

## Pulses Domestic Fundamentals:

### Today's Update:

- ***Kharif Pulses area coverage has increased by 32.33% to 81.65 lakh ha. in the ongoing season so far. It was 61.70 lakh ha last year as on 17th July-2020. The reason behind higher area coverage is mainly attributed to good monsoon rains and an encouraging MSP. Higher MSP for kharif pulses, good rains and smooth procurement drive have encouraged farmers to grow more pulses this season. As weather is favorable, kharif area is bound to increase by 10 to 15% this year. Farmers have covered 30.84 against 22.39 lakh ha under tur, 25.43 against 17.77 lakh ha under urad, 20.98 against 16.10 lakh ha under moong and 4.37 against 5.39 lakh ha under other pulses. See details at page no -3.***
- ***Bumper arrival from summer crop and continuous increasing area under kharif pulses including moong, urad and tur would not allow market to maintain upward momentum, specially tur and urad. Pressure on moong is obvious and we can't expect uptrend in coming weeks under prevailing fundamentals. However, quality of summer crop got affected with early arrival of monsoon and it is capping uptrend in cash moong market. Overall trend seems weak in the short to medium term. Locusts attack in parts of Jaisalmer and Barmer has been reported. However, loss is not enough to affect overall size of summer crop.***
- ***Cash pulses market traded weak taking clue from weak futures, increasing kharif area and good rains fall in growing regions. Chana, tur, urad and moong and lentils traded down by Rs 50 to 100 per qtl. Weak demand from bulk buyers, likely higher import in July and Aug have weakened inner tone in the market. Liquidity crunch too is disrupting normal course of trade at this point of time. Festive season is about to start and it may give some needed support to cash pulses market. New kharif crop would start hitting the market by Aug end. Overall tone seems weak in the near term.***

### Previous Update:

- ***Uncertainty looms large in cash chana market even in mid-July when festive season starts. Bears seems on driver's seat right now in futures market. Demand in physical market is weak. However, stockiest have slowed down selling at lower level. Sluggish demand, weak futures, commencement of selling by Nafed from 1<sup>st</sup> July-2020, higher availability of chana in central pool and planning of free distribution of 1kg chana per family per month till November would not help to push up cash chana market in the near to medium term. Dal mills are selling dal at discounted price as fundamental remains weak. Chana traded at Rs 4100-4150 in Delhi market. It may decrease by Rs100 more.***
- ***Sowing of Kharif pulses is higher this year. Urad sowing is quite higher this year in MP, MH and UP so far. Overall, area is up by 12.7 lakh ha and the highest coverage was reported in MP at 8.89 lakh ha against 2.53 lakh ha last year. Normal area under kharif urad is 30.77 lakh ha. Farmers have covered 19.79 lakh so far this year. Overall coverage is expected to increase by 1 lakh ha from last year to 40.50 lakh ha. As per AW preliminary estimate kharif urad production may touch 18.60 lakh MT under normal condition. If weather remains favorable area may cross 40.5 lakh ha too.***
- ***Market sources say that Myanmar has around 1.5 to 1.75 lakh MT balance stock. Farmers may reduce urad area as moong would give them better returns. New urad crop would hit Indian market in Sept while Myanmar crop would be ready in Feb-2021. Agriwatch expects one to two round of firmness before new crop hit the market in Sept. Stake holders should retain stock by the end of this month and when cash market moves up, they should start releasing stock. Import volume is expected to be higher in July and Aug too.***
- ***Steady to slightly firm trend prevailed in tur cash market. It traded at Rs5800-6000 in Gulberga market depending on quality of the crop. At this level demand may get affected as import volume is expected to increase in July and Aug-2020. As Myanmar is offering tur at \$ 675 per tonne basis Indian ports, correction at this level is expected. Farmers have planted tur in higher area so far. Overall area is bound to cross 48 to 49 lakh ha this year. Production has been pegged at 38 to 39 lakh MT under normal condition. If weather remains favorable, it may move up to 40 lakh MT.***

- **Peas import remains almost halted at this point of time and so availability too is lower.** In global market peas market is volatile while it is steady in domestic market. As prices are ruling higher demand for peas declined considerably in last two -three months. There is no hope for improvement in demand. In Mumbai market it is being traded at Rs5800-5900 while in Kolkatta it is being traded at Rs5600-5700. In Kanpur market it traded at Rs 5000. demand for matar dal is weak. Range bound movement is expected this week.
- **Importers have restricted buying of masur from Canada from the third week of June.** Likely lower import volume in July and decreasing arrival flow from Mungawali, Ganjvasoda, Sagar and Bhopal in domestic market may push up masur price in coming weeks. Around 30 to 40 thousand MT is expected in July while buyers of around 50000-60000MT are ready to buy. It means higher demand against lower supply. Supply shortage is bound to support masur market fundamental. Even nased is unable to buy masur this year as prices are ruling above MSP. Even import duty reduction of 20 % is unable to cool down price as suppliers' countries like Canada and Australia had increased their quotes accordingly on same date. There is a shortage of masur at ports like Mumbai and Mundra.

#### **International Market Update:**

- **Global Chickpea markets traded almost unchanged at previous week level despite lower crop** size in net exporting countries this year. Processors and exporters are inactive this year for bulk buying. Crop condition in US and Australia is good so far. In US 79% crop condition was reported good to excellent while 20% was rated average to fair in Montana. The condition of chickpea crop in Washington state started the week with 80% rated in good to excellent condition and 16% fair, while Idaho reported 82% of fields were good to excellent and 16% fair.
- **Canada exported 4 lakh MT yellow peas in May-2020, it is the highest volume in last eight months.** The biggest buyer was China who brought around 60% while B, desh purchased 31% yellow peas. Peas export from Canada increased by 22% in last 10 months. It is higher by 15.4% from 5 years average. Overall, export from Canada is expected to touch at 36.5 lakh tonne throughout the season. Canada has exported 32.4 lakh MT peas so far in the season. It was 26.55 lakh MT last year.
- **USDA and Statistics Canada has released sowing data for lentils this week.** As expected area was bound to increase in Canada considerably while a modest increase was expected in US. Area coverage in all classes of lentils is expected to jump from 3.78 to 4.233 million acres in Canada, while U.S. farmers only increased area 1% to 492,000 acres. US farmers have lost interest in lentils farming this year. The share of red lentils area in Canada increased from 62 to 69% this year. Good demand for red lentils encouraged farmers to go for more sowing of red lentils this year in Canada.
- **Global chickpea markets continued to trade firm on reports of lower area coverage in Argentina this year.** Shortage of kabuli chana seems to loom large in the medium to long term. The main reason behind it is said to be tight supply side in India and Mexico. It has given support to medium caliber markets. Area of medium caliber chickpea has decreased in Canada and US too this year. The USDA and Statistics Canada pegging combined area at 602,000 acres, down from 843,000 last year and the record 1.3 million sown in 2018.
- **Dry peas export from Canada is expected to increase from 32.70 lakh MT to 36.50 lakh MT in 2019-20 and it may decrease to 34.00 lakh MT in 2020-21.** For 2020-21, it is preliminary estimate as crop sowing has just ended in mid June-2020. China, India and B, desh have been top buyers of dry peas in 2019-20 and the increased volume of total export shws the same. Even import figure is up from 62 to 72 thousand toone in 2019-20. It may decrease to 60 thousand MT in 2020-21.
- **Dry peas production in Canada is expected to increase from 35.81 lakh MT in 2018-19 to 42.37 lakh MT in 2019-20.** Based on preliminary area and yield estimate production in 2020-21 may increase slightly from 42.37 to 42.75 lakh MT. Seeded area in 2020-21 is 1732 thousand ha in 2020-21 against 1753 thousand ha in 2019-20. The yield of dry peas is expected to increase this year from 2.48 to 2.51 tonne per ha in 2020-21.
- **Lentils stock in Australia is decreasing fast as bulk shipment to B, desh continues with next three months forward deal was heard.** Old crop of lentils would not be available by the beginning of the new season. Forward quotes have been heard at \$700-800 per MT, but limited quantity limits the deal too. B, desh has been buying 20,000 MT red

small lentils per month. It may continue next three months. Australia exported 80,000 MT lentils in March and big volume export continues in April and May too. So old stock is depleting fast. As prices are moving up, area under lentils may increase by 10% this year. New lentils quotes are \$650-700.

- **Moong harvesting is on in Australia .It is almost two third over in Queensland and northern NSW .**Quality of moong is said to be good. Mungbean values have steadied at \$1500/t for No. 1 grade, \$1400/t for manufacturing and \$1300/t for processing as per Central grain Asia report. Quantity of grade -1 moong is higher .China is the biggest buyer of Australian moong. Some buying interest from India too has been seen. Indian millers can also buy moong from Australia if they get license. The central Queensland mung bean harvest is well advanced, and will finish next month.
- **Australia is going to plant biggest chickpeas crop in comparison to last three years.** Planting continues in Queensland and NSW. As moisture level in the field is good, farmers are increasing area under chickpeas. As top level soil moisture is lower, farmers are using wheat land for chickpeas planting. Forward delivery for October onward has been heard at \$ 630 per MT. New chickpeas crop may attract higher value. Value of new crop may be affected by any further hiccups caused by COVID-19. It may pressurize Chickpeas price.
- **As per latest report by Canada stats MY 2019-20 may end up with 3 lakh MT masur stock.** Sowing in new season i.e 2020-21 is almost over and under prevailing condition 21.5 lakh MT production is expected. If we assume 50,000 MT import in new season, it hints that total availability would be around 25 lakh MT. New crop is expected to hit market in Sep. As India has slashed duty by 20 % to 10%, Exporters in Canada has increased quotes accordingly. So, Indian importers are unlikely to gain benefit in import. Emerging situation is not favorable for import and Indian importers would not be able to import much masur till August. New quotes in Canada is \$670 per MT. Actually Canadian fig is doubtful and it seems manipulation here. So, exporters always take advantage of change in duty structure.

**Daily Outlook:** -Pulses are likely to trade steady to slightly weak.
