

Pulses Domestic Fundamentals:

Today's Update:

- ***The pace of monsoon progress is getting slower now and rains in some major kharif growing states may delay sowing activities. Rains in Maharashtra may disturb for a week and sowing of moong and urad may be delayed by a week. Start was good. If it picks up after a week, farmers would cover the short fall. If it delays by 10 days, it may disturb the crop sowing pattern in Maharashtra. If it happens, firmness in pulses market may get support once again.***
- ***Improvement in offtake at ports helped tur and urad price to recover yesterday. Tur lemon at Mumbai port was quoted at Rs5150 and new at Rs5250-5300 per qtl. Even urad prices moved Rs50 up to Rs6050-6100 and new Rs6150-6200. Masur Canada was quoted at Rs 5525 while container at Rs 5600-5650. It was traded at Rs5425-5525 at Mundra and Haira ports. In domestic market stockiest have resorted to hold tur and urad stock sensing upward momentum to continue this week too.***
- ***Nafed has procured 18.5 lakh MT chana this season till the third week of the month. The target for procurement was set at 22.5 lakh MT. As procurement in many states is still on, procurement target is expected to be met easily. Procurement drive in MP may continue till 27th July. Out of total around 7 lakh MT has been procured in MP while Rajasthan contributed 4.64 lakh MT so far. MH has procured 2.63 lakh MT. Karnataka, AP and Gujarat have contributed 1.02, 1.28 and 1 lakh MT respectively. Procurement target in MP is 8.76 lakh MT. It is 6.16 for Raj and 4.2 Lakh MT for MH.***

Previous Update:

- ***Tur market started trading firm in domestic market due to stockiest active buying sensing uptrend to continue in coming months. Market is well aware that stock of imported tur is lower at ports and demand is likely to improve in coming weeks due to commencement of festive season. Apart from it, Millers from Katni are buying Tur from Karnataka and MH. As supply side is getting tighter, stockiest have increased their buying throughout India. Demand for dal is normal right now, but will bound to improve. MH tur in Katni is being quoted at Rs 6250 while Kar tur at Rs 6325.***
- ***Indian farmers have covered 4.58 lakh Ha area under kharif pulses as on 19th, June-2020. It is lower by 0.64 lakh ha to 5.22 lakh ha from corresponding week. The highest area has been reported from Karnataka, Rajasthan and Uttar Pradesh (1.75, 0.69 and 0.54 lakh ha so far. Normal area under kharif pulses is 119.89 lakh ha. Coverage under tur is 1.25, Urad is 0.65, moong is 1.54 lakh ha. It is likely to pick up in coming weeks as there is good rainfall in the growing regions.***
- ***New arrival of summer moong from U.P., Bihar & Jharkhand started hitting Delhi market. It is being traded at Rs 6600 to 6800 per qtl, depending on quality of the crop. Arrival from M.P. too continues. However, quality is not as good as expected. As prices were ruling higher, so production size is bigger for summer moong this year. Light dis-coloured moong in MP is being traded at Rs 6500-6700 per qtl. Demand for dal dhoya and chilka is weak while brokers and sellers are avoiding to visit market at this point of time due to COVID-19. Mills buy in bulk and decide price on sample. Under prevailing condition firmness in moong market seems difficult. After three months bigger kharif crop would be available in bulk volume.***
- ***Despite import flow price of urad improved by Rs200 to 300 in south Indian cash market. It may move further up by Rs100-200 more as there is shortage of urad in cash market. Traders are buying urad in Chennai for Delhi market at Rs 6450. It drove urad price in Delhi market by Rs 300 from Rs 6100 to Rs 6400. However, firm tone may be limited due to weak demand caused by COVID-19. Millers are active in a limited way and buying is based on actual needs. Brokers and buyers both have restricted themselves coming into markets. Despite good start of kharif sowing, new crop would be available after 3 months. So, firmer tone might be seen in coming weeks.***
- ***The DGFT has cleared that India would import 2 lakh MT pulses including tur from Mozambique in 2020-21 under previously signed pact. Import would be allowed on 5 ports i.e. Mumbai, Tuticorin, Chennai, Kolkata and Hazira. Import will be subject to production of "Certificate of Origin" certified by the authorized signatories in the***

ICM (Instituto de Cereais de Moçambique) with stamps provided by the Government of Mozambique, which is being shared with the concerned customs authorities of these ports and the Central Board of Indirect Taxes and Customs.

- **The DGFT has decreased the time line for 4 lakh MT urad import quota from 31st March-2021 to 31 August-2020.** As time frame for import has been reduced, The DGFT would issue license soon (June). It would impact the market sentiments and cash market would trade down by Rs200 to 300 from current level. Notably, import of back log is yet to hit Indian ports. The time line for back log import for ongoing MY has been extended till 31st May-2020. Besides, new kharif crop would be available from Aug. So pressure seems building on urad price..

International Market Update:

- **Lentils area is expected to decline slightly from 1530 thousand ha to 1501 thousand ha in 2020-21.** the decline is nominal so production size is estimated to be similar as seen in 2019-20. Canada had produced 21.67 lakh MT lentils in 2019-20. the fig for 2020-21 has been pegged at 21.50 lakh MT. Yield is similar for both years at 1.46 tonne per ha. import and export fig too may decline in 2020-21 and it may come down from 85 to 50 and from 2200 to 2000 thousand MT respectively. Price is expected to hover in the range of \$500-530 per MT.
- **Dry peas export from Canada is expected to increase from 32.70 lakh MT to 36.50 lakh MT in 2019-20** and it may decrease to 34.00 lakh MT in 2020-21. For 2020-21, it is preliminary estimate as crop sowing has just ended in mid June-2020. China, India and B, desh have been top buyers of dry peas in 2019-20 and the increased volume of total export shows the same. Even import figure is up from 62 to 72 thousand tonnes in 2019-20. It may decrease to 60 thousand MT in 2020-21.
- **Dry peas production in Canada is expected to increase from 35.81 lakh MT in 2018-19 to 42.37 lakh MT in 2019-20.** Based on preliminary area and yield estimate production in 2020-21 may increase slightly from 42.37 to 42.75 lakh MT. Seeded area in 2020-21 is 1732 thousand ha in 2020-21 against 1753 thousand ha in 2019-20. The yield of dry peas is expected to increase this year from 2.48 to 2.51 tonne per ha in 2020-21.
- **Lentils stock in Australia is decreasing fast as bulk shipment to B, desh continues with next three months forward deal was heard.** Old crop of lentils would not be available by the beginning of the new season. Forward quotes have been heard at \$700-800 per MT, but limited quantity limits the deal too. B, desh has been buying 20,000 MT red small lentils per month. It may continue next three months. Australia exported 80,000 MT lentils in March and big volume export continues in April and May too. So old stock is depleting fast. As prices are moving up, area under lentils may increase by 10% this year. New lentils quotes are \$650-700.
- **Moong harvesting is on in Australia. It is almost two third over in Queensland and northern NSW.** Quality of moong is said to be good. Mungbean values have steadied at \$1500/t for No. 1 grade, \$1400/t for manufacturing and \$1300/t for processing as per Central grain Asia report. Quantity of grade 1 moong is higher. China is the biggest buyer of Australian moong. Some buying interest from India too has been seen. Indian millers can also buy moong from Australia if they get license. The central Queensland mung bean harvest is well advanced, and will finish next month.
- **Australia is going to plant biggest chickpeas crop in comparison to last three years.** Planting continues in Queensland and NSW. As moisture level in the field is good, farmers are increasing area under chickpeas. As top level soil moisture is lower, farmers are using wheat land for chickpeas planting. Forward delivery for October onward has been heard at \$630 per MT. New chickpeas crop may attract higher value. Value of new crop may be affected by any further hiccups caused by COVID-19. It may pressurize Chickpeas price.
- **As per latest report by Canada stats MY 2019-20 may end up with 3 lakh MT masur stock.** Sowing in new season i.e 2020-21 is almost over and under prevailing condition 21.5 lakh MT production is expected. If we assume 50,000 MT import in new season, it hints that total availability would be around 25 lakh MT. New crop is expected to hit market in Sep. As India has slashed duty by 20 % to 10%, Exporters in Canada has increased quotes accordingly. So, Indian importers are unlikely to gain benefit in import. Emerging situation is not favorable for import and Indian importers would not be able to import much masur till August. New quotes in Canada is \$670

per MT. Actually Canadian fig is doubtful and it seems manipulation here. So, exporters always take advantage of change in duty structure.

- **As per latest update by NASS, dry pea acreage may be down by 12-13% this year in US peas producing regions.** Farmers may plant total 971,000 acres against 11,03,000 acres last year. Intended plantings are down from a year ago in Idaho, Montana, Nebraska, North Dakota, and South Dakota. However, area in Washington may increase by 19% this year.
- **As per latest update by NASS lentil area may be down by 2-3% this year in US.** Farmers may plant total 474,000 acres in crop year 2020., down 2 percent from 2019. Lower area coverage is expected in Idaho, North Dakota, and Washington from last year, while planting intentions are above last year in Montana (7% increase).
- **Chickpeas area in the US is likely to decrease by 32% from last year.** Small chickpea acreage shows a decline of only 5%, while large chickpea acreage is expected to decrease by 41%. It is really a big surprise this year.
- **As per latest report by The Canadian Grain Commission Canada has exported 1,382,600 MT peas in ongoing MY so far till Jan-2020.** It is up by 45% from last year till Jan 2019. In Jan alone, total 1,34,300 MT has been exported. Canada has exported 1,036,800 MT last year till January-2019.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm.
