

Pulses Domestic Fundamentals:

Today's Update:

- **Market is expecting issuance of import licenses for urad soon. There is a rumor in the market** that that time line for urad import may be extended as prices are ruling above MSP despite the commencement of arrival from kharif crop. If import timeline is extended to increase supply in the market, urad price may decrease below MSP. Notably, govt. had allowed 4 lakhMt import till August-2020. However, only 2.5 lakh Mt urad could be imported in the given time frame (till Aug). So 1.5 lakhMt quota is still left while market is ruling above MSP. Importers are active in Myanmar and so quotes in Myanmar increased by \$75 in last three days. Rains have affected quality of the crop and so price for quality crop may continue to rule higher. Govt.'s decision on import time line is crucial now.
- **Govt. has slashed import duty on masur again from 30 to 10 percent, effective from 18 Sep** to 31st Oct-2020. Oct. onward again it will be applicable as per old duty structure i.e 30% from all origin except US. If lentils is imported from US applicable duty would be 30%. The market took it by surprise. Relaxed time norm on reduced duty would increase flow of masur import. Now importers can import more than two lakh MT in Sep and Oct. It would impact price in domestic market by two to three hundred. The decision has capped uptrend in masur market. Even stockists may prefer to offload stocks.
- **Forecast of heavy rains in Karnataka, MH and South Indian States may affect kharif harvesting** activities in coming weeks. If rains continues 3 to 5 days, it may affect quality of crops standing at the field. It may push up price of moong and urad. Next week seems very crucial for price direction. Myanmar has started increasing quotes for urad. Govt. has not extended time line for import. It may push up urad price again. Right now urad price is ruling above MSP (Rs6000 level). However, with increasing arrival it may decrease to MSP level in Oct. If import is allowed at this point of time, prices may fall below MSP. The decision seems in favor of farmers.

Previous Update:

- **Tur stock at ports is unexpectedly low in Sep as per market sources. India imported 5412 MT tur** in August while total import from April to Aug is around 8.5 thousand Mt. Maximum tur has been imported from Mozambique. As import quota for 4 lakh Mt has not been issued as yet, supply side seems to be tight. Stockists too have started restricting sale sensing uptrend to continue. It may push up price by Rs200-300 more from current level despite good sowing coverage (up by 6.41% from last year) so far. New crop would not hit market before December. Nafed has now around 3.5 lakhMt tur stock and may be used to reign the spiraling prices in domestic market.
- **Kharif pulses sowing has entered in the last phase now. Indian farmers have covered 137.86 lakh ha** so far against 131.76 lakh ha last year as on 11th Sep-2020. It is almost 4.6 % higher than last year and around 107% of normal (128.89 lakh ha) till date. Tur area is up by 6.41 % to 48.11 lakh ha. Urad area too is higher by 1.03 % to 38.27 lakh ha so far against 37.88 lakh ha last year. Normal area is 35.53 lakh ha. Indian farmers have showed more interest in moong farming and they have shown 35.66 lakh ha so far against 30.71 lakh ha last year. It is higher by 16.12 % from last year and higher by 16.96 % of normal as on 11th Sep-2020. Kulthi sowing is down by 23 % at 0.33 lakh ha so far. Farmers have covered 15.49 lakh ha area under other pulses against 17.53 lakh ha last year. See details at page no -3
- **Nafed has started accepting bids for chana around Rs5050 to Rs5191. It may have cooling impact** on chana price. Nafed has ample stock to control price and it may adopt such a selling strategy that may stabilize market at current level (5000-5350). Besides, Stockists, sensing uptrend in coming weeks, may slow down their release. Actually, there is an artificial short supply in the market and intention is to push market beyond 5400-5500. As Nafed has started accepting bids, market should stabilize. Now Agriwatch expects release from N near current level. Overall, the short term sentiment remains firm as demand is improving. Nafed still is on driver's seat and chana will follow the move taken by Nafed in coming weeks. Nafed has around 2.2 MMT new chana stock. Govt. would prefer to distribute/sale chana at slower pace now, so that prices could sustain above MSP and farmers could maintain same area as last year. Sowing would start from end Oct. Import volume may increase from LDC countries as it is duty free.

- **Cash moong market seems under pressure with increasing arrivals from Karnataka, Maharashtra and soon from Rajasthan and Gujarat.** Demand is poor as millers and stockists are waiting for more downside level. However, supply of quality moong is tight against good demand for it. Some quality losses have been recorded in parts of Karnataka and Maharashtra due to heavy rains in recent weeks. However, 5 lakh ha higher area coverage this year would compensate the loss easily. Sowing has reached at record level at 35.54 lakh ha against 30.53 lakh ha last year. Sowing is almost over now. As production is bound to increase, firmness in moong cash market is unlikely. Moong would continue to trade in the range of Rs 6000 to 6800 in Sep against MSP of Rs 7196 per qtl. Demand may improve once arrival reaches its peak (by end Sep). Import is not possible due to disparity.

International Market Update:

- **Private participants are expecting higher lentils crop in Canada and the United States this year against last year.** However, govt.'s estimate has not been revised as yet. They expect lower crop size this year against last year in Australia. Abares too has not revised crop estimate as yet. Private participants/experts expect 497,000 metric tonnes production this year against 543,000 metric tonnes last year in Australia. The USDA expects this year's harvest to reach 295,000 MT, compared to 244,000 last year. Statistics Canada will release its second production estimate soon. But, farmers are reporting higher average yields to Saskatchewan
- **Stock position of urad in Myanmar is said to be around 2.75 to 3 lakh Mt. New crop is expected** to hit market in mid-March-2021. By then Myanmar may export around 1 lakh Mt under quota system before new crop hits the market and would consume 50,000 Mt for domestic consumption. If India extends time line for import, prices in Myanmar may move up by \$100 per Mt from current level. Myanmar is offering urad FAQ and SQ at \$720 and \$825 per Mt respectively right now. India govt may open import after accessing the kharif crop size and current loss. Actually price trend in Myanmar would depend on decision on import time line in India. Right now India is waiting for kharif crop, which is heading towards maturity and harvesting may commence in Sep.
- **Stock of Tur in Myanmar is said to be around 1.75 to 2 lakh Mt from 2019-20 crop while new crop is expected** in Feb 2021. Farmers are shifting 20% tur area to sesamum. Indian importers have struck deal of 25,000 Mt so far. As import remains restricted so Myanmar govt has written to Indian govt. to open import soon. However, Indian govt. would not open import analyzing the higher area coverage of tur and good crop condition so far. If prices continue to move up, govt may consider it to open in Oct-Nov for a limited period. Right now Myanmar is offering tur at \$625 per Mt basis FoB. Price trend would depend on Indian decision over import time line.
- **New arrival of pulses in Canada started now and pressure on price has started increasing.** Harvesting of masur and peas are on full swing and with it arrival too is increasing. Masur price which moved up considerably two months ago on duty slash by India, has come down now and will continue to move down. New arrivals from US and Russia too have commenced now and it has pressurized price in Canada too. After US, Canadian and Russian crop new arrival from Australia would hit market in Sep. So Supply side in global market would be higher. Weak tone may prevail now.
- **For 2020-21, Canadian lentil seeded area rose by 11.96 % to 1.72 Mha, due to** good forecasted returns compared to other crops. It was 1.53 Mha in 2019-20. By province, Saskatchewan accounts for 90% of the lentil area, with the remainder seeded in Alberta and Manitoba. Production is forecast to increase to 2.47 MMT (2.16 MMT last year), with supply lower due to smaller carry-in stocks. Exports are forecast to be lower at 2.1 MMT. Carry-out stocks are forecast to rise to nearly 0.175 MMT. The average price for all grades and types is forecast to rise from 2019-20, with higher prices from large green and red types. It may rule in the range of \$500-530 per metric tonne throughout the year. There is an expectation that import demand in the Indian subcontinent will continue to be similar or slightly higher in 2020-21. The data has been taken from the latest update from Agriculture & Agri food Canada.
- **For 2020-21, the area seeded under chickpeas fell by 23.89% from 2019-20 to 121 thousand ha** due to the lower farm gate prices received in the previous year. It was 159 thousand ha in 2019-20. Saskatchewan is expected to account for the majority of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 200 Kt, down 20.63% from the previous year, due to lower seeded area despite higher expected yields. Supply is forecast to rise from 2019-20 to 410 Kt. Exports are forecast to rise from 105 to 125 Kt and carry-out stocks are forecast to fall from 160 to

150Kt in 2020-21.. The average price is forecast to fall marginally due to a larger world supply, with the expectation of an average grade distribution. It may hover in the range of \$455 to \$485 per tonne.

- As per the latest update from Agriculture & Agri food Canada (AAFC) seeded area under dry peas is expected to decrease slightly by 1.76 % to 1722 thousand ha in 2020-21. Despite lower coverage area production is expected to increase from 4.23 to 4.25 MMT in 2020-21 due to higher yield of 2.51 tonne per ha. export volume too may decrease from 3.7 to 3.4 MMT in 2020-21. Despite higher domestic usage carryout is expected to increase from 250 to 450 Kt in 2020-21 due to lower export volume this year. Prices are expected to hover in the range of \$250 to 280 per metric tonne.

Daily Outlook: -Pulses are likely to trade steady to slightly weak.
