

**Pulses Domestic Fundamentals:****Today's Update:**

- **Urad cash market continued to trade under pressure on increasing kharif area coverage**, likely higher import volume in July and Aug. Even buying by mills is weak as they know that a big new crop is hardly two and a half month away from now. Weather condition is good so far, so bumper production seems very much on the card. The DGFT has already reduced the time line for 4 lakh MT urad import quota from 31st March-2021 to 31August-2020. As time frame for import has been reduced, higher volume would enter into India in next two months including July. It would impact the market sentiments and cash market might trade down by Rs100 to 200 from current level. So pressure may continue on urad price. Offtake by mills is poor while stickiest are willing to sell slowly.
- **Steady to slightly firm trend prevailed in tur cash market. It traded at Rs5800-6000 in Gulberga market** depending on quality of the crop. At this level demand may get affected as import volume is expected to increase in July and Aug-2020. As Myanmar is offering tur at \$ 675 per tonne basis Indian ports, correction at this level is expected. Farmers have planted tur in higher area so far. Overall area is bound to cross 48 to 49 lakh ha this year. Production has been pegged at 38 to 39 lakh MT under normal condition. If weather remains favorable, it may move up to 40 lakh MT.

**Previous Update:**

- **Chana cash market is likely to improve from current level as buyers are expected to return to market** at lower level before starting the festive season. Nafed would sell stock but not below a certain level. Bids have not been passed due to lower quotes. Arrival in various market is lower while higher demand for besan may push chana market up from current level. In July chana may continue to trade in the range of Rs4150 to 4350 in Delhi market. Availability is higher this year while import from LDC continues without duty. Procurement is nearing now at target of 22.5 lakh MT. Procurement is over 21 lakh MT so far.
- **Peas import remains almost halted at this point of time and so availability too is lower.** In global market peas market is volatile while it is steady in domestic market. As prices are ruling higher demand for peas declined considerably in last two -three months. There is no hope for improvement in demand. In Mumbai market it is being traded at Rs5800-5900 while in Kolkatta it is being traded at Rs5600-5700. In Kanpur market it traded at Rs 5000. demand for matar dal is weak. Range bound movement is expected this week.
- **Indian farmers have covered 36.84 lakh ha area under kharif pulses as on 1<sup>st</sup> July-2020.** It is much higher than .47 lakh ha covered last year till date. Farmers have covered 16.56 lakh ha area under tur against 2.79 lakh ha last year. Urad coverage area has been reported at 8.77 lakh ha against 1.88 lakh ha last year. Farmers have covered 9.41 lakh ha under moong against 3.14 lakh ha last year. Even other pulses area are running ahead of normal schedule. Weather remains favorable and sowing is on with faster pace. Kharif area is bound to increase this year. See details in table at page no-3.
- **Pressure on cash moong market continues with increasing quantity from summer moong.** Buying support by mills was limited as quality of more than 50 % arrival was weak. Moong is hitting various markets from MP, Rajasthan, Uttar Pradesh, Bihar and Ranchi region. Weak demand, arrival of light quality moong may drag down moong price by Rs200 to 300 more from current level. Apart from this sowing of kharif moong is running ahead by 3.24 to 5.30 lakh ha. This year area is bound to increase and it may cross 33 lakh ha against normal of 27.50 lakh ha. Before this maximum area has been covered in 2016- 17(Over 35 lakh ha). Weather condition is favorable and good rains fall and higher MSP in growing region are encouraging farmers to grow more moong this kharif season. Under normal condition Agriwatch expects 14.25 to 14.50 lakh MT kharif production as per preliminary estimate.
- **Importers have restricted buying of masur from Canada from the third week of June.** Likely lower import volume in July and decreasing arrival flow from Mungawali, Ganjwasoda, Sagar and Bhopal in domestic market may push up masur price in coming weeks. Around 30 to 40 thousand MT is expected in July while buyers of around 50000-60000MT are ready to buy. It means higher demand against lower supply. Supply shortage is bound to support masur market fundamental. Even nafed is unable to buy masur this year as prices are ruling above MSP. Even

import duty reduction of 20 % is unable to cool down price as suppliers' countries like Canada and Australia had increased their quotes accordingly on same date. There is a shortage of masur at ports like Mumbai and Mundra..

### **International Market Update:**

- **Canada exported 4 lakh MT yellow peas in May-2020, it is the highest volume in last eight months.** The biggest buyer was China who brought around 60% while B,desh purchased 31% yellow peas. Peas export from Canada increased by 22% in last 10 months. It is higher by 15.4% from 5 years average. Overall, export from Canada is expected to touch at 36.5 lakh tonne throughout the season. Canada has exported 32.4 lakh MT peas so far in the season. It was 26.55 lakh MT last year.
- **USDA and Statistics Canada has released sowing data for lentils this week. As expected area was bound to increase in Canada considerably while a modest increase was expected in US.** Area coverage in all classes of lentils is expected to jump from 3.78 to 4.233 million acres in Canada, while U.S. farmers only increased area 1% to 492,000 acres. US farmers have lost interest in lentils farming this year. The share of red lentils area in Canada increased from 62 to 69% this year. Good demand for red lentils encouraged farmers to go for more sowing of red lentils this year in Canada.
- **Global chickpea markets continued to trade firm on reports of lower area coverage in Argentina this year.** Shortage of kabuli chana seems to loom large in the medium to long term. The main reason behind it is said to be tight supply side in India and Mexico. It has given support to medium caliber markets. Area of medium caliber chickpea has decreased in Canada and US too this year. The USDA and Statistics Canada pegging combined area at 602,000 acres, down from 843,000 last year and the record 1.3 million sown in 2018.
- **Dry peas export from Canada is expected to increase from 32.70 lakh MT to 36.50 lakh MT in 2019-20 and it may decrease to 34.00 lakh MT in 2020-21.** For 2020-21, it is preliminary estimate as crop sowing has just ended in mid June-2020. China, India and B,desh have been top buyers of dry peas in 2019-20 and the increased volume of total export shows the same. Even import figure is up from 62 to 72 thousand tonnes in 2019-20. It may decrease to 60 thousand MT in 2020-21.
- **Dry peas production in Canada is expected to increase from 35.81 lakh MT in 2018-19 to 42.37 lakh MT in 2019-20.** Based on preliminary area and yield estimate production in 2020-21 may increase slightly from 42.37 to 42.75 lakh MT. Seeded area in 2020-21 is 1732 thousand ha in 2020-21 against 1753 thousand ha in 2019-20. The yield of dry peas is expected to increase this year from 2.48 to 2.51 tonne per ha in 2020-21.
- **Lentils stock in Australia is decreasing fast as bulk shipment to B,desh continues with next three months forward deal was heard.** Old crop of lentils would not be available by the beginning of the new season. Forward quotes have been heard at \$700-800 per MT, but limited quantity limits the deal too. B,desh has been buying 20,000 MT red small lentils per month. It may continue next three months. Australia exported 80,000 MT lentils in March and big volume export continues in April and May too. So old stock is depleting fast. As prices are moving up, area under lentils may increase by 10% this year. New lentils quotes are \$650-700.
- **Moong harvesting is on in Australia. It is almost two third over in Queensland and northern NSW.** Quality of moong is said to be good. Mungbean values have steadied at \$1500/t for No. 1 grade, \$1400/t for manufacturing and \$1300/t for processing as per Central grain Asia report. Quantity of grade 1 moong is higher. China is the biggest buyer of Australian moong. Some buying interest from India too has been seen. Indian millers can also buy moong from Australia if they get license. The central Queensland mung bean harvest is well advanced, and will finish next month.
- **Australia is going to plant biggest chickpeas crop in comparison to last three years.** Planting continues in Queensland and NSW. As moisture level in the field is good, farmers are increasing area under chickpeas. As top level soil moisture is lower, farmers are using wheat land for chickpeas planting. Forward delivery for October onward has been heard at \$ 630 per MT. New chickpeas crop may attract higher value. Value of new crop may be affected by any further hiccups caused by COVID-19. It may pressurize Chickpeas price.

- As per latest report by Canada stats MY 2019-20 may end up with 3 lakh MT masur stock. Sowing in new season i.e 2020-21 is almost over and under prevailing condition 21.5 lakh MT production is expected. If we assume 50,000MT import in new season, it hints that total availability would be around 25 lakh MT. New crop is expected to hit market in Sep. As India has slashed duty by 20 % to 10%, Exporters in Canada has increased quotes accordingly. So, Indian importers are unlikely to gain benefit in import. Emerging situation is not favorable for import and Indian importers would not be able to import much masur till August. New quotes in Canada is \$670 per MT. Actually Canadian fig is doubtful and it seems manipulation here. So, exporters always take advantage of change in duty structure.

**Daily Outlook:** -Pulses are likely to trade steady to slightly weak.
