

Pulses Domestic Fundamentals:

Today's Update:

- **Commerce ministry of Myanmar has changed exim policy. All importers and exporters have to get registered till 31st Dec-2019.** With this new changes importers and exporters would get new 9 digit digital taxation identification no from 5th Jan-2020. Without new registration no import and export would not be possible. It may delay shipment to some extent.
- **Improved sowing status and good prevailing weather condition for chana crop** remain restrictive for any major spike. New crops hardly 2.5 months away while there is ample stock in central pool. Stock in private hands is decreasing now. Arrival in major markets like Rajasthan and Madhya Pradesh too have decreased. With restriction on peas import prices of chana improved and traded at Rs 4500-4600 per qtl. However, uptrend could not sustain and it decreased once again. In normal condition chana is likely to trade steady in the range of Rs 4450-4650. Weather condition in Jan and Feb would be crucial. If it disturbs standing crop, price may cross new MSP. Right now supply and demand side is normal. Stake holders should continue to release stock at every hike of Rs 75-100.
- **With changed status from the free to restricted category and hefty levy imposed on peas its import has halted completely now.** The commerce ministry issued a separate harmonized system (HS code) for all peas (including yellow, green, and kaspas) and changed its status in the third week of Dec. It has affected importers badly whose consignment is on port or in way to India. Now import deals are not taking place. The fixed quota of 1.5 lakh MT has already been completed. Actually govt is trying to increase consumption of chana as it is abundantly available in domestic market. Importers have requested govt to allow green peas import as prices of green peas have increased to Rs 8500-8800 per qtl from 5600 per qtl a week ago. Against the quota of 1.5 lakh MT over 5.5 lakh MT has been imported so far. Under prevailing condition govt. is unlikely to allow green peas import. New crop in local market started hitting mandis now.
- **Steady to slightly firm trend may prevail in cash moong market.** Arrival is decreasing while procurement is on. Millers are engaged in need based buying. Demand at higher level is weak at this point of time. However, quality crop would continue to rule higher as availability is lower. In Jaipur market moong chamki is being traded at Rs 6850-6950. New rabi crop would be available in March. If prices of other pulses move up, it may support moong market to a certain extent. Moong in cash market may continue to trade at Rs 6500-7000 in various markets, depending on quality.
- **Indian farmers have covered 140.13 lakh ha, up by 2.42% from last year (136.82 lakh ha).** Farmers have covered 5.64 % higher area under chana to 94.96 lakh ha against 89.89 lakh ha. Last year as on 27th Dec-2019. Lentils area is down by 4.53 % to 15.18 lakh ha. Farmers had covered 15.90 lakh ha last year. Peas area has been reported at 9.08 lakh ha against 8.81 lakh ha. Farmers have covered 5.70 lakh ha under urad, down by 2.23 % from last year. Moong area is running down by 16.67% to 2.55 lakh ha. Normal area under moong is 10.10 lakh ha. Kulthi, Lythyrus and other rabi pulses area too is running down by 2.67, 5.57 % and 6.31% so far. Only chana and peas area has been reported up. Overall rabi area is up so far.

Previous Update:

- **Lentils cash market traded up taking clue from firm international market and 7.26% lower area coverage in local market.** Farmers in India have covered 11.49 lakh ha against 15.62 lakh ha last year so far. With improving demand in domestic market and restricted selling by local stockiest have started pushing up cash market price. It may move further towards MSP level as new crop is still two months away from now. Even importers have started quoting higher price at ports. Govt. has not changed its import policy and import would continue at 30 % (applicable 33%) import duty. As Bangladesh, Pakistan and Nepal are buying aggressively amid active buying by Indian importers, lentils price in global market is bound to go up. It would lend support to domestic market too.

- **Central govt has allocated 8.47 lakh MT pulses on subsidized rates to various states.** Under this allocation 3.2lakhMT tur,2 lakh MT urad,1.2 lakh MT chana,1.5 lakh MT mung and 0.57 lakh MT masur have been offered. It may have a cooling impact of cash pulses market.

International Market Update:

- **Peas export from France increased to 25750 MT in Oct-2019.**It is higher by 3550 MT from Sep. France had exported 22200 MT in Sept-2019.Export increased despite India being out of global market due to quantity restriction.
- **Demand for peas improved from China. It has helped peas price to improve further.** It would push up import parity in India too. Peas production in Canada declined during last two years. However, This year production is up by 18% from last year to 42 lakh MT. Peas import volume in China is expected to cross 18 lakh MT this season. Cattle feed industry is using pea in bulk volume while in India is used for human consumption.
- **Turkey import volume for lentils from Canada improved in the month of Oct-2019.**It has imported 25211 MT from Canada, 20440 Mt from Kazakhstan and 1627 MT from Russia. Total import by Turkey in Oct was registered at 48783 MT. Total import for Turkey touched at 274,328 MT in this calendar year. It is down by 7% from last year till Oct-2019.
- **Despite lower export volume for lentils from Canada in Oct overall export volume from Canada** increased by 14% to 518,626 MYT during ongoing MY.In Oct Canada exported total 131,325 MT, down from 272,705 MT in Sep. India purchased 32240 MT from Canada in Oct besides other sources. For Nov Indian import volume is likely to increase as prices in domestic market have started increasing.
- **As per Canadian Grain Commission Canada has exported 25,500 MT lentils during 18th to 24th Nov-2019.**With this total export quantity in the season to date reached at 247,900 MT against 140,600 MT last season till Nov-2018.Out of total export No-2 Canada lentils contributed 85% while 15% were of other grades. Farmers have delivered 40,600 MT last week. Season to date deliveries now total 534,400 MT, compared to 504,100 during the same period last season.
- **Improved export movement helped to continued firm tone this week too despite higher supply** from farmers end and higher stock too from last year. till 18th Nov-2019, growers had delivered 32% of all peas available on their farms to the bulk handling system, compared to 29% by the same time last year as per market source.
- **Canada pea production is likely to be 30 % higher than last year.** The latest estimate has pegged it at 47 lakh MT. Even lentil production is likely to be higher by 20 % to 25 lakh MT. Chickpeas production would be up by 15% to 2.63 lakh MT this year Dry beans production has been pegged at 3.56 lakh MT, up by 45 from last year.
- **Dry peas production has been pegged at 856163 MT, lentil production at 2.47 lakh MT, total chickpeas production** has been pegged at 1.79 lakh MT. Total pulses production has been pegged at 12.82 lakh MT this year against 15 lakh MT last year. Due to rains generated issues yield has been down this year for all pulses in US.
- **Dry pea production in Canada is expected to increase by 20 % to 43 lakh MT in comparison to last year.** The reason is attributed to higher area coverage in 2019-20 crop year. The major growing state is Saskatchewan accounting 50 % in total production. Alberta is 2nd major growing state accounting 45% of total production. As carry in stock is lower supply side is expected to increase by only 55 tp 4.5 MMT .Export may decrease to 31 lakh MT. Top buyers might be China, Bangladesh and the US. Carry in stock would increase. Average price is expected to be similar as 2018-19.
- **Chickpeas export from Australia increased by 10 % to 27251 MT in June against May** when it was registered at 24719 MT as per Australia Bureau of Statistics. Thus total export in current MY reached to 259,863 MT (till June) against 646,411 MT in corresponding period last year. B, desh brought 8,463 MT in June ,followed by Pakistan at 8,064 MT. UAE purchased 4,991 MT in June.
- **Dry pea stock in US is likely to increase by 0.02 % tp 203983 MT in 2019.**It was 199628 MT in 2018.Even lentils stock is expected to be higher by 81% to 144,425 MT in 2019 against 79833 MT in 2018.All chickpeas stock is 294%

higher to 157262 MT against 39916 MT in 2018. Out of total small chickpeas stock increase from 12156 to 43318 MT in 2019. It is higher by 256% from last year. Large chickpeas stock is expected to increase by 310% to 113,943 MT in 2019.

- **Lentils production in Canada is likely to increase by 5.16 % to 22 lakh MT in 2019-20** against 20.92 lakh MT last year. However, total supply would decrease by 3.14 % to 28.95 lakh MT due to higher domestic use pegged at almost 6 lakh MT. Carryout would decrease from 7 to 5 lakh MT in 2019-20. Export has been pegged at 18 lakh MT, similar as last year. Average yearly lentil price is expected to hover in the range of \$430 to 460 per MT.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm.

Rabi Sowing as 27-12-2019:

Rabi Pulses Progressive Sowing Area Coverage Till 27.12.2019 (Area in Lakh Ha)
