

Pulses Domestic Fundamentals:

Today's Update:

- **Urad cash market traded lower taking clue from higher import volume in March and April.** Market experts expect 2 lakh MT import in two months including March. Besides, selling from central pool continues. It may drag down urad price further in coming weeks and may decrease to MSP level. Pace of decline might be limited in the first week of March due to good demand for Holi. After Holi it may come down to Rs 5700-5800. So stake holders should not retain stock for longer period.
- **Time line for additional 2.5 lakh MT urad import quota has been extended now from 31st March-2020 to 30April-2020 now.** It means import should arrive at Indian ports on or before 30th April-2020. Instructions regarding this to all license holders have been given to complete import by 30April-2020. No request for further extension will be entertained.
- **Myanmar is offering lemon tur at 4560 and old at \$550 per MT basis Indian ports. Urad FAQ is being offered at \$750 and SQ at \$845 per MT.** Chana kabuli is being offered at 4670, V7 kabuli at 4690 and Hollan at 4700 per MT basis Indian ports. Moong Pokaku is being offered at 4930, Annaseva at \$940 and Pediseva at \$1020 per MT. Red Rajma is being offered at 4990 per MT.
- **Weather may turn rough/wet with stormy wind by the end of this week in north Indian regions.** Light to heavy rains with storm may affect harvesting activities of rabi crops. If it continues for a longer time, 3-4 days, it may damage standing crops in Punjab, Haryana, Rajasthan, MP and Chhattisgarh. Crops like chana, masur and peas might be affected. Orissa and AP might be affected.

Previous Update:

- **New crop of masur is almost ready to be harvested in major producing regions like Chhattisgarh and Uttar Pradesh** and is attaining maturity in states like M.P., Bihar and West Bengal. Crop condition is very good and Agriwatch expects production to 13.5 lakh MT this year. New crop is likely to hit market in Chhattisgarh and U.P. from first week of March. However, cloudy weather and sporadic rains may disturb harvesting this week. Market participants say that new vessel is in way to India from Canada. As arrival pace would remain lower in the first week of March, slight recovery is expected before first fortnight of March. Masur in Kanpur market is being traded at Rs 4500-4600 and it may move to Rs 4700. Medium term outlook seems weak.
- **Expectation of higher chana production this year, higher carry out and commencement of arrival in south India** and in some parts of MP have started weighing on market fundamental. Besides, Nafed selling chana at Rs 3950 in Rajasthan and Rs 3900 per qtl in MP have increased pressure further on chana cash market. Ahead of bumper crop futures too is trading weak. Procurement target for bigger states like MP & MH is yet awaited. It has been set at 9,24,456 MT for states like Gujarat, Rajasthan, Telangana, Karnataka and AP. Total 6,15,750 MT would be procured in Rajasthan while it has been fixed at 14,30 MT for Karnataka. For Gujarat target is 57,248 MT, it is 47,600 MT for Telangana. AP would procure 60,468 MT this year. If 20-21 lakh MT is procured in MP and MH, total figure seems close to be 30 lakh MT. production is likely to exceed 100 lakh MT.
- **Cash moong market continued to trade firm as there is nominal arrival from major producing regions throughout India except Nagore, Merta and Khatu line.** No new crop seems in near future (not before mid-April). Apart from this no pressure was felt in AP and Gujarat from new crop. With this background moong market is likely to trade firm once demand from mills comes out. Stockiest are unwilling to sell and it is creating short supply for mills. Slight correction was seen last week as demand for dhoya decreased at higher level. There is no parity for central and north India from Vijaywara right now. Harvesting of rabi crops are expected to be delayed by 20 days, it would affect summer moong sowing too. Farmers in states like Bihar, Jharkhand and UP sow moong after harvesting rabi crops. It would push up moong price further in coming weeks. Import remains at negligible level. Nafed is offering lower quantity and disapproves lower bids.
- **Tur procurement pace is increasing now with decreasing moisture level in new crop and improving arrivals in various states.** Against the set target at 5.5 lakh MT, total procurement crossed 1.02 lakh MT so far. Out of total

102469.16MT, Karnataka has contributed around 50789.21 MT, Telangana purchased around 44131.45 MT, Maharashtra procured 4278.20 MT while AP procured 3026.05 MT and Gujarat around 244.25 MT. Procurement pace is likely to increase in Karnataka, Maharashtra and A.P.

- **Central govt has allocated 8.47 lakh MT pulses on subsidized rates to various states.** Under this allocation 3.2lakhMT tur, 2 lakh MT urad, 1.2 lakh MT chana, 1.5 lakh MT mung and 0.57 lakh MT masur have been offered. It may have a cooling impact of cash pulses market.

International Market Update:

- **Global field peas market traded weak as concerns regarding demand from China and India** are increasing due to good rabi production prospects in India and spread of Corona virus in china. Export import from China is almost halted due to fear India too would not be a buyer even in March-2020. Area of chickpeas is higher and production in India would cross 100 lakh MT this year if weather condition during rest of Feb and march remains favorable. Even lentils production prospects seems good this year in India. All these factors have pressurized global market. Overall, tone remains weak.
- **Global Lentils market continued to trade weak due to slowing down of seasonal demand.** Despite slower demand export movement during MY 2019-20 has been up by 11.4% to 8.1lakh MT. US exported around 1.27 lakhMT masur during the same period. As demand pace is lower right now, any improvement in price is unlikely.
- **The pace of pea exports from France continued to slow in December, according to data** from Eurostat and Terres Univia. Export shipments during the month totaled 17,425 metric tons (MT), down 12% the 19,745 MT shipped the previous month, and down 2% from the 17,855 MT shipped the same month last year. This lifted season to date export shipments to 122,915 MT, up 20% from the 102,545 MT shipped during the same period last season. So far this marketing year, European Union destinations accounted for 97% of all pea exports, compared to 98.5% last season.
- **Movement of lentils from Australia was up significantly, rising compared to the previous month in December,** trade data from Australia Bureau of Statistics reports. Shipments during the month reached 76,395 metric tons (MT), up from 62,178 MT the prior month. This lifted shipments so far during the marketing year to 138,573, up 227% last year. The most recent movement statistics reported Bangladesh was number one importer, buying 31,188 MT. India was the second most important importer receiving 17,623 MT, followed by Sri Lanka at 8,658 MT.
- **As per latest update by Australia Bureau of Statistics Australia exported 76,395 metric tons (MT) lentils in Dec-2019.** It is up from 62,178 MT in Nov-2019. Total shipment in current MY reached at 138,573 MT, it is higher by 227% from last season till Dec-2019. Bangladesh brought 31188 MT, India brought 17623MT and Sri Lanka purchased 8,658 MT in Dec. Pace of Lentil import is likely to be up in Jan -2020 too, as shipment continues, despite new crop at hands in India
- **Production of peas in Canada has been pegged at 42.37 lakh MT in 2019-20 & production forecast for 2020-21** is slightly higher at 43lakh MT. During the period import would decrease from 70 to 60 thousand MT while export too would decrease from 34 lakh MT to 33 lakh MT in 2020-21. Domestic use would increase slightly from 8.33 to 8.60lakh MT during the same period. Average price is likely to hinge in the range of \$245-275 per MT, same range as was seen in 2019-20.
- **Production of lentils in Canada has been pegged at 21.67 lakhMT in 2019-20 and for 2020-21** production forecast is slightly higher at 22lakhMT. Import would decrease from 80 to 50 thousand MT while export too would decrease from 21 to 20lakhMT in 2020-21. Carryout would decrease from 4.5 to 3.75 lakh MT in 2020-21.
- **Chickpeas production in Canada in 2019-20 has been pegged at 2.52 lakh MT .It would decrease to 2lakhMT in 2020-21.** Average price is expected to hover in the range of 455-485 per MT during 2020-21. Import too would decline from 53 to 50 thousand MT in 2020-21.
- **Dry pea stock in US is likely to increase by 0.02 % to 203983 MT in 2019.** It was 199628 MT in 2018. Even lentils stock is expected to be higher by 81% to 144,425 MT in 2019 against 79833 MT in 2018. All chickpeas stock is 294% higher to 157262 MT against 39916 MT in 2018. Out of total small chickpeas stock increase from 12156 to 43318 MT in 2019. It is higher by 256% from last year. Large chickpeas stock is expected to increase by 310% to 113,943 MT in 2019.

Weekly Outlook: -Pulses are likely to trade mixed.
