

Pulses Domestic Fundamentals:

Today's Update:

- **Kharif pulses sowing has entered in the last phase now. Indian farmers have covered 139.36 lakh ha so far against 133.94 lakh ha last year as on 25th Sep-2020. It is almost 4.05 % higher than last year and around 108.13 % of normal (128.89 lakh ha) till date. Tur area is up by 5.69 % to 48.49 lakh ha. Urad area too is higher by 1.014 % to 38.96 lakh ha so far against 38.52 lakh ha last year. Normal area is 35.53lakh ha. Indian farmers have showed more interest in moong farming and they have shown 35.84 lakh ha so far against 31.01 lakh ha last year. It is higher by 15.58 % from last year and higher by 17.54 % of normal as on 25th Sep-2020. Kulthi sowing is down by 4 % to 0.39 lakh ha so far. Farmers have covered 15.69 lakh ha area under other pulses against 17.85 lakh ha last year. See details at page no -3**
- **Pulses cash market traded unexpectedly higher during last five -six days on the back of non-issuance of import licenses, increasing fear of crop loss due to heavy rains in some states and acceptance of higher bids by Nafed. As rabi sowing season is about to start, govt. is unlikely to allow import at this point of time. Even stockists have restricted sale of urad and chana sensing uptrend to continue. However, demand may decrease at higher level. Chana, Urad, masur and tur prices are ruling above MSP. Agriwatch expects market to stay steady or may see slight correction. Stockists may prefer to release stock at higher price as arrivals of urad and moong are increasing. However, quality concern may affect sentiments. Govt.'s decision would be very crucial now.**

Previous Update:

- **DES has released its 1st Adv est. for pulses production for 2020-21 on 22nd Sep-2020. It has pegged tur production at 4.04 MMT against set target of 4.82 MMT for 2020-21 crop year. Urad production has been pegged at 2.15 MMT against set target of 2.9MMT. It has pegged kharif moong production at 2.09 MMT against 1.88 MMT. There is good production for kharif season seems on the card. If weather remains favorable, bumper crop may be harvested. However, rains still remain a disturbing element.**
- **Active buying by millers and improved demand in cash market pushed up tur price by Rs 200-250 to 6500-6650 per qtl. during the week under review. Lemon tur stock at ports like Chennai, Mumbai and Kolkata is depleting fast. Import volume remains limited due to non-issuance of import licenses as of now. Arrivals in local markets too are being seen at negligible level. So, stockists have increased its price by Rs 200-250 in last three -four days. Old lemon tur too are being quoted at Rs 6200 per qtl. Arrival has decrease in Jalgaon, Akola and Amravati line. Local tur in Gulberga too moved up to Rs 6800-6950 and it may move up further by Rs200 under prevailing market fundamentals. New crop is still two and a half month away from now. Farmers have covered 48.24 lakh ha so far.**
- **Govt. has increased MSP for chana from Rs 4875 to Rs 5100 and masur from Rs4800 to 5100. Higher MSP would encourage farmers to cover more area under chana and masur in the rabi season, starting from -Oct. MSP for other rabi crops too has been increased.**
- **Market is expecting issuance of import licenses for urad soon. There is a rumor in the market that that time line for urad import may be extended as prices are ruling above MSP despite the commencement of arrival from kharif crop. If import timeline is extended to increase supply in the market, urad price may decrease below MSP. Notably, govt. had allowed 4 lakhMt import till August-2020. However, only 2.5 lakh Mt urad could be imported in the given time frame (till Aug). So 1.5 lakhMt quota is still left while market is ruling above MSP. Importers are active in Myanmar and so quotes in Myanmar increased by \$75 in last three days. Rains have affected quality of the crop and so price for quality crop may continue to rule higher. Govt.'s decision on import time line is crucial now.**
- **Govt. has slashed import duty on masur again from 30 to 10 percent, effective from 18 Sep to 31st Oct-2020. Oct. onward again it will be applicable as per old duty structure i.e 30% from all origin except US. If lentils is imported from US applicable duty would be 30%. The market took it by surprise. Relaxed time norm on reduced duty would increase flow of masur import. Now importers can import more than two lakh MT in Sep and Oct. It would impact price in domestic market by two to three hundred. The decision has capped uptrend in masur market. Even stockists may prefer to offload stocks.**

International Market Update:

- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons in 2020-21.** It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production.
 - **Chickpeas production in Australia is expected to increase by 152 % to 7.08 lakh tons in 2020-21.** It was 2.81 lakhMt last year. Australian farmers increased chickpeas area by 93% this year. New crop is expected from Oct end Nov-2020. Supply side would be higher October onward in the global market.
 - **US chickpea area for 2020-21 is forecast by the USDA to fall by 44% to 0.25 million acres.** With similar yields and lower abandonment, 2020-21 US chickpea production is forecast by USDA at below 0.2 Mt, down 38% from the previous year. The main export markets are Pakistan, the EU and Canada.
 - **In the US, the area seeded to lentils for 2020-21 is forecast by the USDA at just over 0.5 million acres,** 7% higher than 2019-20 due to higher area seeded in Montana being offset by lower seeded area in North Dakota. With higher yields and lower abandonment, US lentil production is forecast by USDA at below 0.3 Mt, up 21% from last year. The main US export markets for lentils are expected to continue to be Canada, India and the EU, particularly Spain.
 - **New arrival of pulses in Canada started now and pressure on price has started increasing.** Harvesting of masur and peas are on full swing and with it arrival too is increasing. Masur price which moved up considerably two months ago on duty slash by India, has come down now and will continue to move down. New arrivals from US and Russia too have commenced now and it has pressurized price in Canada too. After US, Canadian and Russian crop new arrival from Australia would hit market in Sep. So Supply side in global market would be higher. Weak tone may prevail now.
 - **For 2020-21, Canadian lentil seeded area rose by 11.96 % to 1.72 Mha, due to** good forecasted returns compared to other crops. It was 1.53Mha in 2019-20. By province, Saskatchewan accounts for 90% of the lentil area, with the remainder seeded in Alberta and Manitoba. Production is forecast to increase to 3.06 MMT (2.24MMT last year), with supply lower due to smaller carry-in stocks. Exports are forecast to be lower at 2.4 MMT. Carry-out stocks are forecast to rise to nearly 0.475 MMT. The average price for all grades and types is forecast to rise from 2019-20, with higher prices from large green and red types. It may rule in the range of \$520-550 per metric tonne throughout the year. There is an expectation that import demand in the Indian subcontinent will continue to be similar or slighter higher in 2020-21. The data has been taken from the latest update from Agriculture & Agri food Canada.
 - **For 2020-21, the area seeded under chickpeas fell by 23.89% from 2019-20 to 121 thousand ha** due to the lower farm gate prices received in the previous year. It was 159 thousand ha in 2019-20. Saskatchewan is expected to account for the majority of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 239 Kt, down 6.63% from the previous year, due to lower seeded area despite higher expected yields. Supply is forecast to rise from 2019-20 to 539Kt. Exports are forecast to rise from 105 to 125Kt and carry-out stocks are forecast to fall from 250 to 330 Kt in 2020-21. The average price is forecast to fall marginally due to a larger world supply, with the expectation of an average grade distribution. It may hover in the range of \$450 to \$475 per tonne.
 - **As per the latest update from Agriculture & Agri food Canada (AAFC) seeded area under dry peas is expected to decrease slightly by 1.76 % to 1722thousand ha in 2020-21.** Despite lower coverage area production is expected to increase from 4.23 to 4.36MMT in 2020-21 due to higher yield of 2.6tonne per ha. Export volume too may decrease from 3.83 to 3.80 MMT in 2020-21. Despite higher domestic usage carryout is expected to increase from 233 to 250Kt in 2020-21 due to lower export volume this year. Prices are expected to hover in the range of \$250 to 260 per metric tonne.
 - **As per Turkish Statistical Institute (TURKSTAT), Turkey imported 40,774 metric tons (MT) masur in July-2020** against 89,693 MT in June-2020. Despite lower volume of import in July total imports so far increased to 408,932 MT during the ongoing calendar year. The biggest exporter during the month was Canada, supplying 36,674 MT. Syria was the second most important export origin shipping 2,000 MT, followed by United States at 1,049 MT.
- Daily Outlook:** -Pulses are likely to trade steady to slightly firm.
