

Pulses Domestic Fundamentals:

Today's Update:

- *As per trade Sources, India has imported 91835.21 MT of Lentil at an average CiF of \$446.93 per tonnes during the month of October-2019. Of the total quantity around 52426.94 tonnes has been purchased from Canada and the remaining quantity from Australia, Turkey and United States. Imports are expected to remain on higher side in upcoming months as well.*

Previous Update:

- *Rabi sowing area is lagging behind this year due to unseasonal rains. The govt data released on 8th Nov shows that farmers have covered only 95.35 lakh ha against 112.24 lakh ha last year. This means that it is around 17 lakh ha less than last year. Farmers have covered 19.82 lakh ha under chana against 26.63 lakh ha last year. Even masur area is lagging behind and farmers have covered only 1.91 lakh ha against 3.46 lakh ha last year till date. However, urad area is slightly lower this year at 1.12lakh ha. Even pea area is lower at 1.42 lakh ha against 2.67 lakh ha last year. Late start of sowing may impact over all area of urad and pea (matar) this year.*
- *No extension for urad import time line has been given and major loss in Sep due to rains may remain supportive to cash urad market. Govt /procurement agencies would not be able to procure as prices are ruling much higher than MSP of Rs5700 for the season. Even quota for import has not been increased and it is still at 1.5 lakh MT for the whole year. As demand at higher level has decreased, price have decreased almost by Rs 1000 in last two days. However, further downward trend is unlikely as there is a short supply in cash market. Once demand starts improving it may move up again. Right now in Chennai market urad is being traded at Rs 8100-8200. It may move up by Rs500 again.*
- *Tur market is expected to improve once new imported crop sold out. At least one lakh MT is at various ports and 50,000MT is expected to reach port before 15th Nov-2019. After this no import is possible. Besides, procurement would start from 15th Dec and it would help market to move up again. Tur may touch 5800-6200 in Dec end.*
- *Masur imported from Canada and US from Tuticorin was found mixed with foreign matters. The custom officials from port declined to give clearance on the above ground. After request to Agriculture ministry for clearance by pulses import association it has issued order for clearance with some condition only for this consignment. This relaxation would be applicable on purchase bill till 24, October-2019 or before it. Some condition would be applicable too on it. These consignments have to go through cleaning at warehouse suggested by customs officials. It would be under official surveillance. It would be released after full satisfaction of the official. The cost incurred in this process would be borne by importers.*
- *Punters and stockiest are active in cash urad market and sellers/importers have restricted selling sensing uptrend to continue due to heavy loss of kharif urad. Higher price may encourage govt. to increase import quota from 1.5 to 2.5 lakh MT soon. There is no seller of urad at ports. If quota is not increased and bulk selling from central pool is not started, urad may move further by Rs 500 per qtl more. Sensing uptrend in urad tur stockiest too have started restricting sale. Tur price too have increased by Rs 800-1000 in last two days. It may move further up by Rs500-700 more.*
- *Myanmar offers Urad FAQ at \$700 and SQ at \$800 per MT. It has moved up by \$30 in last few days. In INR term it comes to Rs 5198 & Rs 5914 per MT. New lemon tur is being offered at \$645 and old at \$600 per MT. Moong Padi Shwewa was quoted at \$975 per MT while Pakaku was offered at \$830 per MT. Anya Shweva was offered at \$840 per MT. Chana kabuli was offered at \$650 per MT.*

International Market Update:

- **Canada, Australia and the USA have raised objections against India over ban on pulses import in WTO.** Actually India has restricted pulses import to support domestic price. They have questioned export import policies and higher quantity of procurement at MSP. India consumes 24 MMT pulses a year while production has crossed 25 MMT as per Govt. data. In last two years import decreased from 6 MMT to 1.5 to 2MMT a year. So import restriction is essential to provide better price for farmers. As moong and urad crops have been damaged in kharif season, shortfall can be compensated by increasing import quantity. There is a danger of losing case in WTO.
- **China imported 222739 MT peas in August, up by 144% from July when it was recorded at 91,214 MT** as per General Customs Administration of China. From Jan to Aug-2019 China imported total 10.85 lakh MT pea against 12.67 lakh MT last year till Aug-2018. In August Canada exported 2.18 lakh MT followed by France and UK.
- **Canada pea production is likely to be 30 % higher than last year. The latest estimate has pegged it at 47 lakh MT.** Even lentil production is likely to be higher by 20 % to 25 lakh MT. Chickpeas production would be up by 15% to 2.63 lakh MT this year. Dry beans production has been pegged at 3.56 lakh MT, up by 45 from last year.
- **Dry peas production has been pegged at 856163 MT, lentil production at 2.47 lakh MT, total chickpeas production has been pegged at 1.79 lakh MT.** Total pulses production has been pegged at 12.82 lakh MT this year against 15 lakh MT last year. Due to rains generated issues yield has been down this year for all pulses in US.
- **Pea export from Russia decreased to 28836 MT in June against 56283 MT in May-2019.** Total export during calendar year was registered at 2.04 lakh MT, down by 62% from last year. Turkey purchased 8,571 Pakistan MT, 8,554 MT, followed by India at 3,107 MT in June.
- **As per the latest updates by Australia Bureau of Statistics chickpeas export from Australia declined in July to 16632 MT against 25805 MT in June-2019.** It is almost 36% down from June. Total export till July was recorded at 275,049 MT, massively down from 671,642 during the last marketing year. Pakistan, B, desh and UAE purchased 4,474 MT, 4,403 MT & 2,455 MT. respectively in July-2019.
- **Dry pea production in Canada is expected to increase by 20 % to 43 lakh MT in comparison to last year.** The reason is attributed to higher area coverage in 2019-20 crop year. The major growing state is Saskatchewan accounting 50 % in total production. Alberta is 2nd major growing state accounting 45% of total production. As carry in stock is lower supply side is expected to increase by only 55 tp 4.5 MMT. Export may decrease to 31 lakh MT. Top buyers might be China, Bangladesh and the US. Carry in stock would increase. Average price is expected to be similar as 2018-19.
- **Chickpeas export from Australia increased by 10 % to 27251 MT in June against May when it was registered at 24719 MT** as per Australia Bureau of Statistics. Thus total export in current MY reached to 259,863 MT (till June) against 646,411 MT in corresponding period last year. B, desh brought 8,463 MT in June followed by Pakistan at 8,064 MT. UAE purchased 4,991 MT in June.
- **Dry pea stock in US is likely to increase by 0.02 % to 203983 MT in 2019.** It was 199628 MT in 2018. Even lentils stock is expected to be higher by 81% to 144,425 MT in 2019 against 79833 MT in 2018. All chickpeas stock is 294% higher to 157262 MT against 39916 MT in 2018. Out of total small chickpeas stock increase from 12156 to 43318 MT in 2019. It is higher by 256% from last year. Large chickpeas stock is expected to increase by 310% to 113,943 MT in 2019.
- **Lentils production in Canada is likely to increase by 5.16 % to 22 lakh MT in 2019-20** against 20.92 lakh MT last year. However, total supply would decrease by 3.14 % to 28.95 lakh MT due to higher domestic use pegged at almost 6 lakh MT. Carryout would decrease from 7 to 5 lakh MT in 2019-20. Export has been pegged at 18 lakh MT, similar as last year. Average yearly lentil price is expected to hover in the range of \$430 to 460 per MT.
- **Chickpea area is expected to fall in Canada from 176 to 133 thousand Ha in 2019-20** while production is expected to fall from 3.11 to 2.30 lakh MT. Supply is forecast to increase due to higher carry-in stocks, but softened by lower imports and production. The average price is forecast to fall due to larger world supply, with the expectation of an average grade distribution in 2019-20 as per Canada Stats.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm.

Kharif Sowing as 04-10-2019:

Kharif Pulses Progressive Sowing Area Coverage Till 04.10.2019 (Area in Lakh Ha)
