

## Pulses Domestic Fundamentals:

### Today's Update:

- ***The southwest monsoon is heading faster than normal expectation. It has covered parts of central and western India 15 days earlier than scheduled. It seems that India is heading towards bumper kharif crops this year. Sivananda Pai, head of long-range forecasting at the India Meteorological Department (IMD) says that a low pressure area near Andhra Pradesh accelerated the vital weather system, which will progress further in the next two days. After that monsoon may slow down for few days and again it would be active. Overall, rains fall condition looks positive so far. Kharif crop planting has already increased 13 per cent over last year's. In last 15 days, rainfall has been 31 per cent above normal across the country, with central India alone receiving double its normal rainfall.***

### Previous Update:

- ***Govt. fixes import quota for pulses like peas, moong, tur, urad and chana on yearly basis. The provision was implemented in 2017 to control massive import flow and said it a temporary solution. Now countries like US, Australia and EU have tried to file a case against this temporary solution. They say that temporary solution cannot be enforced 3 years continuously. .Notably, govt has fixed 4 lakh MT quota for tur, 4 lakh MT for urad , 1.5 lakh MT each for peas and moong for 2020-21 MY. Actually problem is with peas. India used to import peas in bulk volume two years back, but now it has been limited at 1.5 lakh mt. So, exporting countries are seeing India's policy as restrictive. The issue may be discussed in WTO.***
- ***Moong arrival in Harda market was seen decreasing. Farmers continued to bring moong uncleaned and thus they received lower than expected price in markets. Superior quality moong was traded at Rs 6500 to 6771 per qtl. As pressure is likely to continue, prices may decrease further by Rs 200 from current level. Kharif moong sowing is likely to start from 20th June in MP, Rajasthan while in other states it may commence by the end of this month. Better crop size in summer crop and good prospects in kharif would not allow moong market to move beyond MSP level. Demand too has weakened at higher level.***
- ***The DGFT has cleared that India would import 2 lakh MT pulses including tur from Mozambique in 2020-21 under previously signed pact. Import would be allowed on 5 ports I.E Mumbai, Tuticorin , Chennai, Kolkata and Hazira. Import will be subject to production of "Certificate of Origin" certified by the authorized signatories in the ICM (Instituto de Cereais de Mozambique) with stamps provided by the Government of Mozambique, which is being shared with the concerned customs authorities of these ports and the Central Board of Indirect Taxes and Customs.***
- ***Tur cash market improved due to fresh demand from mills and slower pace of arrivals. Supply from Karnataka, MH continues for other states. In Latur market it traded Rs 200 up and may continue to trade firm in coming weeks. Arrival in Latur market was reported at 1000-1200 bags while it was higher in Gulberga. As prices are ruling lower , stockiests are unwilling to sell tur at lower price right now. Tur price may move further up by Rs 200-300 from current level. Right now in Gulberga market it is being traded at Rs 5300-5400. Import is due in this month and quantity is higher. So any spike is unlikely in June.***
- ***Arrival of new moong from Madhya Pradesh, Gujarat, UP and Bihar is continuously increasing while demand decreased after three days Holiday. Right now arrival of around 35000 bags from Narmada Patti and Nimar are being reported per day. In nearby Markets it is being traded at Rs 6500-7000 per qtl. It may slip by Rs 200 more in coming weeks despite Hike in MSP last week. Moong from Nimar is being delivered to Delhi at Rs 7500, Indore at Rs 7100 and Gujarat at Rs 7600. Overall tone remains weak.***
- ***The DGFT has decreased the time line for 4 lakh MT urad import quota from 31st March-2021 to 31 August-2020. As time frame for import has been reduced, The DGFT would issue license soon (June). It would impact the market sentiments and cash market would trade down by Rs 200 to 300 from current level. Notably, import of back log is yet to hit Indian ports. The time line for back log import for ongoing MY has been extended till 31st May-2020. Besides, new kharif crop would be available from Aug. So pressure seems building on urad price..***

### International Market Update:

- **Lentils stock in Australia is decreasing fast as bulk shipment to B,desh continues with next three months forward deal was heard .Old crop of lentils would not be available by the beginning of the new season. Forward quotes have been heard at \$700-800 per MT, but limited quantity limits the deal too. B,desh has been buying 20,000 MT red small lentils per month.It may continue next three months. Australia exported 80,000 MT lentils in March and big volume export continues in April and May too. So old stock is depleting fast. As prices are moving up , area under lentils may increase by 10% this year. New lentils quotes are \$650-700.**
- **Moong harvesting is on in Australia .It is almost two third over in Queensland and northern NSW .Quality of moong is said to be good. Mungbean values have steadied at \$1500/t for No. 1 grade, \$1400/t for manufacturing and \$1300/t for processing as per as per Central grain Asia report. Quantity of grade -1moong is higher .China is the biggest buyer of Australian moong.Some buying interest from India too has been seen. Indian millers can also buy moong from Australia if they get license. The central Queensland mung bean harvest is well advanced, and will finish next month.**
- **Australia is going to plant biggest chickpeas crop in comparison to last three years. Planting continues in Queensland and NSW. As moisture level in the field is good, farmers are increasing area under chickpeas. As top level soil moisture is lower, farmers are using wheat land for chickpeas planting. Forward delivery for October onward has been heard at \$ 630 per MT. New chickpeas crop may attract higher value. Value of new crop may be affected by any further hiccups caused by COVID-19.It may pressurize Chickpeas price.**
- **As per latest report by Canada stats MY 2019-20 may end up with 3 lakh MT masur stock. Sowing in new season i.e 2020-21 is almost over and under prevailing condition 21.5 lakh MT production is expected. If we assume 50,000MT import in new season, it hints that total availability would be around 25 lakh MT. New crop is expected to hit market in Sep. As India has slashed duty by 20 % to 10%, Exporters in Canada has increased quotes accordingly. So, Indian importers are unlikely to gain benefit in import. Emerging situation is not favorable for import and Indian importers would not be able to import much masur till August. New quotes in Canada is \$670 per MT. Actually Canadian fig is doubtful and it seems manipulation here. So , exporters always take advantage of change in duty structure.**
- **As per agri food Canada area seeded under lentils in Canada is expected to remain unchanged at 1.53 Mh, due to higher expected returns relative to other crops. With higher yields, production is forecast to rise marginally to 2.2 Mt but supply is expected to decrease to 2.6 Mt due to a fall in carry-in stocks. Exports are forecast to be lower at 2.0 Mt. Carry-out stocks are expected to decrease which will be supportive for prices. The average price for all grades is forecast to rise from 2019-20.The USDA March Prospective Planting report showed that US area seeded to lentils is expected to decrease marginally from last year to 0.47 million acres. Area seeded is expected to fall in North Dakota but rise in Montana.**
- **As per latest update by NASS ,dry pea acreage may be down by 12-13% this year in US peas producing regions. Farmers may plant total 971,000 acres against 11,03,000 acres last year. Intended plantings are down from a year ago in Idaho, Montana, Nebraska, North Dakota, and South Dakota.However,area in Washington may increase by 19% this year.**
- **As per latest update by NASS lentil area may be down by 2-3% this year in US. Farmers may plant total 474,000 acres in crop year 2020., down 2 percent from 2019. Lower area coverage is expected in Idaho, North Dakota, and Washington from last year, while planting intentions are above last year in Montana (7% increase).**
- **Chickpeas area in the US is likely to decrease by 32% from last year. Small chickpea acreage shows a decline of only 5%, while large chickpea acreage is expected to decrease by 41% .It is really a big surprise this year.**
- **As per the latest Australian Bureau of Statistics Chickpeas export volume from Australia increased in Jan-2020 in comparison to Dec-2019.In January -2020, Australia exported 56,502 MT, up 2% from 55,296 the previous month. Bangladesh purchased 36,801 MT. Pakistan was the second most important importer taking 13,073 MT, followed by United Arab Emirates at 3,939 MT.**
- **As per latest report by The Canadian Grain Commission Canada has exported 1,382,600 MT peas in ongoing MY so far till Jan-2020.It is up by 45% from last year till Jan 2019.In Jan alone, total 1,34 300 MT has been exported. Canada has exported 1,036,800 MT last year till January-2019.**

- **Production of peas in Canada has been pegged at 42.37 lakh MT in 2019-20 & production forecast for 2020-21 is slightly higher at 43lakh MT. During the period import would decrease from 70 to 60 thousand MT while export too would decrease from 34 lakh MT to 33 lakh MT in 2020-21. Domestic use would increase slightly from 8.33 to 8.60 lakh MT during the same period. Average price is likely to hinge in the range of \$245-275 per MT, same range as was seen in 2019-20.**

**Weekly Outlook:** -Pulses are likely to trade steady to weak.
