

Pulses Domestic Fundamentals:

Today's Update:

- **DES has released its 1st Adv est. for pulses production for 2020-21 on 22nd Sep-2020.** It has pegged tur production at 4.04 MMT against set target of 4.82 MMT for 2020-21 crop year. Urad production has been pegged at 2.15 MMT against set target of 2.9MMT. It has pegged kharif moong production at 2.09 MMT against 1.88 MMT. There is good production for kharif season seems on the card. If weather remains favorable, bumper crop may be harvested. However, rains still remain a disturbing element.
- **Active buying by millers and improved demand in cash market pushed up tur price by Rs 200-250** to 6300-6350 per qtl. during the week under review. Lemon tur stock at ports like Chennai, Mumbai and Kolkata is depleting fast. Import volume remains limited due to non-issuance of import licenses as of now. Arrivals in local markets too are being seen at negligible level. So, stockists have increased its price by Rs 200-250 in last three –four days. Old lemon tur too are being quoted at Rs 6200 per qtl. Arrival has decrease in Jalgaon, Akola and Amravati line. Local tur in Gulberga too moved up to Rs 6700-6750 and it may move up further by Rs200 under prevailing market fundamentals. New crop is still two and a half month away from now. Farmers have covered 48.24 lakh ha so far.
- **Kharif pulses sowing has entered in the last phase now. Indian farmers have covered 138.61 lakh ha** so far against 132.34 lakh ha last year as on 18th Sep-2020. It is almost 4.74 % higher than last year and around 107.54 % of normal (128.89 lakh ha) till date. Tur area is up by 6.12 % to 48.24 lakh ha. Urad area too is higher by 1.03 % to 38.63 lakh ha so far against 38.03 lakh ha last year. Normal area is 35.53lakh ha. Indian farmers have showed more interest in moong farming and they have shown 35.79 lakh ha so far against 30.75 lakh ha last year. It is higher by 16.39 % from last year and higher by 17 % of normal as on 18th Sep-2020. Kulthi sowing is down by 30 % at 0.34 lakh ha so far. Farmers have covered 15.61 lakh ha area under other pulses against 17.61 lakh ha last year. See details at page no -3

Previous Update:

- **Govt. has increased MSP for chana from Rs 4875 to Rs 5100 and masur from Rs4800 to 5100.** Higher MSP would encourage farmers to cover more area under chana and masur in the rabi season, starting from –Oct. MSP for other rabi crops too has been increased.
- **Market is expecting issuance of import licenses for urad soon. There is a rumor in the market** that that time line for urad import may be extended as prices are ruling above MSP despite the commencement of arrival from kharif crop. If import timeline is extended to increase supply in the market, urad price may decrease below MSP. Notably, govt. had allowed 4 lakhMt import till August-2020. However, only 2.5 lakh Mt urad could be imported in the given time frame (till Aug). So 1.5 lakhMt quota is still left while market is ruling above MSP. Importers are active in Myanmar and so quotes in Myanmar increased by \$75 in last three days. Rains have affected quality of the crop and so price for quality crop may continue to rule higher. Govt.'s decision on import time line is crucial now.
- **Govt. has slashed import duty on masur again from 30 to 10 percent, effective from 18 Sep** to 31st Oct-2020. Oct. onward again it will be applicable as per old duty structure i.e 30% from all origin except US. If lentils is imported from US applicable duty would be 30%. The market took it by surprise. Relaxed time norm on reduced duty would increase flow of masur import. Now importers can import more than two lakh MT in Sep and Oct. It would impact price in domestic market by two to three hundred. The decision has capped uptrend in masur market. Even stockists may prefer to offload stocks.
- **Forecast of heavy rains in Karnataka, MH and South Indian States may affect kharif harvesting** activities in coming weeks. If rains continues 3to5 days, it may affect quality of crops standing at the field. It may push up price of moong and urad. Next week seems very crucial for price direction. Myanmar has started increasing quotes for urad. Govt. has not extended time line for import. It may push up urad price again. Right now urad price is ruling above MSP (Rs6000 level. However, with increasing arrival it may decrease to MSP level in Oct. If import is allowed at this point of time, prices may fall below MSP. The decision seems in favor of farmers.

- **Cash moong market seems under pressure with increasing arrivals from Karnataka, Maharashtra and soon from Rajasthan and Gujarat.** Demand is poor as millers and stockists are waiting for more downside level. However, supply of quality moong is tight against good demand for it. Some quality losses have been recorded in parts of Karnataka and Maharashtra due to heavy rains in recent weeks. However, 5 lakh ha higher area coverage this year would compensate the loss easily. Sowing has reached at record level at 35.54 lakh ha against 30.53 lakh ha last year. Sowing is almost over now. As production is bound to increase, firmness in moong cash market is unlikely. Moong would continue to trade in the range of Rs 6000 to 6800 in Sep against MSP of Rs 7196 per qtl. Demand may improve once arrival reaches its peak (by end Sep). Import is not possible due to disparity.

International Market Update:

- **Global lentil markets traded firm on expectations of good demand from India.** Notably, India has again reduced duty from 30 to 10 %, applicable till 31st Oct-2020 now. The government is hoping additional imports will help lower the retail price of masoor dal or split red lentils. Between March and mid Sep, the average price in India rose 15% from U.S. \$900 to \$1025 per metric ton (MT). Now price is expected to come down to \$875 to 880 in Sep-2020.
- **As per Turkish Statistical Institute (TURKSTAT), Turkey imported 40,774 metric tons (MT) in July-2020 against 89,693 MT in June-2020.** Despite lower volume of import in July total imports so far increased to 408,932 MT during the ongoing calendar year. The biggest exporter during the month was Canada, supplying 36,674 MT. Syria was the second most important export origin shipping 2,000 MT, followed by United States at 1,049 MT.
- **Stock position of urad in Myanmar is said to be around 2.75 to 3 lakh Mt. New crop is expected to hit market in mid-March-2021.** By then Myanmar may export around 1 lakh Mt under quota system before new crop hits the market and would consume 50,000 Mt for domestic consumption. If India extends time line for import, prices in Myanmar may move up by \$100 per Mt from current level. Myanmar is offering urad FAQ and SQ at \$720 and \$825 per Mt respectively right now. India govt may open import after accessing the kharif crop size and current loss. Actually price trend in Myanmar would depend on decision on import time line in India. Right now India is waiting for kharif crop, which is heading towards maturity and harvesting may commence in Sep.
- **Stock of Tur in Myanmar is said to be around 1.75 to 2 lakh Mt from 2019-20 crop while new crop is expected in Feb 2021.** Farmers are shifting 20% tur area to sesamum. Indian importers have struck deal of 25,000Mt so far. As import remains restricted so Myanmar govt has written to Indian govt. to open import soon. However, Indian govt. would not open import analyzing the higher area coverage of tur and good crop condition so far. If prices continue to move up, govt may consider it to open in Oct-Nov for a limited period. Right now Myanmar is offering tur at \$625 per Mt basis FoB. Price trend would depend on Indian decision over import time line.
- **New arrival of pulses in Canada started now and pressure on price has started increasing.** Harvesting of masur and peas are on full swing and with it arrival too is increasing. Masur price which moved up considerably two months ago on duty slash by India, has come down now and will continue to move down. New arrivals from US and Russia too have commenced now and it has pressurized price in Canada too. After US, Canadian and Russian crop new arrival from Australia would hit market in Sep. So Supply side in global market would be higher. Weak tone may prevail now.
- **For 2020-21, Canadian lentil seeded area rose by 11.96 % to 1.72 Mha, due to good forecasted returns compared to other crops.** It was 1.53Mha in 2019-20. By province, Saskatchewan accounts for 90% of the lentil area, with the remainder seeded in Alberta and Manitoba. Production is forecast to increase to 2.47 MMT (2.16MMT last year), with supply lower due to smaller carry-in stocks. Exports are forecast to be lower at 2.1 MMT. Carry-out stocks are forecast to rise to nearly 0.175 MMT. The average price for all grades and types is forecast to rise from 2019-20, with higher prices from large green and red types. It may rule in the range of \$500-530 per metric tonne throughout the year. There is an expectation that import demand in the Indian subcontinent will continue to be similar or slightly higher in 2020-21. The data has been taken from the latest update from Agriculture & Agri food Canada.
- **For 2020-21, the area seeded under chickpeas fell by 23.89% from 2019-20 to 121 thousand ha due to the lower farm gate prices received in the previous year.** It was 159 thousand ha in 2019-20. Saskatchewan is expected to account for the majority of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 200 Kt, down

20.63% from the previous year, due to lower seeded area despite higher expected yields. Supply is forecast to rise from 2019-20 to 410Kt. Exports are forecast to rise from 105 to 125Kt and carry-out stocks are forecast to fall from 160 to 150Kt in 2020-21. The average price is forecast to fall marginally due to a larger world supply, with the expectation of an average grade distribution. It may hover in the range of \$455 to \$485 per tonne.

- As per the latest update from Agriculture & Agri food Canada (AAFC) seeded area under dry peas is expected to decrease slightly by 1.76 % to 1722 thousand ha in 2020-21. Despite lower coverage area production is expected to increase from 4.23 to 4.25 MMT in 2020-21 due to higher yield of 2.51 tonne per ha. export volume too may decrease from 3.7 to 3.4 MMT in 2020-21. Despite higher domestic usage carryout is expected to increase from 250 to 450Kt in 2020-21 due to lower export volume this year. Prices are expected to hover in the range of \$250 to 280 per metric tonne.

Daily Outlook: -Pulses are likely to trade steady to slightly firm.
