

Pulses Domestic Fundamentals:

Today's Update:

- ***Kharif pulses sowing has entered in last phase now. Indian farmers have covered 42.5 lakh ha so far against 40.23 lakh ha last year till date. It is almost 6 % higher than last year and 96% of normal as on 7th, Aug 2020. Urad area too is higher by 6.64 % to 34.55 lakh ha so far against 32.4 lakh ha last year. It is higher by 97 % of normal. Indian farmers have showed more interest in moong farming and they have shown 32.13 lakh ha so far against 27.54 lakh ha last year. It is higher by 16.67 % from last year and higher by 5% of normal as on 7th Aug-2020. Kulthi sowing is down by 16 % at 0.06 lakh ha so far. Farmers have covered 10.36 lakh ha area under other pulses against 14.53 lakh ha last year. Total area under kharif pulses is higher by 4.21% to 119.59 lakh ha. Farmers have planted kharif pulses in 92% area of normal so far. Normal area is 128.88 lakh ha.***

Previous Update:

- ***Recovery in cash chana market seems temporary as there is no support from demand. Firmness may continue if dal demand improves. As of now demand remains flat and mills are buying based on immediate needs. Under prevailing condition chana may trade up 100-150 for shorter period and then will decrease again due to lack of demand support. If Nafed starts selling chana near 4200-4300, cash market would not cross Rs4500. Kharif crop would start hitting the market by end August and Nafed would have to procure again. So, requirements of storage space would not allow Nafed to hold stock for longer period. Under prevailing condition chana may trade at Rs4300-4400 in Delhi market.***
- ***Firmness in kabuli chana is unlikely at this point of time as supply of light quality kabuli continues. So firmness is possible once poor quality kabuli is consumed. Around 70% kabuli is grown in states of M.P. & Karnataka. The rest 25% is grown in MH and UP. The rest 5 % is grown in other states. Crop was poor this year due to higher rains during growth time. Normally India grows 18-19 lakh MT Kabuli. However this year is has decreased to 16 to 17 lakh MT. Import volume too is low. So, improvement can be expected from August end. Right now it is being traded at Rs4700-5000 per qtl.***
- ***Higher area coverage so far for tur this year and poor offtake in cash market have affected normal sentiments. Despite lower arrival and ongoing festive season bulk buyers are unwilling to buy at this point of time. Imported tur (lemon) was quoted at \$660 per MT at Mumbai. Traders have quoted new tur price at Rs5400 while old at Rs5200 per qtl. Importers are still waiting for import license. Agriwatch expects improvement in demand in coming weeks and slight recovery in tur price. If govt. issues license by end Aug, imported tur would hit market in Sept. Farmers have covered 8 percent higher area this year. Around 93 percent area of normal has been covered. It may end at 44 to 45 lakh ha under prevailing weather condition. Crop condition of tur is good so far.***
- ***Matar (Peas) stock at port is almost exhausted now amid decreasing stock of local crop. As demand for besan is weak, peas too is facing demand issue. Matar is ruling higher than chana, so demand for matar dal, besan and peas has decreased. Govt. has not issued any license for matar import. So there is no activity in matar market at this point of time. It is being traded at 5900 in Mumbai while Rs5850 at Kolkatta. Demand is expected to be normal in the first week of Aug.***
- ***Slashed import duty on masur from 30 to 10 percent in June and revised time frame for import up to 31st of August-2020 have started impacting market sentiments in local physical markets now. Import volume from Canada and Australia has started increasing at various ports of India now. Importers can import at least 3 lakh MT masur in July and August taking advantage of lower duty. Import volume from US would be limited as duty applicable on US masur is 30 % after deduction of 20 points. If higher volume of import on reduced duty affect domestic market price more than common expectation, govt. would prefer to discontinue it after August. If prices rule near current level (unlikely), govt may extend lower duty structure beyond Aug. Under prevailing condition masur market is bound to decrease by Rs 400 from current level.***

International Market Update:

- **Lentil stocks on hand are at 18.4% of supply. This is nearly 10% lower than the same period last year.** Actual stocks on hand of 82,824 MT is still significantly higher than the 5 year average of 76,857 MT. Total usage of 366,237 is also pretty close to the five year period of 2015-16 through 2019-20.
- **The actual acreage for dry peas did change a bit from previous expectations. While Idaho acreage did not change, Montana planted less than expected, but still a 15% decrease from last year. Nebraska increased dry pea production by 16%, while North Dakota stayed true to predictions, decreasing field pea planting by 23%. See updated table at the end page.**
- **Global pulses consumption is forecast to hit 96.5 million MT by 2025. Canada is expected to maintain its position as the leading pulses exporters with export of 7MMT by then. Australia and Myanmar may end with 2.3 and 1.7 MMT pulses export. Indian import dependency would decrease to some extent if pulses production continues to increase.**
- **Global Chickpea markets traded almost unchanged at previous week level despite lower crop size in net exporting countries this year. Processors and exporters are inactive this year for bulk buying. Crop condition in US and Australia is good so far. In US 79% crop condition was reported good to excellent while 20% was rated average to fair in Montana. The condition of chickpea crop in Washington state started the week with 80% rated in good to excellent condition and 16% fair, while Idaho reported 82% of fields were good to excellent and 16% fair.**
- **Canada exported 4 lakh MT yellow peas in May-2020, it is the highest volume in last eight months. The biggest buyer was China who brought around 60% while B, desh purchased 31% yellow peas. Peas export from Canada increased by 22% in last 10 months. It is higher by 15.4% from 5 years average. Overall, export from Canada is expected to touch at 36.5 lakh tonne throughout the season. Canada has exported 32.4 lakh MT peas so far in the season. It was 26.55 lakh MT last year.**
- **USDA and Statistics Canada has released sowing data for lentils this week. As expected area was bound to increase in Canada considerably while a modest increase was expected in US. Area coverage in all classes of lentils is expected to jump from 3.78 to 4.233 million acres in Canada, while U.S. farmers only increased area 1% to 492,000 acres. US farmers have lost interest in lentils farming this year. The share of red lentils area in Canada increased from 62 to 69% this year. Good demand for red lentils encouraged farmers to go for more sowing of red lentils this year in Canada.**
- **Global chickpea markets continued to trade firm on reports of lower area coverage in Argentina this year. Shortage of kabuli chana seems to loom large in the medium to long term. The main reason behind it is said to be tight supply side in India and Mexico. It has given support to medium caliber markets. Area of medium caliber chickpea has decreased in Canada and US too this year. The USDA and Statistics Canada pegging combined area at 602,000 acres, down from 843,000 last year and the record 1.3 million sown in 2018.**
- **Dry peas export from Canada is expected to increase from 32.70 lakh MT to 36.50 lakh MT in 2019-20 and it may decrease to 34.00 lakh MT in 2020-21. For 2020-21, it is preliminary estimate as crop sowing has just ended in mid June-2020. China, India and B, desh have been top buyers of dry peas in 2019-20 and the increased volume of total export shows the same. Even import figure is up from 62 to 72 thousand tonnes in 2019-20. It may decrease to 60 thousand MT in 2020-21.**
- **Dry peas production in Canada is expected to increase from 35.81 lakh MT in 2018-19 to 42.37 lakh MT in 2019-20. Based on preliminary area and yield estimate production in 2020-21 may increase slightly from 42.37 to 42.75 lakh MT. Seeded area in 2020-21 is 1732 thousand ha in 2020-21 against 1753 thousand ha in 2019-20. The yield of dry peas is expected to increase this year from 2.48 to 2.51 tonne per ha in 2020-21.**
- **Lentils stock in Australia is decreasing fast as bulk shipment to B, desh continues with next three months forward deal was heard. Old crop of lentils would not be available by the beginning of the new season. Forward quotes have been heard at \$700-800 per MT, but limited quantity limits the deal too. B, desh has been buying 20,000 MT red small lentils per month. It may continue next three months. Australia exported 80,000 MT lentils in March and big**

volum eexport continues in April ad Mat too. So old stock is depleting fast. As prices are moving up , area under lentils may increase by 10% this year. New lentils quotes are \$650-700.

- **Moong harvesting is on in Australia .It is almost two tjird over in Queensland and northern NSW .Quality of moong is said to be good. Mungbean values have steadied at \$1500/t for No. 1 grade, \$1400/t for manufacturing and \$1300/t for processing as per as per Central grain Asia report. Quantity of grade -Imoong is higher .China is the biggest buyer of Australian moong.Some buying interest from India too hasbeen seen. Indian millers can also buy moong from Australia if the y get license. The central Queensland mung bean harvest is well advanced, and will finish next month.**
- **Australia is going to plant biggest chickpeas crop in comparison to last three years. Planting continues in Queensland and NSW. As moisture level in the field is good, farmers are increasing area under chickpeas. As top level soil moisture is lower,armers are using wheat land for chickpeas planting. Forward delivery for October onward has been heard at \$ 630 per MT. New chickpeas crop may attract higher value. Value of new crop may be affected by any further hiccups caused by COVID-19.It may pressurize Chickpeas price.**

Daily Outlook: -Pulses are likely to trade steady to slightly weak.
