participants are of the view that declining stock may push up tur price to a certain extent before new arrival. As crop condition is good, production size may increase further. Import flow continues and it would continue to restrict tur price. In near to medium term tur may trade 5400-5800 in Gulberga market. Myanmar is quoting lemon tur at \$635 right now. So any spike in tur market is unlikely.

The latest weather report suggests that present condition may continue.
- **Saskatchewan is seeing the slowest harvest in last four decades. Until 14th October** around 94 percent of the crop has been harvested. - **Dry peas production in Canada is expected to increase by 20 % to 43 lakh MT in** comparison to last year. The reason is attributed to higher area coverage in 2019-20 crop year. The major growing state is Saskatchewan accounting 50 % in total production. Alberta is 2nd major growing state accounting 45% of total production. As carry in stock is lower supply side is expected to increase by only 55 tp 4.5 MMT. Export may decrease to 31 lakh

MT. Top buyers might be China, Bangladesh and the US. Carry in stock would increase. Average price is expected to be similar as 2018-19.
