

Pulses Domestic Fundamentals:

Today's Update:

- **Demand for dal at higher level got struck and mills are buying pulses based on their immediate needs.** It has pressurized market to some extent. However, with likely improvement in demand prices may recover again. Pressure is higher on chana and lentils. Recovery is expected in Nov. Chana and masur may dip by Rs 100 more from current level. There is weak demand for urad and moong too as mills are unwilling to buy at this level. Nafed Mumbai has decided to sell 1lakhMT tur from its stock amid likely higher volume of import in Nov. So, tur price too can be seen under pressure. Weak tone may prevail in cash pulses market this week.
- **Recent nod for tur import with time limit of 15th November-2020 would not help in filling the gap** of current demand & supply side. Import of 4 lakhMT in just 32 days is not possible. Under prevailing condition import volume is expected to be in the range of 1 to 1.25 lakh Mt till 15th November. Out of total Agriwatch expects 0.4 lakh MT from Myanmar, 0.5 lakh MT from Sudan, Tanzania and Mozambique and 0.1 lakh MT from Nigeria and Ethiopia. Besides,, 0.25 lakh MT is expected from various sources through G to G basis. Demand for tur is even higher in domestic market during festive season. Prices of tur may increase by Rs300-350 per qtl before the imported crop hits the Indian markets.
- **Mumbai High Court has ordered to release peas lying at ports for a long time. Importers have fulfilled all conditions** including penalty of 10% and succeeded to get order for release. The quantity in question is said to be 38,500MT. Out total only 1206MT had been released earlier. The issue is pending for decision in Supreme Court too. The DGFT had requested the high court to wait till Supreme Court decision comes. But Mumbai high court has turned down its request. So, there are fair chances of releasing this stock from port. It would be a great respite for importers. If it is not released soon ,peas quality may be affected- says importers.

Previous Update:

- **Chana futures traded firm taking clue from restricted sale by Nafed/ stockists and improved demand** at higher level. Apart from it gossip regarding duty slash could not impress market. Govt is unwilling to slash duty at this point of time when sowing begins. Actually, govt. does not want to give any negative signal to farmers right now. So, Agriwatch expects market to move up again. This year chana area may cross previous record level as prices are higher than MSP at the time of sowing.
- **Cash urad market traded slightly down as demand by mills at higher level got struck amid issuance** of import licenses for 1.5 lakh Mt urad. Besides, Nafed has decided to continue release of old stock to increase supply in to the market. Urad rabi area is expected to increase in AP and Tamil Nadu as prices are ruling much higher than MSP. However recent rains may delay sowing by 10 to 15 days. Sideways movement is expected in cash urad market in the short term.
- **Lentils cash market continued to move sideways with changing import duty** structures during last four months. The government had reduced import duty on lentils in the beginning of June (2nd June-2020) from 30 to 10 percent for three months till August 31. The import duty again reverted to its previous level of 30 percent on September 1. With sensing short supply and higher prevailing prices, import duty was reduced again to 10% and it would be effective till 31st Oct-2020. Lower duty would increase import flow till Oct-2020 and keep prices under check during lean and sowing season. Agriwatch expects range bound movement in Oct under prevailing market fundamentals.
- **The Directorate General of Foreign Trade has green signaled for tur and urad import and** has given licenses to eligible importers. For urad 1.5 lakhMT import has been allowed while it is 4 lakh MT for tur. Importers can import 1.5 lakh MT urad till March-2021 while in case of tur timeline has been fixed at 15th of Nov-2020. As timing for tur import is only 32days, quantity of 4 lakh MT import is not possible. Availability of tur in Myanmar is below 2 lakh MT, while new crop would be available only in Feb. It can be imported from Mozambique too. Under prevailing condition

Agriwatch expects 2.5 to 3.0 lakh Mt import from 13th Oct to 15th Nov-2020. It must have a cooling impact on tur prices. New crop would hit market in Dec and crop condition in India is good so far.

- **The DGFT has issued public notification no. 22 dated 01.10.2020, regarding the allocation of quota for import of urad.** According to the notice, 1.5 Lakh MTs of Urad shall be distributed equally or applied quantity (whichever is lower) only to the eligible and verified applicants. The eligible and verified applicants who had been issued licenses in June 2020 will have to ensure the import consignments of Urad reach Indian Ports on or before 31.03.2021..

International Market Update:

- **Global chickpeas market traded slightly up taking clue from a tight supply side and demand situation** on physical markets. However, supply side seems ample on longer term as higher production is expected in Turkey and India this year. The biggest change can be seen in desi chickpea output. Chickpeas harvesting is on in Australia.. The last production estimates were released in September, at which time the crop was pegged at a record 1.18 million metric tons (MT) of desi and 58,500 MT of kabuli chickpeas.
- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons in 2020-21.** It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production.
- **Global lentil markets continued to trade firm and the firm tone may continue on demand from countries** such as India, Sri Lanka and the United Arab Emirates. Higher demand from these countries has fueled expectations among importers and exporters that prices are likely to maintain an upward trend through the balance of the marketing year. Comments during the online lentil sessions of the week's virtual Global Pulse Confederation lentil sessions suggest farmers in several countries had become disillusioned with prices over the past year, with many setting price targets at which they would be willing to sell remaining new and old crop product on their farms.
- **US chickpea area for 2020-21 is forecast by the USDA to fall by 44% to 0.25 million acres.** With similar yields and lower abandonment, 2020-21 US chickpea production is forecast by USDA at below 0.2 Mt, down 38% from the previous year. The main export markets are Pakistan, the EU and Canada.
- **In the US, the area seeded to lentils for 2020-21 is forecast by the USDA at just over 0.5 million acres,** 7% higher than 2019-20 due to higher area seeded in Montana being offset by lower seeded area in North Dakota. With higher yields and lower abandonment, US lentil production is forecast by USDA at below 0.3 Mt, up 21% from last year. The main US export markets for lentils are expected to continue to be Canada, India and the EU, particularly Spain.
- **For 2020-21, Canadian lentil seeded area rose by 11.96 % to 1.72 Mha, due to** good forecasted returns compared to other crops. It was 1.53Mha in 2019-20. By province, Saskatchewan accounts for 90% of the lentil area, with the remainder seeded in Alberta and Manitoba. Production is forecast to increase to 3.06 MMT (2.24MMT last year), with supply lower due to smaller carry-in stocks. Exports are forecast to be lower at 2.4 MMT. Carry-out stocks are forecast to rise to nearly 0.475 MMT. The average price for all grades and types is forecast to rise from 2019-20, with higher prices from large green and red types. It may rule in the range of \$520-550 per metric tonne throughout the year. There is an expectation that import demand in the Indian subcontinent will continue to be similar or slighter higher in 2020-21. The data has been taken from the latest update from Agriculture & Agri food Canada.
- **For 2020-21, the area seeded under chickpeas fell by 23.89% from 2019-20 to 121 thousand ha** due to the lower farm gate prices received in the previous year. It was 159 thousand ha in 2019-20. Saskatchewan is expected to account for the majority of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 239 Kt, down 6.63% from the previous year, due to lower seeded area despite higher expected yields. Supply is forecast to rise from 2019-20 to 539Kt. Exports are forecast to rise from 105 to 125Kt and carry-out stocks are forecast to fall from 250 to 330 Kt in 2020-21. The average price is forecast to fall marginally due to a larger world supply, with the expectation of an average grade distribution. It may hover in the range of \$450 to \$475 per tonne.

- As per the latest update from Agriculture & Agri food Canada (AAFC) seeded area under dry peas is expected to decrease slightly by 1.76 % to 1722 thousand ha in 2020-21. Despite lower coverage area production is expected to increase from 4.23 to 4.36 MMT in 2020-21 due to higher yield of 2.6 tonne per ha. Export volume too may decrease from 3.83 to 3.80 MMT in 2020-21. Despite higher domestic usage carryout is expected to increase from 233 to 250 Kt in 2020-21 due to lower export volume this year. Prices are expected to hover in the range of \$250 to 260 per metric tonne.

Daily Outlook: -Pulses are likely to trade sideways..
