

Pulses Domestic Fundamentals:

Today's Update:

- **Pulses cash markets traded steady to weak as demand at higher level got disrupted. However, recovery in chana, masur and tur markets is likely as stockists /sellers are unwilling to sell their right now. Apart from it demand for seed would continue in October. Moong and urad may face pressure as arrival continues while Nafed is gearing up to increase sale to ease price. Kharif area is higher this year and in rabi season it would improve as prices are higher at this point of time. In Nov some pressure might be seen in all pulses markets.**
- **Chana cash market recovered once again after a big slip yesterday. Notably, there was a rumor in the market that import duty may be reduced so that Australian chana could enter into the market. Crop in Australia is nearing maturity. Right now 60 % duty on chana is applicable. As sowing of chana is about to begin, govt. would not take risk of importing chana and easing the price right now. If prices rule higher, there is a possibility of same area this year too. Agriwatch expects price to move up from here. In October it may trade in the range of Rs 5350 -5650. Above and below of this level Nafed would interfere by decreasing and increasing supply.**
- **Stock of Kabuli chana is low and would continue to decrease as demand for seed is expected this month. Farmers use 50,000 MT as seed. New crop would be available not before February. Even import volume would be limited as parity is not in favor of India. Expert says that production of Kabuli had decreased from 20 to 15 lakh Mt last year. While consumption continued to increase with markets returning to normal activities. Kabuli chana moved up by Rs 1500 in last two months. Mexican quality is being traded at Rs 7400-7500. As new crop is far away, Kabuli chana would continue to trade at higher level.**

Previous Update:

- **Pulses market moved unexpectedly up during last one month and the main reason behind it is said to be the new agriculture laws. Earlier prices used to increase after private buying coming to an end. This time prices have moved up when half of the crops are still in the field. Market sources say that millers became active after the centre's removal of the cap on stocks. Higher buying by private trades, losses by rains and flooding in some states like Maharashtra, Karnataka and Madhya Pradesh and restricted release by Nafed are main reasons that are driving price up in the market. Although, it is common for dal prices to go up during festive season, experts believe that it is a direct impact of the Agriculture reforms. Nafed should release higher quantity in open market and ensure adequate supply. Artificial short supply is being seen in Tur and urad market. Stockists are still active.**
- **Nafed has sold chana in the range of Rs 5311 to 5951 per qtl in various states. It sold urad in M.P. at Rs 5805-5915 per qtl. For moong it received Rs 6271 in Odisha while Rs 5771 in Tamil Nadu. For Chana the highest price was received in Karnataka (Rs 5951). Nafed would continue to receive good price for urad and chana. Even tur price is ruling higher, so it may decide to release some stock to ease supply. Tur is ruling Rs 600-800 per qtl higher than MSP.**
- **Tur continued to trade up on the back of higher demand on consuming centers, higher demand for comparatively cheaper African tur, restricted sale by domestic players and the acceptance of tur bid by FCI at Rs 7211 in Karnataka. Right now sellers are unwilling to sell below 7500-7600. So, firm tone may continue in tur markets in coming weeks. New crop is two months away. Agriwatch expects market to move up by Rs 300-400 from current level if issuance of import licenses is delayed further.**
- **The DGFT has issued public notification no. 22 dated 01.10.2020, regarding the allocation of quota for import of urad. According to the notice, 1.5 Lakh MTs of Urad shall be distributed equally or applied quantity (whichever is lower) only to the eligible and verified applicants. The eligible and verified applicants who had been issued licenses in June 2020 will have to ensure the import consignments of Urad reach Indian Ports on or before 31.03.2021..**
- **The Ministry of Agriculture & Farmers Welfare accorded approval for procurement of 13.77 lakh metric tons of pulses and oilseeds for kharif marketing season -2020-21 in states like Tamil Nadu, Karnataka, MH, Telangana and Haryana. The arrival from kharif MY has already started and govt would continue to procure at MSP like last year. For other states and UTs the approval will also be accorded on receipts of proposal for kharif pulses and oilseeds. It will be procured under PSS.**

- **Govt. has slashed import duty on masur again from 30 to 10 percent, effective from 18 Sep to 31st Oct-2020.** Oct. onward again it will be applicable as per old duty structure i.e 30% from all origin except US. If lentils is imported from US applicable duty would be 30%. The market took it by surprise. Relaxed time norm on reduced duty would increase flow of masur import. Now importers can import more than two lakh MT in Sep and Oct. It would impact price in domestic market by two to three hundred. The decision has capped uptrend in masur market. Even stockists may prefer to offload stocks.

International Market Update:

- **Global lentil markets continued to trade firm and the firm tone may continue on demand from countries** such as India, Sri Lanka and the United Arab Emirates. Higher demand from these countries has fueled expectations among importers and exporters that prices are likely to maintain an upward trend through the balance of the marketing year. Comments during the online lentil sessions of the week's virtual Global Pulse Confederation lentil sessions suggest farmers in several countries had become disillusioned with prices over the past year, with many setting price targets at which they would be willing to sell remaining new and old crop product on their farms.
- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons in 2020-21.** It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production.
- **Chickpeas production in Australia is expected to increase by 152 % to 7.08 lakh tons in 2020-21.** It was 2.81 lakh Mt last year. Australian farmers increased chickpeas area by 93% this year. New crop is expected from Oct end Nov-2020. Supply side would be higher October onward in the global market.
- **US chickpea area for 2020-21 is forecast by the USDA to fall by 44% to 0.25 million acres.** With similar yields and lower abandonment, 2020-21 US chickpea production is forecast by USDA at below 0.2 Mt, down 38% from the previous year. The main export markets are Pakistan, the EU and Canada.
- **In the US, the area seeded to lentils for 2020-21 is forecast by the USDA at just over 0.5 million acres,** 7% higher than 2019-20 due to higher area seeded in Montana being offset by lower seeded area in North Dakota. With higher yields and lower abandonment, US lentil production is forecast by USDA at below 0.3 Mt, up 21% from last year. The main US export markets for lentils are expected to continue to be Canada, India and the EU, particularly Spain.
- **For 2020-21, Canadian lentil seeded area rose by 11.96 % to 1.72 Mha,** due to good forecasted returns compared to other crops. It was 1.53Mha in 2019-20. By province, Saskatchewan accounts for 90% of the lentil area, with the remainder seeded in Alberta and Manitoba. Production is forecast to increase to 3.06 MMT (2.24MMT last year), with supply lower due to smaller carry-in stocks. Exports are forecast to be lower at 2.4 MMT. Carry-out stocks are forecast to rise to nearly 0.475 MMT. The average price for all grades and types is forecast to rise from 2019-20, with higher prices from large green and red types. It may rule in the range of \$520-550 per metric tonne throughout the year. There is an expectation that import demand in the Indian subcontinent will continue to be similar or slightly higher in 2020-21. The data has been taken from the latest update from Agriculture & Agri food Canada.
- **For 2020-21, the area seeded under chickpeas fell by 23.89% from 2019-20 to 121 thousand ha** due to the lower farm gate prices received in the previous year. It was 159 thousand ha in 2019-20. Saskatchewan is expected to account for the majority of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 239 Kt, down 6.63% from the previous year, due to lower seeded area despite higher expected yields. Supply is forecast to rise from 2019-20 to 539Kt. Exports are forecast to rise from 105 to 125Kt and carry-out stocks are forecast to fall from 250 to 330 Kt in 2020-21. The average price is forecast to fall marginally due to a larger world supply, with the expectation of an average grade distribution. It may hover in the range of \$450 to \$475 per tonne.
- **As per the latest update from Agriculture & Agri food Canada (AAFC) seeded area under dry peas is expected to decrease slightly by 1.76 % to 1722 thousand ha in 2020-21.** Despite lower coverage area production is expected to increase from 4.23 to 4.36MMT in 2020-21 due to higher yield of 2.6tonne per ha. Export volume too may decrease from 3.83 to 3.80 MMT in 2020-21. Despite higher domestic usage carryout is expected to increase from 233 to 250Kt in 2020-21 due to lower export volume this year. Prices are expected to hover in the range of \$250 to 260 per metric tonne.

- As per Turkish Statistical Institute (TURKSTAT), Turkey imported 40,774 metric tons (MT) masur in July-2020 against 89,693 MT in June-2020. Despite lower volume of import in July total imports so far increased to 408,932 MT during the ongoing calendar year. The biggest exporter during the month was Canada, supplying 36,674 MT. Syria was the second most important export origin shipping 2,000 MT, followed by United States at 1,049 MT

Daily Outlook: -Pulses are likely to trade firm.
