

### Pulses Domestic Fundamentals:

#### Today's Update:

- **Govt.'s decision regarding import duty on masur, import time line limit for urad and delay in** issuing import license for tur millers seems going in favor of pulses cash market. Applicable duty on masur is now 30 % while time limit for urad till Aug-2020 has not been extended. Even tur import license has not been issued as physical inspection of processors and millers remain still under progress. All these developments have given support to cash pulses market this week. However, there is a possibility of lower demand at higher level amid increasing tension on border between China & India. Chana market too has moved up and it is all due to Nafed's strategy to sell chana near MSP and decreasing burden of old stock. At current level a downward correction is expected. Pressure on market may build up for a shorter period with clearing stock (Peas, urad and tur) held on ports with penalty and applicable duty. Stake holders should book profit at regular intervals as uncertainty still looms large.
- **Kharif pulses sowing has entered in the last phase now. Indian farmers have covered 134.57 lakh ha** so far against 128.66 lakh ha last year as on 28th Aug-2020. It is almost 4.59 % higher than last year and over 104% of normal (128.89 lakh ha) till date. Tur area is up by 7.72 % to 47.1 lakh ha. Urad area too is higher by 1.16 % to 37.52 lakh ha so far against 37.09 lakh ha last year. Normal area is 35.53 lakh ha. Indian farmers have showed more interest in moong farming and they have shown 34.85 lakh ha so far against 30.19 lakh ha last year. It is higher by 15.44 % from last year and higher by 4.29% of normal as on 28th Aug-2020. Kulthi sowing is up by 70 % to 0.17 lakh ha so far. Farmers have covered 14.93 lakh ha area under other pulses against 16.73 lakh ha last year. See details at page no -3.
- **Stock position of chana and tur with Nafed and FCI is lower than market expectation.** Nafed and FCI had procured 5.47 Lakh MT tur from kharif-2019. Out of this Nafed had procured 5.36 lakh MT. Both agencies had procured 21.48 lakh MT chana from rabi-2020. Out of total Nafed had procured 21.43 lakh MT chana. As selling in limited quantity is on, stock left out with both agencies as on 20th Aug-20 is said to be 24.05 lakh MT. Out of total chana stock is 20.60 lakh MT and tur stock is 3.45 lakh MT. This means old stock of chana has been consumed through various medium. New crop of tur is 4 months away while chana crop is 6 months away. So with improvement in demand prices of both commodities are moving up now. Govt. may allocate license for tur in Sep. Option for slashing duty on chana too is open. So govt.'s move is very crucial from price point of view.
- **Taking clue from higher futures, restricted sale by Nafed at higher level and improving demand** from retail markets, chana traded up and may move further up if current conditions sustain. Stockists are unwilling to sell while arrivals in markets have come down to a negligible level. Delhi chana traded near MSP first time this year. Situation is tricky. Nafed would start selling higher volume to cool down price. Punters are active in futures. If prices continue to move beyond 5000, govt. has option to slash import duty. This year Australia is going to harvest bumper crop and it can supply easily October onward if duty is reduced. There is no shortage of chana in domestic market. If chana sustains near MSP, it would be good for all stake holders.

#### Previous Update:

- **Standing kharif moong crop seems under threat in Telangana and Karnataka. If rains continue,** yield as well as quality loss seems very much in the sight. But in the central and north-west parts of India standing crops need the resurgence of monsoon in August. Pulses crops may face moisture stress in these regions. According to IMD India recorded 678.3 millimeters of rainfall which is 7 per cent more than normal till August 21. In July, the southwest monsoon was 10 per cent deficient, with the maximum shortfall in North-West and Central India estimated at 26 per cent and 22 per cent respectively. Even flooding in states like U.P. Gujarat and Maharashtra too have potential to cut final crop size of moong and urad. Next one week is very crucial for kharif crops.
- **With favorable weather condition kharif urad area has increased by 6.64% from last year.** Farmers have covered 34.55 lakh ha so far against 32.4 lakh ha last year. Normal kharif area for urad is 35.50 lakh ha. Sowing has entered in last phase now. Under normal condition Agriwatch's preliminary production estimate for kharif season is 18.60 lakh ha. With estimated production of 6.26 lakh MT in rabi season, it brings total to 24.86 lakh MT. The new season

started with 4.44 lakh MT carryin.. So total supply seems at comfortable level with 4 lakh MT allowed import for the year. Expected higher import in July and Aug and good crop condition would pressurize cash market in coming weeks.

- **Matar (Peas) stock at port is almost exhausted now amid decreasing stock of local crop.** As demand for besan is weak, peas too is facing demand issue. Matar is ruling higher than chana, so demand for matar dal, besan and peas has decreased. Govt. has not issued any license for matar import. So there is no activity in matar market at this point of time. It is being traded at 5900 in Mumbai while Rs5850 at Kolkatta. Demand is expected to be normal in the first week of Aug.

#### International Market Update:

- **Stock position of urad in Myanmar is said to be around 2.75 to 3 lakh Mt. New crop is expected to hit market in mid-March-2021.** By then Myanmar may export around 1 lakh Mt under quota system before new crop hits the market and would consume 50,000 Mt for domestic consumption. If India extends time line for import, prices in Myanmar may move up by \$100 per Mt from current level. Myanmar is offering urad FAQ and SQ at \$720 and \$825 per Mt respectively right now. India govt may open import after accessing the kharif crop size and current loss. Actually price trend in Myanmar would depend on decision on import time line in India. Right now India is waiting for kharif crop, which is heading towards maturity and harvesting may commence in Sep.
- **Stock of Tur in Myanmar is said to be around 1.75 to 2 lakh Mt from 2019-20 crop while new crop is expected in Feb 2021.** Farmers are shifting 20% tur area to sesamum. Indian importers have struck deal of 25,000Mt so far. As import remains restricted so Myanmar govt has written to Indian govt. to open import soon. However, Indian govt. would not open import analyzing the higher area coverage of tur and good crop condition so far. If prices continue to move up, govt may consider it to open in Oct-Nov for a limited period. Right now Myanmar is offering tur at \$625 per Mt basis FoB. Price trend would depend on Indian decision over import time line.
- **In North Dakota around 42% peas harvest is complete now while 67% crop is in excellent condition.** Around 17% lentils harvest is over now. Crop condition is normal to good so far. Dry beans is under pod formation stage and 80% crop is in good condition. In Manitoba 60 % lentils and 66 % peas harvesting is over now. Around 75% crop is in good condition. Harvesting is picking up as heatwave is accelerating now.
- **New arrival of pulses in Canada started now and pressure on price has started increasing.** Harvesting of masur and peas are on full swing and with it arrival too is increasing. Masur price which moved up considerably two months ago on duty slash by India, has come down now and will continue to move down. New arrivals from US and Russia too have commenced now and it has pressurized price in Canada too. After US, Canadian and Russian crop new arrival from Australia would hit market in Sep. So Supply side in global market would be higher. Weak tone may prevail now.
- **For 2020-21, Canadian lentil seeded area rose by 11.96 % to 1.72 Mha, due to good forecasted returns compared to other crops.** It was 1.53Mha in 2019-20. By province, Saskatchewan accounts for 90% of the lentil area, with the remainder seeded in Alberta and Manitoba. Production is forecast to increase to 2.47 MMT (2.16MMT last year), with supply lower due to smaller carry-in stocks. Exports are forecast to be lower at 2.1 MMT. Carry-out stocks are forecast to rise to nearly 0.175 MMT. The average price for all grades and types is forecast to rise from 2019-20, with higher prices from large green and red types. It may rule in the range of \$500-530 per metric tonne throughout the year. There is an expectation that import demand in the Indian subcontinent will continue to be similar or slightly higher in 2020-21. The data has been taken from the latest update from Agriculture & Agri food Canada.
- **For 2020-21, the area seeded under chickpeas fell by 23.89% from 2019-20 to 121 thousand ha due to the lower farm gate prices received in the previous year.** It was 159 thousand ha in 2019-20. Saskatchewan is expected to account for the majority of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 200 Kt, down 20.63% from the previous year, due to lower seeded area despite higher expected yields. Supply is forecast to rise from 2019-20 to 410Kt. Exports are forecast to rise from 105 to 125Kt and carry-out stocks are forecast to fall from 160 to 150Kt in 2020-21. The average price is forecast to fall marginally due to a larger world supply, with the expectation of an average grade distribution. It may hover in the range of \$455 to \$485 per tonne.

- *As per the latest update from Agriculture & Agri food Canada (AAFC) seeded area under dry peas is expected to decrease slightly by 1.76 % to 1722 thousand ha in 2020-21. Despite lower coverage area production is expected to increase from 4.23 to 4.25 MMT in 2020-21 due to higher yield of 2.51 tonne per ha. export volume too may decrease from 3.7 to 3.4 MMT in 2020-21. Despite higher domestic usage carryout is expected to increase from 250 to 450 Kt in 2020-21 due to lower export volume this year. Prices are expected to hover in the range of \$250 to 280 per metric tonne.*
- *Australia is going to plant biggest chickpeas crop in comparison to last three years. Planting continues in Queensland and NSW. As moisture level in the field is good, farmers are increasing area under chickpeas. As top level soil moisture is lower, farmers are using wheat land for chickpeas planting. Forward delivery for October onward has been heard at \$ 630 per MT. New chickpeas crop may attract higher value. Value of new crop may be affected by any further hiccups caused by COVID-19. It may pressurize Chickpeas price.*

**Daily Outlook:** -Pulses are likely to trade steady to slightly firm.
