

## Pulses Domestic Fundamentals:

### Today's Update:

- **Kharif Pulses area coverage has increased by 25.73 % to 99.71 lakh ha. in the ongoing season** so far. It was 79.30 lakh ha last year as on 24th July-2020..The reason behind higher area coverage is mainly attributed to good monsoon rains and an encouraging MSP. Higher MSP for kharif pulses, good rains and smooth procurement drive have encouraged farmers to grow more pulses this season. As weather is favorable, kharif area is bound to increase by 10 to 15% this year. Farmers have covered 36.80 against 28.10 lakh ha under tur, 30.14 against 25.51 lakh ha under urad, 25.96 against 19.45 lakh ha under moong and 6.76 against 6.20 lakh ha under other pulses. See details at page no -3.
- **Monsoon rainfall gets weaker again in Rajasthan, Haryana, Punjab and in North Indian states.** Temperature is likely to increase to 40 degree. If revival gets delayed by 10 days (unlikely), good pace of kharif sowing may be affected. Apart from it 8 Indian states are facing flooding and crop loss assessment is on. Rice and oilseeds crops are said to be affected.
- **Pressure on chana cash market seems building up once again as demand for besan remains unexpectedly low** due to impact of COVID-19. Continuous lock down in April, May & June and restricted lock down in July have affected besan demand from hotel Industry, restaurants and railways stations and its nearby hotels. Despite 21.5 lakh MT procurement by Nafed against the target of 22.5 lakh MT, chana market is unable to get support at current level. Prices in markets are ruling Rs3800-4100 and it is almost Rs800-1000 lower than MSP. Bumper production this year, higher import flow from LDC countries and hefty carry in would not allow chana market to trade up in coming months. Under prevailing condition stake holders should avoid retaining stock for long time. Demand would continue to remain weak. Carry in is going to increase by 48% to 26.94 lakh MT.

### Previous Update:

- **Prospects Of Higher Kharif Pulses Production Would Help To Match Govt.'s Target Of 25.6 MMT** For 2020-21 With early start of monsoon this year and good rains fall up to now and hope for better rains in Aug and Sep have increased hope for bumper pulses production this year. Kharif area under pulses is running ahead by 32.33 %. Overall area seems to increase by 10 to 15 % by the end of kharif sowing season. Farmers are active with full capacity. The government has set a target of 25.6 million tonnes of pulses production this year. This target is 11.2 percent more than the estimated output last year. Overall pulses area so far is up by 32%. Tur, Urad and Moong sowing are up by 38, 43 and 31% so far. Under prevailing condition production of pulses is likely to match govt.'s target.
- **India's annual requirement of pulses stands at 25-26 million tonnes. Pulses are mainly produced** in Karnataka, Andhra Pradesh, and Madhya Pradesh. In these states, good rains helped to increase the production. The current Kharif season accounts for about 30 percent of whole pulses production in the country.
- **Kharif Pulses area coverage has increased by 32.33% to 81.65 lakh ha. in the ongoing season** so far. It was 61.70 lakh ha last year as on 17th July-2020..The reason behind higher area coverage is mainly attributed to good monsoon rains and an encouraging MSP. Higher MSP for kharif pulses, good rains and smooth procurement drive have encouraged farmers to grow more pulses this season. As weather is favorable, kharif area is bound to increase by 10 to 15% this year. Farmers have covered 30.84 against 22.39 lakh ha under tur, 25.43 against 17.77 lakh ha under urad, 20.98 against 16.10 lakh ha under moong and 4.37 against 5.39 lakh ha under other pulses. See details at page no -3.
- **Sowing of Kharif pulses is higher this year. Urad sowing is quite higher this year in MP, MH and UP** so far. Overall, area is up by 12.7 lakh ha and the highest coverage was reported in MP at 8.89 lakh ha against 2.53 lakh ha last year. Normal area under kharif urad is 30.77 lakh ha. Farmers have covered 19.79 lakh so far this year. Overall coverage is expected to increase by 1 lakh ha from last year to 40.50 lakh ha. As per AW preliminary estimate kharif urad production may touch 18.60 lakh MT under normal condition. If weather remains favorable area may cross 40.5 lakh ha too.

- **Market sources say that Myanmar has around 1.5 to 1.75 lakh MT balance stock. Farmers may reduce urad area as moong would give them better returns. New urad crop would hit Indian market in Sept while Myanmar crop would be ready in Feb-2021. Agriwatch expects one to two round of firmness before new crop hit the market in Sept. Stake holders should retain stock by the end of this month and when cash market moves up, they should start releasing stock. Import volume is expected to be higher in July and Aug too.**
- **Steady to slightly firm trend prevailed in tur cash market. It traded at Rs5800-6000 in Gulberga market depending on quality of the crop. At this level demand may get affected as import volume is expected to increase in July and Aug-2020. As Myanmar is offering tur at \$ 675 per tonne basis Indian ports, correction at this level is expected. Farmers have planted tur in higher area so far. Overall area is bound to cross 48 to 49 lakh ha this year. Production has been pegged at 38 to 39 lakh MT under normal condition. If weather remains favorable, it may move up to 40 lakh MT..**

#### **International Market Update:**

- **Global pulses consumption is forecast to hit 96.5 million MT by 2025. Canada is expected to maintain its position as the leading pulses exporters with export of 7MMT by then. Australia and Myanmar may end with 2.3 and 1.7 MMT pulses export. Indian import dependency would decrease to some extent if pulses production continues to increase.**
- **Global Chickpea markets traded almost unchanged at previous week level despite lower crop size in net exporting countries this year. Processors and exporters are inactive this year for bulk buying. Crop condition in US and Australia is good so far. In US 79% crop condition was reported good to excellent while 20% was rated average to fair in Montana. The condition of chickpea crop in Washington state started the week with 80% rated in good to excellent condition and 16% fair, while Idaho reported 82% of fields were good to excellent and 16% fair.**
- **Canada exported 4 lakh MT yellow peas in May-2020, it is the highest volume in last eight months. The biggest buyer was China who brought around 60% while B, desh purchased 31% yellow peas. Peas export from Canada increased by 22% in last 10 months. It is higher by 15.4% from 5 years average. Overall, export from Canada is expected to touch at 36.5 lakh tonne throughout the season. Canada has exported 32.4 lakh MT peas so far in the season. It was 26.55 lakh MT last year.**
- **USDA and Statistics Canada has released sowing data for lentils this week. As expected area was bound to increase in Canada considerably while a modest increase was expected in US. Area coverage in all classes of lentils is expected to jump from 3.78 to 4.233 million acres in Canada, while U.S. farmers only increased area 1% to 492,000 acres. US farmers have lost interest in lentils farming this year. The share of red lentils area in Canada increased from 62 to 69% this year. Good demand for red lentils encouraged farmers to go for more sowing of red lentils this year in Canada.**
- **Global chickpea markets continued to trade firm on reports of lower area coverage in Argentina this year. Shortage of kabuli chana seems to loom large in the medium to long term. The main reason behind it is said to be tight supply side in India and Mexico. It has given support to medium caliber markets. Area of medium caliber chickpea has decreased in Canada and US too this year. The USDA and Statistics Canada pegging combined area at 602,000 acres, down from 843,000 last year and the record 1.3 million sown in 2018.**
- **Dry peas export from Canada is expected to increase from 32.70 lakh MT to 36.50 lakh MT in 2019-20 and it may decrease to 34.00 lakh MT in 2020-21. For 2020-21, it is preliminary estimate as crop sowing has just ended in mid June-2020. China, India and B, desh have been top buyers of dry peas in 2019-20 and the increased volume of total export shows the same. Even import figure is up from 62 to 72 thousand tonnes in 2019-20. It may decrease to 60 thousand MT in 2020-21.**
- **Dry peas production in Canada is expected to increase from 35.81 lakh MT in 2018-19 to 42.37 lakh MT in 2019-20. Based on preliminary area and yield estimate production in 2020-21 may increase slightly from 42.37 to 42.75 lakh MT. Seeded area in 2020-21 is 1732 thousand ha in 2020-21 against 1753 thousand ha in 2019-20. The yield of dry peas is expected to increase this year from 2.48 to 2.51 tonne per ha in 2020-21.**

- **Lentils stock in Australia is decreasing fast as bulk shipment to B,desh continues with next three months forward deal was heard .Old crop of lentils would not be available by the beginning of the new season. Forward quotes have been heard at \$700-800 per MT, but limited quantity limits the deal too. B,desh has been buying 20,000 MT red small lentils per month.It may continue next three months. Australia exported 80,000 MT lentils in March and big volume export continues in April and May too. So old stock is depleting fast. As prices are moving up , area under lentils may increase by 10% this year. New lentils quotes are \$650-700.**
- **Moong harvesting is on in Australia .It is almost two third over in Queensland and northern NSW .Quality of moong is said to be good. Mungbean values have steadied at \$1500/t for No. 1 grade, \$1400/t for manufacturing and \$1300/t for processing as per as per Central grain Asia report. Quantity of grade -1moong is higher .China is the biggest buyer of Australian moong.Some buying interest from India too has been seen. Indian millers can also buy moong from Australia if they get license. The central Queensland mung bean harvest is well advanced, and will finish next month.**
- **Australia is going to plant biggest chickpeas crop in comparison to last three years. Planting continues in Queensland and NSW. As moisture level in the field is good, farmers are increasing area under chickpeas. As top level soil moisture is lower, farmers are using wheat land for chickpeas planting. Forward delivery for October onward has been heard at \$ 630 per MT. New chickpeas crop may attract higher value. Value of new crop may be affected by any further hiccups caused by COVID-19.It may pressurize Chickpeas price.**
- **As per latest report by Canada stats MY 2019-20 may end up with 3 lakh MT masur stock. Sowing in new season i.e 2020-21 is almost over and under prevailing condition 21.5 lakh MT production is expected. If we assume 50,000MT import in new season, it hints that total availability would be around 25 lakh MT. New crop is expected to hit market in Sep. As India has slashed duty by 20 % to 10%, Exporters in Canada has increased quotes accordingly. So, Indian importers are unlikely to gain benefit in import. Emerging situation is not favorable for import and Indian importers would not be able to import much masur till August. New quotes in Canada is \$670 per MT. Actually Canadian fig is doubtful and it seems manipulation here. So , exporters always take advantage of change in duty structure.**

**Daily Outlook:** -Pulses are likely to trade steady to slightly weak.
