

Pulses Domestic Fundamentals:

Today's Update:

- **All is not good for kabuli chana in India at production front. Farmers have decreased** area under kabuli chana this year and used 10 % of kabuli area for chana sowing. Bengal garm production may touch record level, if weather remains favorable in Feb and March. Farmers shifted area from Kabuli to chana because of lower difference of price. Under prevailing condition chana production, including kabuli, may cross 100 lakh MT. New crop is expected to hit south Indian markets from mid Feb. Global chickpeas market traded range bound and supply side is ample. So any major improvement is unlikely in the near future. In global market there is excessive supply of small and medium size kabuli chana. on ground level kabuli chana area is slightly down in India as per market sources.
- **Farmer's registration for tur purchase on MSP in Karnataka started today. Purchase** is likely to commence from 1st Feb-2020 at 6100 per qtl. including bonus of Rs 300 per qtl. If govt. starts procuring tur from first week of Feb, arrival in open market may decline and it may support cash market at current level. Recovery is expected to some extent. As of now supply side is ample and arrival is expected to increase in other states too. Govt has planned to procure around 5.5 lakh MT tur this year on all India basis. With opening of weather moisture level in new tur would decrease.
- **Indian millers have demanded from govt. to allow additional two lakh MT moong** import quota to check the spiraling prices in the market. As per demand they want additional quota in current MY. A letter in this regard has been written to Ram Vilas Paswan.. Despite 1.5 lakh MT moong import quota, availability of moong is lower in open market and it would continue to trade firm in coming weeks. Moong is being traded at Rs 7600-7700 in Jaipur market .In south India moong is being traded at Rs 7300-7400. It may move up to Rs 8000 soon.

Previous Update:

- **Considering the demand of The Indian Pulses and Grains Association for removal of quantitative** curbs on urad, the govt. may extend dead line for urad imports till June instead of March-2020. Urad import quota has already been raised from 1.5 lakh MT to 4 lakh MT and it can be imported only by millers /refiners. In current MY around 2 lakh MT urad has been imported, till Dec. for more 2 lakh MT import, time frame can be extended till June-2020. This year urad production is down by 50% from normal years. Apart from it the government has decided to offload 5 lakh tonne pulses from its buffer stock to both state governments as well as in the open market. Out of 5 lakh MT 2 lakh MT would be sold at MSP and above MSP to state govt. and in the open market. It might be urad and moong. Besides, Nafed too is planning to sell pulses from the buffer stock to institutional buyers like hotels and big retail stores. Total pulses import has touched at 21.4 lakh MT and is touching 30 lakh MT by March end.
- **Indian farmers have covered 157.33 lakh ha, up by 5.22 % from last year (149.53 lakh ha).** Farmers have covered 10.38 % higher area under Chana to 105.35 lakh ha against 95.244 lakh ha. last year as on 16th Jan 2020. Lentils area is down by 5.34 % to 15.94 lakh ha. Farmers had covered 16.84 lakh ha last year. Peas area has been reported at 9.54 lakh ha against 10.40 lakh ha, down by 8.23%. Farmers have covered 7.08 lakh ha under Urad, up by 2.15 % from last year. Moong area is running down by 3.46 % to 5.36 lakh ha. Normal area under Moong is 10.10 lakh ha. Kulthi, Lythyrus and other rabi pulses area too is running down by 4.45, 0.45 and 1.54% so far. Only Chana, Urad and Peas area has been reported up. Overall rabi area is up by 5.22% so far
- **Sowing of lentils has entered at last phase and season is expected to end with covering over** 16.5 lakh ha this year too. It is lagging behind 3% from last year. Early shown crop is now 30-35 days old and is about to enter in flowering stage. Recent rains in growing regions like Uttar Pradesh, MP, Bihar and West Bengal have benefitted standing crop and crop condition is good so far. However, in some fields of west Bengal. Insects like stem cutters have been seen affecting the crop. Right now it is not widely spread and would be contained soon. In other regions crop condition is good to excellent. Yield is expected to be better from last year. Weather condition in Feb month is very crucial for the final size of the crop. In normal condition production is likely to exceed 13 lakh MT in 2019-20, to be marketed in 2020-21.

- **With viewing shortage of moong in physical market and higher prevailing price** govt may increase moong import quota from 1.5 lakh MT to 2lakh MT for 2019-20. Kharif moong crop was affected due to rains and flooding in Sept. Besides, lower acreage in rabi season encouraged cash market price and it is ruling above MSP (RS7050 per qtl.). In Jaipur market millers are buying moong at Rs7600-7700. There is a short supply of quality moong. Moong output in the 2019-20 (Jul-Jun) kharif season has been pegged at 1.42 MMT, against 1.84 MMT last season, according to the farm ministry's first advance estimates. Total kharif pulses output has been estimated at 8.23 mln tn, compared with 8.59 mln tn a year ago. India imported 67,541 MT moong in during Apr to Nov. It is 13.8 % lower than last year. If govt. increases moong import quota, it may cool down current market price as Nafed too would prefer to sell stock from central pool.
- **Chana market traded range bound as pressure continues to build up with increasing** acreage in major producing states except MP. There is plenty of old stock in central pool and with private trades. New crop is expected to cross 100 Lakh MT this year as crop and weather conditions are good so far. Private trades would continue to offload old stock as new crop is likely to hit south Indian market by mid Feb-2020. So Agriwatch expects supply side to increase in Jan and Feb. From March onward there would be supply pressure from Maharashtra, Karnataka, Rajasthan and MP. Even higher production is expected in Gujarat too. It is not clear that how much quantity govt is going to procure at MSP. If govt procures 1.5 MMT, it would not be able to ease supply pressure and prices may fall to Rs 4000 in peak arrival season. Right now chana in Delhi market is being traded at Rs 4450-4500.
- **DGFT has issued circular no-38-2015-2020 regarding peas HS code (07131000) and removed it.** Now it has been classified in three categories. For yellow peas new HS code is 07131010, for green peas it is -07131020 and for other peas it is 07131090. Now import would be possible under above code.
- **Central govt has allocated 8.47 lakh MT pulses on subsidized rates to various states.** Under this allocation 3.2lakh MT tur, 2 lakh MT urad, 1.2 lakh MT chana, 1.5 lakh MT mung and 0.57 lakh MT masur have been offered. It may have a cooling impact of cash pulses market.

International Market Update:

- **Firm tone was recorded in North American lentils cash market during last week.** Market sources say that millers and exporters are buying for near terms needs. However, growers and other stake holders are still gauging price direction and new crops prospects. Overall export volume has been up from last year and it hints towards fundamental support on demand side. Export and overall domestic demand may exceed last year. Market expects firmness to continue.
- **Commerce ministry of Myanmar has changed exim policy. All importers and exporters have** to get registered till 31st Dec-2019. With this new changes importers and exporters would get new 9 digit digital taxation identification no from 5th Jan-2020. Without new registration no import and export would not be possible. It may delay shipment to some extent.
- **Peas export from France increased to 25750 MT in Oct-2019. It is higher by 3550 MT from Sep.** France had exported 22200 MT in Sept-2019. Export increased despite India being out of global market due to quantity restriction.
- **Demand for peas improved from China. It has helped peas price to improve further.** It would push up import parity in India too. Peas production in Canada declined during last two years. However, This year production is up by 18% from last year to 42 lakh MT. Peas import volume in China is expected to cross 18 lakh MT this season. Cattle feed industry is using pea in bulk volume while in India it is used for human consumption.
- **Turkey import volume for lentils from Canada improved in the month of Oct-2019.** It has imported 25211 MT from Canada, 20440 Mt from Kazakhstan and 1627 MT from Russia. Total import by Turkey in Oct was registered at 48783 MT. Total import for Turkey touched at 274,328 MT in this calendar year. It is down by 7% from last year till Oct-2019.
- **Despite lower export volume for lentils from Canada in Oct overall export volume from Canada** increased by 14% to 518,626 MYT during ongoing MY. In Oct Canada exported total 131,325 MT, down from 272,705 MT in Sep. India purchased 32240 MT from Canada in Oct besides other sources. For Nov Indian import volume is likely to increase as prices in domestic market have started increasing.

- **As per Canadian Grain Commission Canada has exported 25,500 MT lentils during 18th to 24th Nov-2019.** With this total export quantity in the season to date reached at 247,900 MT against 140,600 MT last season till Nov-2018. Out of total export No-2 Canada lentils contributed 85% while 15% were of other grades. Farmers have delivered 40,600 MT last week. Season to date deliveries now total 534,400 MT, compared to 504,100 during the same period last season.
- **Improved export movement helped to continued firm tone this week too despite higher supply** from farmers end and higher stock too from last year. till 18th Nov-2019, growers had delivered 32% of all peas available on their farms to the bulk handling system, compared to 29% by the same time last year as per market source.
- **Canada pea production is likely to be 30 % higher than last year. The latest estimate has pegged it at 47 lakh MT.** Even lentil production is likely to be higher by 20 % to 25 lakh MT. Chickpeas production would be up by 15% to 2.63 lakh MT this year Dry beans production has been pegged at 3.56 lakh MT, up by 45 from last year.
- **Dry peas production has been pegged at 856163 MT, lentil production at 2.47 lakh MT, total chickpeas production has been pegged at 1.79 lakh MT.** Total pulses production has been pegged at 12.82 lakh MT this year against 15 lakh MT last year. Due to rains generated issues yield has been down this year for all pulses in US.
- **Dry pea production in Canada is expected to increase by 20 % to 43 lakh MT in comparison to last year.** The reason is attributed to higher area coverage in 2019-20 crop year. The major growing state is Saskatchewan accounting 50 % in total production. Alberta is 2nd major growing state accounting 45% of total production. As carry in stock is lower supply side is expected to increase by only 55 to 4.5 MMT. Export may decrease to 31 lakh MT. Top buyers might be China, Bangladesh and the US. Carry in stock would increase. Average price is expected to be similar as 2018-19.
- **Chickpeas export from Australia increased by 10 % to 27251 MT in June against May when it was registered at 24719 MT** as per Australia Bureau of Statistics. Thus total export in current MY reached to 259,863 MT (till June) against 646,411 MT in corresponding period last year. Bangladesh brought 8,463 MT in June, followed by Pakistan at 8,064 MT. UAE purchased 4,991 MT in June.
- **Dry pea stock in US is likely to increase by 0.02 % to 203983 MT in 2019.** It was 199628 MT in 2018. Even lentils stock is expected to be higher by 81% to 144,425 MT in 2019 against 79833 MT in 2018. All chickpeas stock is 294% higher to 157262 MT against 39916 MT in 2018. Out of total small chickpeas stock increase from 12156 to 43318 MT in 2019. It is higher by 256% from last year. Large chickpeas stock is expected to increase by 310% to 113,943 MT in 2019.
- **Lentils production in Canada is likely to increase by 5.16 % to 22 lakh MT in 2019-20** against 20.92 lakh MT last year. However, total supply would decrease by 3.14 % to 28.95 lakh MT due to higher domestic use pegged at almost 6 lakh MT. Carryout would decrease from 7 to 5 lakh MT in 2019-20. Export has been pegged at 18 lakh MT, similar as last year. Average yearly lentil price is expected to hover in the range of \$430 to 460 per MT.

Weekly Outlook: -Pulses are likely to trade steady to slightly weak except moong.

Rabi Sowing as 16-01-2020:
