

Pulses Domestic Fundamentals:

Today's Update:

- **Masur cash market traded steady to slightly firm due to restructured duty (from 10 to 30 % again, applicable from Sep-2020.** India imported around 1.67 lakh MT masur in July and volume is expected to increase to 2 to 2.5 lakh MT in August. So any spike is unlikely in Sep. The reason behind higher import was reduced duty (10 instead of 30 %) till August. Price may increase again once higher imported volume is consumed in various domestic markets. Right now imported masur is being traded at Rs 5400-5450 at Mumbai. Masur and masur dal demand is normal while supply side in overseas market is increasing with commencement of harvesting in Canada and USA.
- **Kharif pulses sowing has entered in the last phase now. Indian farmers have covered 136.78 lakh ha so far against 130.686 lakh ha last year as on 04th Sep-2020.** It is almost 4.67 % higher than last year and over 106% of normal (128.89 lakh ha) till date. Tur area is up by 6.33 % to 47.73 lakh ha. Urad area too is higher by 1 % to 37.92 lakh ha so far against 37.57 lakh ha last year. Normal area is 35.53 lakh ha. Indian farmers have showed more interest in moong farming and they have shown 35.54 lakh ha so far against 30.53 lakh ha last year. It is higher by 16.41 % from last year and higher by 16.56 % of normal as on 04th Sep-2020. Kulthi sowing is down by 20 % at 0.24 lakh ha so far. Farmers have covered 15.35 lakh ha area under other pulses against 17.39 lakh ha last year. See details at page no -3.

Previous Update:

- **Despite higher coverage area (around 48 lakh ha) under tur and around 3.6 lakh Mt stock with Nafed cash market continued to trade firm and it may move up further by Rs300 to 400 from current level.** The reason behind it is said to be non-issuance of import license to millers due to delay in physical inspection of applicants mills. Around 20% mills are yet to be inspected. The DGFT has allocated 4 lakh Mt tur import quota for 2020-21. Under prevailing condition, if import license is issued by mid Sep (likely), imported tur would hit market only in mid Oct-Nov. So cash market would trade firm in Sep too. If Nafed starts selling in bulk volume, it would cap market to a certain extent. If release is delayed, market may move up above Rs500 from current level. There may be some respite as tur from Mozambique (G to G basis) is said to be in way to India may hit Indian ports in the third week of Sep. Sanctioned import quantity under G to G basis is 2 lakh Mt for the whole year. Tur is being traded at Rs 6300-6400 in Gulberga market.
- **Higher import volume (around 0.75 lakh MT) expected in August, commencement of harvesting in major producing states including MH and poor offtake from mills continued to pressurize urad cash market in Delhi, Mumbai and Chennai.** Urad extended its loss by Rs 50 to Rs100 per qtl. Even bulk buyers remained sidelined ahead of new crop. The DGFT has not extended import time line and resultantly urad in Myanmar decreased by another \$5 to \$765 per Mt. However SQ stayed steady at \$875 per Mt. So pressure seems on urad cash market. No major loss has been reported so far and weather is likely to be good for harvesting. However, some losses due to heavy rains in MP and MH may be compensated by higher area coverage in other states. In Mumbai market urad is being traded at Rs6000-6300 while in Chennai it is being traded at Rs 6800-6900. Supply side is bound to increase in Sep.
- **Chana cash market traded down by Rs 50 taking clue from weak futures and lackluster demand at higher level by mills.** Profit booking in futures too helped market to decrease. Demand for chana was weak even in states like M.P., Raj and Delhi. Its impact was also seen in south Indian market. Despite festive season dal demand got affected at higher level. Notably, price of chana increased by Rs 800-1000 per qtl. in last one month and it is considered much higher than normal expectation of the market. So, downward correction of Rs 100-200 is expected now. As new crop is far away and festive demand would emerge again, chana may trade firm again after correction. The burden of old stock with Nafed has already been neutralized now. In current situation chana would continue to rule in the range of Rs 4800-5200. Bumper kharif crop like tur, moong and urad and higher volume of imported lentils would cap any unexpected jump in cash chana market.
- **Matar (Peas) stock at port is almost exhausted now amid decreasing stock of local crop. As demand for besan is weak, peas too is facing demand issue.** Matar is ruling higher than chana, so demand for matar dal, besan and peas

has decreased. Govt. has not issued any license for matar import. So there is no activity in matar market at this point of time. It is being traded at 5900 in Mumbai while Rs5850 at Kolkatta. Demand is expected to be normal in the first week of Aug.

International Market Update:

- **Stock position of urad in Myanmar is said to be around 2.75 to 3 lakh Mt. New crop is expected to hit market in mid-March-2021.** By then Myanmar may export around 1 lakh Mt under quota system before new crop hits the market and would consume 50,000 Mt for domestic consumption. If India extends time line for import, prices in Myanmar may move up by \$100 per Mt from current level. Myanmar is offering urad FAQ and SQ at \$720 and \$825 per Mt respectively right now. India govt may open import after accessing the kharif crop size and current loss. Actually price trend in Myanmar would depend on decision on import time line in India. Right now India is waiting for kharif crop, which is heading towards maturity and harvesting may commence in Sep.
- **Stock of Tur in Myanmar is said to be around 1.75 to 2 lakh Mt from 2019-20 crop while new crop is expected in Feb 2021.** Farmers are shifting 20% tur area to sesamum. Indian importers have struck deal of 25,000Mt so far. As import remains restricted so Myanmar govt has written to Indian govt. to open import soon. However, Indian govt. would not open import analyzing the higher area coverage of tur and good crop condition so far. If prices continue to move up, govt may consider it to open in Oct-Nov for a limited period. Right now Myanmar is offering tur at \$625 per Mt basis FoB. Price trend would depend on Indian decision over import time line.
- **New arrival of pulses in Canada started now and pressure on price has started increasing.** Harvesting of masur and peas are on full swing and with it arrival too is increasing. Masur price which moved up considerably two months ago on duty slash by India, has come down now and will continue to move down. New arrivals from US and Russia too have commenced now and it has pressurized price in Canada too. After US, Canadian and Russian crop new arrival from Australia would hit market in Sep. So Supply side in global market would be higher. Weak tone may prevail now.
- **For 2020-21, Canadian lentil seeded area rose by 11.96 % to 1.72 Mha, due to good forecasted returns compared to other crops.** It was 1.53Mha in 2019-20. By province, Saskatchewan accounts for 90% of the lentil area, with the remainder seeded in Alberta and Manitoba. Production is forecast to increase to 2.47 MMT (2.16MMT last year), with supply lower due to smaller carry-in stocks. Exports are forecast to be lower at 2.1 MMT. Carry-out stocks are forecast to rise to nearly 0.175 MMT. The average price for all grades and types is forecast to rise from 2019-20, with higher prices from large green and red types. It may rule in the range of \$500-530 per metric tonne throughout the year. There is an expectation that import demand in the Indian subcontinent will continue to be similar or slightly higher in 2020-21. The data has been taken from the latest update from Agriculture & Agri food Canada.
- **For 2020-21, the area seeded under chickpeas fell by 23.89% from 2019-20 to 121 thousand ha due to the lower farm gate prices received in the previous year.** It was 159 thousand ha in 2019-20. Saskatchewan is expected to account for the majority of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 200 Kt, down 20.63% from the previous year, due to lower seeded area despite higher expected yields. Supply is forecast to rise from 2019-20 to 410Kt. Exports are forecast to rise from 105 to 125Kt and carry-out stocks are forecast to fall from 160 to 150Kt in 2020-21. The average price is forecast to fall marginally due to a larger world supply, with the expectation of an average grade distribution. It may hover in the range of \$455 to \$485 per tonne.
- **As per the latest update from Agriculture & Agri food Canada (AAFC) seeded area under dry peas is expected to decrease slightly by 1.76 % to 1722 thousand ha in 2020-21.** Despite lower coverage area production is expected to increase from 4.23 to 4.25MMT in 2020-21 due to higher yield of 2.51tonne per ha. export volume too may decrease from 3.7 to 3.4 MMT in 2020-21. Despite higher domestic usage carryout is expected to increase from 250 to 450Kt in 2020-21 due to lower export volume this year. Prices are expected to hover in the range of \$250 to 280 per metric tonne.
- **Australia is going to plant biggest chickpeas crop in comparison to last three years.** Planting continues in Queensland and NSW. As moisture level in the field is good, farmers are increasing area under chickpeas. As top level soil moisture is lower, farmers are using wheat land for chickpeas planting. Forward delivery for October

onward has been heard at \$ 630 per MT. New chickpeas crop may attract higher value. Value of new crop may be affected by any further hiccups caused by COVID-19. It may pressurize Chickpeas price.

Daily Outlook: -Pulses are likely to trade steady to slightly firm.
