

Pulses Domestic Fundamentals:

Today's Update:

- **Unconfirmed sources say that Nafed has rejected tur tender for the reason unknown.** The highest bid was Rs7100. There is a gossip in the market that Nafed would not accept bids below Rs7400-7500. It may push up tur price again. Stocks at port is low and vessels coming from Myanmar would hit Indian ports in only in the beginning of November. So, price movement would follow the Nafed action in coming days. As there is a tight supply side in the market, Nafed should release stock to cool down the prevailing prices. Notably, Nafed had decided to sell tur in Maharashtra, Karnataka and Gujarat.

Previous Update:

- **Demand for dal at higher level got struck and mills are buying pulses based on their immediate needs.** It has pressurized market to some extent. However, with likely improvement in demand prices may recover again. Pressure is higher on chana and lentils. Recovery is expected in Nov. Chana and masur may dip by Rs 100 more from current level. There is weak demand for urad and moong too as mills are unwilling to buy at this level. Nafed Mumbai has decided to sell 1 lakh MT tur from its stock amid likely higher volume of import in Nov. So, tur price too can be seen under pressure. Weak tone may prevail in cash pulses market this week.
- **Recent nod for tur import with time limit of 15th November-2020 would not help in filling the gap** of current demand & supply side. Import of 4 lakh MT in just 32 days is not possible. Under prevailing condition import volume is expected to be in the range of 1 to 1.25 lakh Mt till 15th November. Out of total Agriwatch expects 0.4 lakh MT from Myanmar, 0.5 lakh MT from Sudan, Tanzania and Mozambique and 0.1 lakh MT from Nigeria and Ethiopia. Besides, 0.25 lakh MT is expected from various sources through G to G basis. Demand for tur is even higher in domestic market during festive season. Prices of tur may increase by Rs300-350 per qtl before the imported crop hits the Indian markets.
- **Mumbai High Court has ordered to release peas lying at ports for a long time. Importers have fulfilled** all conditions including penalty of 10% and succeeded to get order for release. The quantity in question is said to be 38,500 MT. Out total only 1206 MT had been released earlier. The issue is pending for decision in Supreme Court too. The DGFT had requested the high court to wait till Supreme Court decision comes. But Mumbai high court has turned down its request. So, there are fair chances of releasing this stock from port. It would be a great respite for importers. If it is not released soon, peas quality may be affected- says importers.
- **Chana futures traded firm taking clue from restricted sale by Nafed/ stockists and** improved demand at higher level. Apart from it gossip regarding duty slash could not impress market. Govt is unwilling to slash duty at this point of time when sowing begins. Actually, govt. does not want to give any negative signal to farmers right now. So, Agriwatch expects market to move up again. This year chana area may cross previous record level as prices are higher than MSP at the time of sowing.
- **Cash urad market traded slightly down as demand by mills at higher level got struck amid issuance** of import licenses for 1.5 lakh Mt urad. Besides, Nafed has decided to continue release of old stock to increase supply in the market. Urad rabi area is expected to increase in AP and Tamil Nadu as prices are ruling much higher than MSP. However recent rains may delay sowing by 10 to 15 days. Sideways movement is expected in cash urad market in the short term.
- **Lentils cash market continued to move sideways with changing import duty** structures during last four months. The government had reduced import duty on lentils in the beginning of June (2nd June-2020) from 30 to 10 percent for three months till August 31. The import duty again reverted to its previous level of 30 percent on September 1. With sensing short supply and higher prevailing prices, import duty was reduced again to 10% and it would be effective till 31st Oct-2020. Lower duty would increase import flow till Oct-2020 and keep prices under check during lean and sowing season. Agriwatch expects range bound movement in Oct under prevailing market fundamentals.

International Market Update:

- **Dry peas production in Canada is expected to increase by 3% to 4.4 million tonne due to higher yield in 2020-21.** The major producing states like Alberta and Saskatchewan may contribute 4.1 MMT. Manitoba and Eastern Canada may harvest 0.3 MMT this year. So, supply side too is expected to be higher by 3% from last year to 4.7 MMT. Export is likely to stay steady at 3.8MMT. The major buyers may be China, the US and Bangladesh like previous year. However, carry-out stocks are forecast to fall marginally despite likely improvement in domestic use. Average price may increase by 4% from previous year to \$275/tonne.
- **Farmgate prices for green peas increased \$30.00 in Saskatchewan, yellow peas prices increased by \$20 in September-2020.** Green dry peas prices are currently at a \$35/t premium to yellow dry peas compared to last year when green pea prices were a \$115/t premium to yellow peas.
- **Lentils production in Canada is expected to increase by 29% to 3.1 MMT in 2020-21 due to higher yield and coverage area.** Out of total large green lentils may contribute 0.7 MMT while the share of red lentils may be 2.1 MMT, followed by other types at 0.3 MMT. Supply side seems to stay steady at previous year level due to lower carry-in stocks. Canada may export 2.7 MMT in 2020-21, lower by 2% from last year. Domestic use may decrease by 3% to 0.249 MMT this year. Carry out stocks are expected to increase by 31% from previous year to 0.3 MMT. Overall average price is likely to be higher by 20% from previous year.
- **Global chickpeas market traded slightly up taking clue from a tight supply side and demand situation on physical markets.** However, supply side seems ample on longer term as higher production is expected in Turkey and India this year. The biggest change can be seen in desi chickpea output. Chickpeas harvesting is on in Australia. The last production estimates were released in September, at which time the crop was pegged at a record 1.18 million metric tons (MT) of desi and 58,500 MT of kabuli chickpeas.
- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons in 2020-21.** It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production.
- **Global lentil markets continued to trade firm and the firm tone may continue on demand from countries such as India, Sri Lanka and the United Arab Emirates.** Higher demand from these countries has fueled expectations among importers and exporters that prices are likely to maintain an upward trend through the balance of the marketing year. Comments during the online lentil sessions of the week's virtual Global Pulse Confederation lentil sessions suggest farmers in several countries had become disillusioned with prices over the past year, with many setting price targets at which they would be willing to sell remaining new and old crop product on their farms.
- **US chickpea area for 2020-21 is forecast by the USDA to fall by 44% to 0.25 million acres.** With similar yields and lower abandonment, 2020-21 US chickpea production is forecast by USDA at below 0.2 Mt, down 38% from the previous year. The main export markets are Pakistan, the EU and Canada.
- **In the US, the area seeded to lentils for 2020-21 is forecast by the USDA at just over 0.5 million acres, 7% higher than 2019-20** due to higher area seeded in Montana being offset by lower seeded area in North Dakota. With higher yields and lower abandonment, US lentil production is forecast by USDA at below 0.3 Mt, up 21% from last year. The main US export markets for lentils are expected to continue to be Canada, India and the EU, particularly Spain.
- **For 2020-21, the area seeded under chickpeas fell by 23.89% from 2019-20 to 121 thousand ha** due to the lower farm gate prices received in the previous year. It was 159 thousand ha in 2019-20. Saskatchewan is expected to account for the majority of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 239 Kt, down 6.63% from the previous year, due to lower seeded area despite higher expected yields. Supply is forecast to rise from 2019-20 to 539 Kt. Exports are forecast to rise from 105 to 125 Kt and carry-out stocks are forecast to fall from 250 to 330 Kt in 2020-21. The average price is forecast to fall marginally due to a larger world supply, with the expectation of an average grade distribution. It may hover in the range of \$450 to \$475 per tonne.
- **Daily Outlook:** -Pulses are likely to trade sideways..
