

Pulses Domestic Fundamentals:

Today's Update:

- *Nafed continued to reject chana bids during last two-three days due to lower offered price. Besides, it has allocated 3 lakh MT chana for buffer stock. So, prices in cash market are moving up. Stockists, sensing uptrend in coming weeks, have slowed down their release. Actually, there is an artificial short supply in the market and intention is to push market beyond 5000. If Nafed does not start selling chana around 4900-5000, chana price may touch 5500 level in Delhi. Now Agriwatch expects release from Nafed around Rs5000 with slower pace. Overall, sentiment remains firm as demand is improving. Actually, Nafed is on driver's seat and chana will follow the move taken by Nafed in coming weeks. Apart from this, the burden of old stock with Nafed is over now as it has been distributed through various govt.'s schemes and kept reserved for this purpose. Nafed has around 2.2 MMT new chana stock. Govt. would prefer to distribute/sale chana at slower pace now, so that prices could sustain above MSP and farmers could maintain same area as last year. Sowing would start from end Oct. Import volume may increase from LDC countries as it is duty free.*

Previous Update:

- *Cash moong market seems under pressure with increasing arrivals from Karnataka, Maharashtra and soon from Rajasthan and Gujarat. Demand is poor as millers and stockists are waiting for more downside level. However, supply of quality moong is tight against good demand for it. Some quality losses have been recorded in parts of Karnataka and Maharashtra due to heavy rains in recent weeks. However, 5 lakh ha higher area coverage this year would compensate the loss easily. Sowing has reached at record level at 35.54 lakh ha against 30.53 lakh ha last year. Sowing is almost over now. As production is bound to increase, firmness in moong cash market is unlikely. Moong would continue to trade in the range of Rs 6000 to 6800 in Sep against MSP of Rs 7196 per qt. Demand may improve once arrival reaches its peak (by end Sep). Import is not possible due to disparity.*
- *Due to non-issuance of import license so far availability of tur at ports is poor. Offtake from mills has improved in recent weeks. Besides, stockists have started retaining stock sensing delay in import and arrival from new crop not before Dec. All these factors have given support to cash tur market. Even Nafed has sold 1.45 lakh MT tur from its stock out of 5.45 lakh MT. So prices have improved in recent weeks. However, any spike is unlikely as area under tur has reached at 47.73 lakh ha against 44.89 lakh ha last year so far. It is higher by 2.84 lakh ha this year. Sowing is almost over now. Crop condition is good and production is bound to increase by 1.20 lakh MT to 38.39 lakh MT. As demand is improving, price of tur may move further up. In Gulberga market it is being traded at 6300-6400 and at Rs 6000-6100 in Mumbai. So overall sentiments remain firm.*
- *Masur cash market traded steady to slightly firm due to restructured duty (from 10 to 30 % again, applicable from Sep-2020. India imported around 1.67 lakh MT masur in July and volume is expected to increase to 2 to 2.5 lakh MT in August. So any spike is unlikely in Sep. The reason behind higher import was reduced duty (10 instead of 30 %) till August. Price may increase again once higher imported volume is consumed in various domestic markets. Right now imported masur is being traded at Rs 5400-5450 at Mumbai. Masur and masur dal demand is normal while supply side in overseas market is increasing with commencement of harvesting in Canada and USA.*
- *Kharif pulses sowing has entered in the last phase now. Indian farmers have covered 136.78 lakh ha so far against 130.686 lakh ha last year as on 04th Sep-2020. It is almost 4.67 % higher than last year and over 106% of normal (128.89 lakh ha) till date. Tur area is up by 6.33 % to 47.73 lakh ha. Urad area too is higher by 1 % to 37.92 lakh ha so far against 37.57 lakh ha last year. Normal area is 35.53 lakh ha. Indian farmers have showed more interest in moong farming and they have shown 35.54 lakh ha so far against 30.53 lakh ha last year. It is higher by 16.41 % from last year and higher by 16.56 % of normal as on 04th Sep-2020. Kulthi sowing is down by 20 % at 0.24 lakh ha so far. Farmers have covered 15.35 lakh ha area under other pulses against 17.39 lakh ha last year. See details at page no -3.*
- *Matar (Peas) stock at port is almost exhausted now amid decreasing stock of local crop. As demand for besan is weak, peas too is facing demand issue. Matar is ruling higher than chana, so demand for matar dal, besan and peas*

has decreased. Govt. has not issued any license for matar import. So there is no activity in matar market at this point of time. It is being traded at 5900 in Mumbai while Rs5850 at Kolkatta. Demand is expected tp be normal in the first week of Aug.

International Market Update:

- **Stock position of urad in Myanmar is said to be around 2.75 to 3 lakh Mt. New crop is expected to hit market in mid -March-2021.**By then Myanmar may export around 1 lakh Mt under quota system before new crop hits the market and would consume 50,000 Mt for domestic consumption. If India extends time line for import, prices in Myanmar may move up by \$100 per Mt from current level. Myanmar is offering urad FAQ and SQ at \$720 and \$825 per Mt respectively right now. India govt may open import after accessing the kharif crop size and current loss. Actually price trend in Myanmar would depend on decision on import time line in India. Right now India is waiting for kharif crop, which is heading towards maturity and harvesting may commence in Sep.
- **Stock of Tur in Myanmar is said to be around 1.75 to 2 lakh Mt from 2019-20 crop while new crop is expected in Feb 2021.**Farmers are shifting 20% tur area to sesamum. Indian importers have struck deal of 25,000Mt so far. As import remains restricted so Myanmar govt has written to Indian govt. to open import soon. However, Indian govt. would not open import analyzing the higher area coverage of tur and good crop condition so far.If prices continue to move up , govt may consider it to open in Oct-Nov for a limited period. Right now Myanmar is offering tur at \$625 per Mt basis FoB. Price trend would depend on Indian decision over import time line.
- **New arrival of pulses in Canada started now and pressure on price has started increasing.** Harvesting of masur and peas are on full swing and with it arrival too is increasing. Masur price which moved up considerably two months ago on duty slash by India, has come down now and will continue to move down. New arrivals from US and Russia too have commenced now and it has pressurized price in Canada too. After US, Canadian and Russian crop new arrival from Australia would hit market in Sep. So Supply side in global market would be higher. Weak tone may prevail now.
- **For 2020-21, Canadian lentil seeded area rose by 11.96 % to 1.72 Mha, due to good forecasted returns compared to other crops.**It was 1.53Mha in 2019-20. By province, Saskatchewan accounts for 90% of the lentil area, with the remainder seeded in Alberta and Manitoba. Production is forecast to increase to 2.47 MMT (2.16MMT last year), with supply lower due to smaller carry-in stocks. Exports are forecast to be lower at 2.1 MMT. Carry-out stocks are forecast to rise to nearly 0.175 MMT. The average price for all grades and types is forecast to rise from 2019-20, with higher prices from large green and red types.It may rule in the range of \$500-530 per metric tonne throughout the year. There is an expectation that import demand in the Indian subcontinent will continue to be similar or slighter higher in 2020-21.The data has been taken from the latest update from Agriculture & Agri food Canada.
- **For 2020-21, the area seeded under chickpeas fell by 23.89% from 2019-20 to 121 thousand ha due to the lower farm gate prices received in the previous year.**It was 159 thousand ha in 219-20. Saskatchewan is expected to account for the majority of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 200 Kt, down 20.63%from the previous year,due to lower seeded area despite higher expected yields. Supply is forecast to rise from 2019-20to 410Kt.Exports are forecast to rise f rom 105 to 125Kt and carry-out stocks are forecast to fall from 160 to 150Kt in 2020-21.. The average price is forecast to fall marginally due to a larger world supply, with the expectation of an average grade distribution.It may hover in the range of \$455 to \$485 per tonne.
- **As per the latest update from Agriculture & Agri food Canada (AAFC) seeded area under dry peas is expected to decrease slightly by1.76 % to 1722thousand ha in 2020-21.**Despite lower coverage area production is expected to increase from 4.23 to 4.25MMT in 2020-21 due to higher yield of 2.51tonne per ha. export volume too may decrease from3.7 to 3.4 MMT in 2020-21.Despite higher domestic usage carryout is expected to increase from 250 to 450Kt in 2020-21 due to lower export volume this year. Prices are expected to hover in the range of \$250 to 280 per metric tonne.
- **Australia is going to plant biggest chickpeas crop in comparison to last three years.** Planting continues in Queensland and NSW. As moisture level in the field is good, farmers are increasing area under chickpeas. As top level soil moisture is lower, farmers are using wheat land for chickpeas planting. Forward delivery for October

onward has been heard at \$ 630 per MT. New chickpeas crop may attract higher value. Value of new crop may be affected by any further hiccups caused by COVID-19. It may pressurize Chickpeas price.

Daily Outlook: -Pulses are likely to trade steady to slightly firm.
