

Pulses Domestic Fundamentals:

Today's Update:

- **As per market expert view consumption of Kabuli chana in India is likely to decrease to 2.65 lakh MT this year,** around 1.5 lakh MT lower than last year.. Normally India consumes 4 to 4.25 lakh MT kabuli chana annually. The reason of lower consumption is mainly attributed to lock down, that affected consumption in hotels, restaurants, Street foods and catering services. Even export volume too has decreased from 1.15 lakh MT to 62,000MT this year. If impact of Covid-19 comes under control, demand for kabuli chana may bounce back again. As stock is lower in Mexico, import too would be difficult with 44% import duty.
- **Continuous rains in Tamil Nadu, MH and some other states and increasing impact of flooding in north** and east Indian states may damage standing crops. Quality of moong and urad crop may be affected if rains continues for three-four more days more. It may push up moong and urad price in cash market. Slower pace of urad import and fear of crop damage may support urad price at current level.
- **Kharif pulses sowing has entered in last phase now. Indian farmers have covered 124.01 lakh ha so far against 121.5lakh ha last year as on 14th Aug-2020..** It is almost 2 % higher than last year and 96% of normal till date. Tur area is up by 3.10% to 43.63 lakh ha. Urad area too is higher by 5.57 % to 35.62 lakh ha so far against 33.74lakh ha last year. Normal area is 35.53lakh ha . Indian farmers have showed more interest in moong farming and they have shown 32.92 lakh ha so far against 29.03 lakh ha last year. It is higher by 13 % from last year and higher by 8% of normal as on 14th Aug-2020. Kulthi sowing is up by 14 % at 0.08 lakh ha so far .Farmers have covered 11.76 lakh ha area under other pulses against 16.34 lakh ha last year. Farmers have planted kharif pulses in 96% area of season's normal so far. Normal area is 128.88lakh ha.

Previous Update

- **Pulses import during the first three months, starting from April-2020, has increased considerably.** India imported 7810 MT Kabuli c hana, 5735MT desi chana, over 1.5 lakh MT urad, 5760MT moong, 40 thousand MT Rajma, 6603 MT lobia, 49,000 MT tur and 3.27 lakh MT masur during April to July. Masur import volume this year may exceed from 7.5 lakh MT. Even chana fig from LDC countries may cross 4 lakh MT. Higher volume of masur import may pressurize masur price and govt . may decide to withdraw 20 % relaxation in import duty after 31st August-2020.
- **Masur import at reduced duty is likely to cross 4.5 lakh MT by the end of this month.** Vessels are on the way to Indian ports from Canada and Australia. Maximum quantity (around 80%) has been purchased from Canada while the rest 20% from other countries including Australia. Bad weather condition during growing stages reduced yield in India and it decreased by 8 to 10 percent to 12.70 lakh MT against normal consumption of 20 lakh MT. As import remained restricted at 30% duty, prices of masur started increasing in the market. After reduction in import duty import flow has started increasing and import volume in July and Aug combined may cross 4.5 lakh MT. it would pressurize prices in coming weeks. If govt. extends import time with reduced duty (unlikely), prices of masur may decrease considerably. Masur is being traded at Rs5600-5700 in domestic market while imported masur is being quoted at Rs 5400-5450.
- **With favorable weather condition kharif urad area has increased by 6.64% from last year.** Farmers have covered 34.55 lakh ha so far against 32.4 lakh ha last year. Normal kharif area for urad is 35.50 lakh ha. Sowing has entered in last phase now. Under normal condition Agriwatch's preliminary production estimate for kharif season is 18.60 lakh ha. With estimated production of 6.26 lakh MT in rabi season, it brings total to 24.86 lakh MT. The new season started with 4.44 lakh MT carryin.. So total supply seems at comfortable level with 4 lakh MT allowed import for the year. Expected higher import in July and Aug and good crop condition would pressurize cash market in coming weeks.
- **Recovery in cash chana market seems temporary as there is no support from demand side.** Firmness may continue if dal demand improves. As of now demand remains flat and mills are buying based on immediate needs. Under prevailing condition chana may trade up 100-150 for shorter period and then will decrease again due to lack of demand support. If Nafed starts selling chana near 4200-4300, cash market would not cross Rs4500. Kharif crop would start hitting the market by end August and Nafed would have to procure again. So, requirements of storage

space would not allow Nafed to hold stock for longer period. Under prevailing condition chana may trade at Rs4300-4400 in Delhi market.

- **Matar (Peas) stock at port is almost exhausted now amid decreasing stock of local crop.** As demand for besan is weak, peas too is facing demand issue. Matar is ruling higher than chana, so demand for matar dal, besan and peas has decreased. Govt. has not issued any license for matar import. So there is no activity in matar market at this point of time. It is being traded at 5900 in Mumbai while Rs5850 at Kolkatta. Demand is expected to be normal in the first week of Aug.

International Market Update:

- **Chickpea markets were traded flat in limited trading activity during the review week.** Canada's harvest has yet to begin, while it started last week in the U.S. Pacific northwest and Montana. Production in Russia is expected to increase this year while production in Argentina may decrease by 50%. Production in Australia may increase considerably. Its variety is desi type which may not compete with North American and Russian crops.
- **For 2020-21, Canadian lentil seeded area rose by 11.96 % to 1.72 Mha, due to** good forecasted returns compared to other crops. It was 1.53 Mha in 2019-20. By province, Saskatchewan accounts for 90% of the lentil area, with the remainder seeded in Alberta and Manitoba. Production is forecast to increase to 2.47 MMT (2.16 MMT last year), with supply lower due to smaller carry-in stocks. Exports are forecast to be lower at 2.1 MMT. Carry-out stocks are forecast to rise to nearly 0.175 MMT. The average price for all grades and types is forecast to rise from 2019-20, with higher prices from large green and red types. It may rule in the range of \$500-530 per metric tonne throughout the year. There is an expectation that import demand in the Indian subcontinent will continue to be similar or slightly higher in 2020-21. The data has been taken from the latest update from Agriculture & Agri food Canada.
- **For 2020-21, the area seeded under chickpeas fell by 23.89% from 2019-20 to 121 thousand ha** due to the lower farm gate prices received in the previous year. It was 159 thousand ha in 2019-20. Saskatchewan is expected to account for the majority of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 200 Kt, down 20.63% from the previous year, due to lower seeded area despite higher expected yields. Supply is forecast to rise from 2019-20 to 410 Kt. Exports are forecast to rise from 105 to 125 Kt and carry-out stocks are forecast to fall from 160 to 150 Kt in 2020-21. The average price is forecast to fall marginally due to a larger world supply, with the expectation of an average grade distribution. It may hover in the range of \$455 to \$485 per tonne.
- **As per the latest update from Agriculture & Agri food Canada (AAFC) seeded area under dry peas is expected to** decrease slightly by 1.76 % to 1722 thousand ha in 2020-21. Despite lower coverage area production is expected to increase from 4.23 to 4.25 MMT in 2020-21 due to higher yield of 2.51 tonne per ha. export volume too may decrease from 3.7 to 3.4 MMT in 2020-21. Despite higher domestic usage carryout is expected to increase from 250 to 450 Kt in 2020-21 due to lower export volume this year. Prices are expected to hover in the range of \$250 to 280 per metric tonne.
- **Lentil stocks on hand are at 18.4% of supply. This is nearly 10% lower than the same period last year.** Actual stocks on hand of 82,824 MT is still significantly higher than the 5 year average of 76,857 MT. Total usage of 366,237 is also pretty close to the five year period of 2015-16 through 2019-20.
- **The actual acreage for dry peas did change a bit from previous expectations. While Idaho acreage did not change,** Montana planted less than expected, but still a 15% decrease from last year. Nebraska increased dry pea production by 16%, while North Dakota stayed true to predictions, decreasing field pea planting by 23%. See updated table at the end page.
- **Global chickpea markets continued to trade firm on reports of lower area coverage in Argentina this year.** Shortage of kabuli chana seems to loom large in the medium to long term. The main reason behind it is said to be tight supply side in India and Mexico. It has given support to medium caliber markets. Area of medium caliber chickpea has

decreased in Canada and US too this year. The USDA and Statistics Canada pegging combined area at 602,000 acres, down from 843,000 last year and the record 1.3 million sown in 2018.

- **Lentils stock in Australia is decreasing fast as bulk shipment to B,desh continues with next three months forward deal was heard .Old crop of lentils would not be available by the beginning of the new season. Forward quotes have been heard at \$700-800 per MT, but limited quantity limits the deal too. B,desh has been buying 20,000 MT red small lentils per month.It may continue next three months. Australia exported 80,000 MT lentils in March and big volume export continues in April and May too. So old stock is depleting fast. As prices are moving up , area under lentils may increase by 10% this year. New lentils quotes are \$650-700.**
- **Australia is going to plant biggest chickpeas crop in comparison to last three years. Planting continues in Queensland and NSW. As moisture level in the field is good, farmers are increasing area under chickpeas. As top level soil moisture is lower, farmers are using wheat land for chickpeas planting. Forward delivery for October onward has been heard at \$ 630 per MT. New chickpeas crop may attract higher value. Value of new crop may be affected by any further hiccups caused by COVID-19.It may pressurize Chickpeas price.**

Daily Outlook: -Pulses are likely to trade steady to slightly firm.
