

Pulses Domestic Fundamentals:

Today's Update:

- **The DGFT working under commerce ministry has cancelled the license of 56 dal mills on the ground of submitting falls information regarding dal mills.** These dal millers are importing pulses giving wrong information. Imported stock of these dal mills have been seized and their licenses too have been cancelled from immediate effect. All these millers would not be able to import pulses even in future now. Market considers it a good step. Now importers would restrain themselves to submit wrong information for import.
- **With good ongoing rains in major kharif pulses growing belts kharif pulses sowing is now nearing to an end.** Farmers have covered 4.21 % higher area to 119.59 lakh ha so far. Under prevailing condition bumper kharif production seems on the card now. However, there is some stress in parts of Gujarat, Uttar Pradesh, Madhya Pradesh and Raj. If current phase of monsoon rains covers these parts in Aug, record production is possible as there is no news of any major infestation so far from any states. The only concern at this point of time (when kharif harvesting is about to begin) is occurrence of higher rainfall. It may affect standing crop as well as quality of the crop. Despite some recovery in price pressure seems building up on price.
- **Pulses import during the first three months, starting from April-2020, has increased considerably.** India imported 7810 MT Kabuli c hana, 5735 MT desi chana, over 1.5 lakh MT urad, 5760 MT moong, 40 thousand MT Rajma, 6603 MT lobia, 49,000 MT tur and 3.27 lakh MT masur during April to July. Masur import volume this year may exceed from 7.5 lakh MT. Even chana fig from LDC countries may cross 4 lakh MT. Higher volume of masur import may pressurize masur price and govt. may decide to withdraw 20 % relaxation in import duty after 31st August-2020.

Previous Update

- **Masur import at reduced duty is likely to cross 4.5 lakh MT by the end of this month.** Vessels are on the way to Indian ports from Canada and Australia. Maximum quantity (around 80%) has been purchased from Canada while the rest 20% from other countries including Australia. Bad weather condition during growing stages reduced yield in India and it decreased by 8 to 10 percent to 12.70 lakh MT against normal consumption of 20 lakh MT. As import remained restricted at 30% duty, prices of masur started increasing in the market. After reduction in import duty import flow has started increasing and import volume in July and Aug combined may cross 4.5 lakh MT. It would pressurize prices in coming weeks. If govt. extends import time with reduced duty (unlikely), prices of masur may decrease considerably. Masur is being traded at Rs5600-5700 in domestic market while imported masur is being quoted at Rs 5400-5450.
- **With favorable weather condition kharif urad area has increased by 6.64% from last year.** Farmers have covered 34.55 lakh ha so far against 32.4 lakh ha last year. Normal kharif area for urad is 35.50 lakh ha. Sowing has entered in last phase now. Under normal condition Agriwatch's preliminary production estimate for kharif season is 18.60 lakh ha. With estimated production of 6.26 lakh MT in rabi season, it brings total to 24.86 lakh MT. The new season started with 4.44 lakh MT carryin.. So total supply seems at comfortable level with 4 lakh MT allowed import for the year. Expected higher import in July and Aug and good crop condition would pressurize cash market in coming weeks.
- **Kharif pulses sowing has entered in last phase now. Indian farmers have covered 42.5 lakh ha so far against 40.23 lakh ha last year till date.** It is almost 6 % higher than last year and 96% of normal as on 7th, Aug 2020. Urad area too is higher by 6.64 % to 34.55 lakh ha so far against 32.4 lakh ha last year. It is higher by 97 % of normal. Indian farmers have showed more interest in moong farming and they have shown 32.13 lakh ha so far against 27.54 lakh ha last year. It is higher by 16.67 % from last year and higher by 5% of normal as on 7th Aug-2020. Kulthi sowing is down by 16 % to 0.06 lakh ha so far. Farmers have covered 10.36 lakh ha area under other pulses against 14.53 lakh ha last year. Total area under kharif pulses is higher by 4.21% to 119.59 lakh ha. Farmers have planted kharif pulses in 92% area of normal so far. Normal area is 128.88 lakh ha.
- **Recovery in cash chana market seems temporary as there is no support from demand side.** Firmness may continue if dal demand improves. As of now demand remains flat and mills are buying based on immediate needs. Under prevailing condition chana may trade up 100-150 for shorter period and then will decrease again due to lack of

demand support. If Nafed starts selling chana near 4200-4300, cash market would not cross Rs4500. Kharif crop would start hitting the market by end August and Nafed would have to procure again. So, requirements of storage space would not allow Nafed to hold stock for longer period. Under prevailing condition chana may trade at Rs4300-4400 in Delhi market.

- **Higher area coverage so far for tur this year and poor offtake in cash market have affected normal sentiments.** Despite lower arrival and ongoing festive season bulk buyers are unwilling to buy at this point of time. Imported tur (lemon) was quoted at \$660 per MT at Mumbai. Traders have quoted new tur price at Rs5400 while old at Rs5200 per qtl. Importers are still waiting for import license. Agriwatch expects improvement in demand in coming weeks and slight recovery in tur price. If govt. issues license by end Aug, imported tur would hit market in Sept. Farmers have covered 8 percent higher area this year. Around 93 percent area of normal has been covered. It may end at 44 to 45 lakh ha under prevailing weather condition. Crop condition of tur is good so far.
- **Matar (Peas) stock at port is almost exhausted now amid decreasing stock of local crop.** As demand for besan is weak, peas too is facing demand issue. Matar is ruling higher than chana, so demand for matar dal, besan and peas has decreased. Govt. has not issued any license for matar import. So there is no activity in matar market at this point of time. It is being traded at 5900 in Mumbai while Rs5850 at Kolkatta. Demand is expected to be normal in the first week of Aug.

International Market Update:

- **For 2020-21, Canadian lentil seeded area rose by 11.96 % to 1.72 Mha, due to good forecasted returns compared to other crops.** It was 1.53 Mha in 2019-20. By province, Saskatchewan accounts for 90% of the lentil area, with the remainder seeded in Alberta and Manitoba. Production is forecast to increase to 2.47 MMT (2.16 MMT last year), with supply lower due to smaller carry-in stocks. Exports are forecast to be lower at 2.1 MMT. Carry-out stocks are forecast to rise to nearly 0.175 MMT. The average price for all grades and types is forecast to rise from 2019-20, with higher prices from large green and red types. It may rule in the range of \$500-530 per metric tonne throughout the year. There is an expectation that import demand in the Indian subcontinent will continue to be similar or slightly higher in 2020-21. The data has been taken from the latest update from Agriculture & Agri food Canada.
- **For 2020-21, the area seeded under chickpeas fell by 23.89% from 2019-20 to 121 thousand ha due to the lower farm gate prices received in the previous year.** It was 159 thousand ha in 2019-20. Saskatchewan is expected to account for the majority of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 200 Kt, down 20.63% from the previous year, due to lower seeded area despite higher expected yields. Supply is forecast to rise from 2019-20 to 410 Kt. Exports are forecast to rise from 105 to 125 Kt and carry-out stocks are forecast to fall from 160 to 150 Kt in 2020-21. The average price is forecast to fall marginally due to a larger world supply, with the expectation of an average grade distribution. It may hover in the range of \$455 to \$485 per tonne.
- **As per the latest update from Agriculture & Agri food Canada (AAFC) seeded area under dry peas is expected to decrease slightly by 1.76 % to 1722 thousand ha in 2020-21.** Despite lower coverage area production is expected to increase from 4.23 to 4.25 MMT in 2020-21 due to higher yield of 2.51 tonne per ha. Export volume too may decrease from 3.7 to 3.4 MMT in 2020-21. Despite higher domestic usage carryout is expected to increase from 250 to 450 Kt in 2020-21 due to lower export volume this year. Prices are expected to hover in the range of \$250 to 280 per metric tonne.
- **Lentil stocks on hand are at 18.4% of supply. This is nearly 10% lower than the same period last year.** Actual stocks on hand of 82,824 MT is still significantly higher than the 5 year average of 76,857 MT. Total usage of 366,237 is also pretty close to the five year period of 2015-16 through 2019-20.
- **The actual acreage for dry peas did change a bit from previous expectations. While Idaho acreage did not change, Montana planted less than expected, but still a 15% decrease from last year. Nebraska increased dry pea production by 16%, while North Dakota stayed true to predictions, decreasing field pea planting by 23%. See updated table at the end page.**
- **Global chickpea markets continued to trade firm on reports of lower area coverage in Argentina this year.** Shortage of kabuli chana seems to loom large in the medium to long term. The main reason behind it is said to be tight supply

side in India and Mexico. It has given support to medium caliber markets. Area of medium caliber chickpea has decreased in Canada and US too this year. The USDA and Statistics Canada pegging combined area at 602,000 acres, down from 843,000 last year and the record 1.3 million sown in 2018.

- **Lentils stock in Australia is decreasing fast as bulk shipment to B, desh continues with next three months forward deal was heard.** Old crop of lentils would not be available by the beginning of the new season. Forward quotes have been heard at \$700-800 per MT, but limited quantity limits the deal too. B, desh has been buying 20,000 MT red small lentils per month. It may continue next three months. Australia exported 80,000 MT lentils in March and big volume export continues in April and May too. So old stock is depleting fast. As prices are moving up, area under lentils may increase by 10% this year. New lentils quotes are \$650-700.
- **Moong harvesting is on in Australia. It is almost two third over in Queensland and northern NSW.** Quality of moong is said to be good. Mungbean values have steadied at \$1500/t for No. 1 grade, \$1400/t for manufacturing and \$1300/t for processing as per Central grain Asia report. Quantity of grade 1-moong is higher. China is the biggest buyer of Australian moong. Some buying interest from India too has been seen. Indian millers can also buy moong from Australia if they get license. The central Queensland mung bean harvest is well advanced, and will finish next month.
- **Australia is going to plant biggest chickpeas crop in comparison to last three years.** Planting continues in Queensland and NSW. As moisture level in the field is good, farmers are increasing area under chickpeas. As top level soil moisture is lower, farmers are using wheat land for chickpeas planting. Forward delivery for October onward has been heard at \$ 630 per MT. New chickpeas crop may attract higher value. Value of new crop may be affected by any further hiccups caused by COVID-19. It may pressurize Chickpeas price.

Daily Outlook: -Pulses are likely to trade steady to slightly firm.
