

Pulses Domestic Fundamentals:

Today's Update:

- **Indian pulses sector has seen so many changes on import front during last few weeks and it has affected the entire sector in one way or other.** Govt. seems to ease supply side and control prices by using all available methods. With this background govt has extended time limit for 4 lakhMT tur import till Dec-2020. Apart from it 1.5 lakhMT import license for urad has been issued and can be imported till March -2021.Import duty on masur@10% duty will continue till Dec-2020.
- **Besides, for curbing prices decision of supplying moong , urad and tur to states/others from buffer stock has been taken.** Around 2 lakh MT tur will be sold through OMS in next 15teen days.The govt has also decided to extend MoU with Mozambique for 2 lakhMT tur import for another five years. The same MoU for 2.5 lakh MT per year urad import with Myanmar for 5 next years will be signed soon. All these factors would ensure ample pulses supply in India in coming years. There is good production prospects for rabi pulses too.
- **Demand for tur and tur dal is poor despite low rate. Changing import timeline and rules continue to affect market sentiments.** Arrival from the new crop is expected from mid- Dec-2020. There is a report of crop damage in Karnataka and MH. However, higher area coverage would compensate the loss to a certain extent. In other states, crop conditions are good. Under prevailing condition 38 to 39 lakh MT crop is expected. Millers have restricted buying while nafed has accepted bids at Rs7100 in Karnataka. If Nafed continues to accept bids at Rs 7000-7100, prices of tur should stabilize at Rs 6800-6900 in coming weeks. Overall tone seems weak in pulses market in the near term.

Previous Update:

- **Tur crop in Myanmar is expected to hit local market by Dec end. Arrival gap between India and Myanmar is 15 to 20 days.** Full-fledged arrival in India is expected in Jan-2021. Expert say that Myanmar may harvest 2 to 2.25 lakh MT tur this year. Old stock in Myanmar is said to be 1 to 1.5 lakh MT as per market sources. So, availability in Myanmar is lower than Indian requirement. So CiF quote is bound to increase in Myanmar.
- **Urad stocks, imported or desi, with mills and markets are said to be lower than normal expectation** at this point of time. Even farmers have restricted selling sensing strong inner tonne. Import licenses for 1.5 lakh Mt has been issued but importers are unwilling to import at higher prices from Myanmar. Stocks of urad gota too has decreased to negligible level. Stocks of small grain urad are in strong hands and so they are dominating the market and quote higher prices. Right now prices are steady because of weak demand for dhoya and chika dal. As soon as demand improves, prices may move up again by Rs 200-300 per qtl. Nafed may increase sale to augment supply in the market.
- **Frequent changes in import duty for masur have affected normal course of trade for masur traders.** Notably, govt. had cut import duty second time from 30 to 10% and it will remain effective till 31st oct-2020. Due to lower import duty volume of import increased and India imported around 2.75 lakhMt in Aug and Sep while Agriwatch expects 1 to 1.25 lakhMt more import in Oct-2020 before deadline of 31st Oct. One vessel is expected by the end of this month and due to time limitation now it is being diverted from Mundra to Kakinada. If time extension is not given, import volume would decrease and price may move up again. Under prevailing condition when planting is on, govt would not extend time line for import on reduced duty.
- **Demand for dal at higher level got struck and mills are buying pulses based on their immediate needs.** It has pressurized market to some extent. However, with likely improvement in demand prices may recover again. Pressure is higher on chana and lentils. Recovery is expected in Nov. Chana and masur may dip by Rs 100 more from current level. There is weak demand for urad and moong too as mills are unwilling to buy at this level. Nafed Mumbai has decided to sell 1lakhMT tur from its stock amid likely higher volume of import in Nov. So, tur price too can be seen under pressure. Weak tone may prevail in cash pulses market this week.

- **Lentils cash market continued to move sideways with changing import duty** structures during last four months. The government had reduced import duty on lentils in the beginning of June (2nd June-2020) from 30 to 10 percent for three months till August 31. The import duty again reverted to its previous level of 30 percent on September 1. With sensing short supply and higher prevailing prices, import duty was reduced again to 10% and it would be effective till 31st Oct-2020. Lower duty would increase import flow till Oct-2020 and keep prices under check during lean and sowing season. Agriwatch expects range bound movement in Oct under prevailing market fundamentals.

International Market Update:

- **Dry peas production in Canada is expected to increase by 3% to 4.4 million tonne due to higher yield** in 2020-21. The major producing states like Alberta and Saskatchewan may contribute 4.1 MMT. Manitoba and Eastern Canada may harvest 0.3 MMT this year. So, supply side too is expected to be higher by 3% from last year to 4.7 MMT. Export is likely to stay steady at 3.8MMT. The major buyers may be China, the US and Bangladesh like previous year. However, carry-out stocks are forecast to fall marginally despite likely improvement in domestic use. Average price may increase by 4% from previous year to \$275/tonne.
- **Farmgate prices for green peas increased \$30/tonne in Saskatchewan, yellow peas prices** increased by \$20 in September-2020. Green dry peas prices are currently at a \$35/t premium to yellow dry peas compared to last year when green pea prices were a \$115/t premium to yellow peas.
- **Lentils production in Canada is expected to increase by 29% to 3.1 MMT in 2020-21 due to higher yield** and coverage area. Out of total large green lentils may contribute 0.7 MMT while the share of red lentils may be 2.1 MMT, followed by other types at 0.3 MMT. Supply side seems to stay steady at previous year level due to lower carry-in stocks. Canada may export 2.7MMT in 2020-21, lower by 2% from last year. Domestic use may decrease by 3% to 0.249MMT this year. Carry out stocks are expected to increase by 31% from previous year to 0.3MMT. Overall average price is likely to be higher by 20% from previous year.
- **Global chickpeas market traded slightly up taking clue from a tight supply side and demand situation** on physical markets. However, supply side seems ample on longer term as higher production is expected in Turkey and India this year. The biggest change can be seen in desi chickpea output. Chickpeas harvesting is on in Australia. The last production estimates were released in September, at which time the crop was pegged at a record 1.18 million metric tons (MT) of desi and 58,500 MT of kabuli chickpeas.
- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons in 2020-21.** It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production.
- **Global lentil markets continued to trade firm and the firm tone may continue on demand from countries** such as India, Sri Lanka and the United Arab Emirates. Higher demand from these countries has fueled expectations among importers and exporters that prices are likely to maintain an upward trend through the balance of the marketing year. Comments during the online lentil sessions of the week's virtual Global Pulse Confederation lentil sessions suggest farmers in several countries had become disillusioned with prices over the past year, with many setting price targets at which they would be willing to sell remaining new and old crop product on their farms.
- **US chickpea area for 2020-21 is forecast by the USDA to fall by 44% to 0.25 million acres.** With similar yields and lower abandonment, 2020-21 US chickpea production is forecast by USDA at below 0.2 Mt, down 38% from the previous year. The main export markets are Pakistan, the EU and Canada.
- **In the US, the area seeded to lentils for 2020-21 is forecast by the USDA at just over 0.5 million acres, 7% higher** than 2019-20 due to higher area seeded in Montana being offset by lower seeded area in North Dakota. With higher yields and lower abandonment, US lentil production is forecast by USDA at below 0.3 Mt, up 21% from last year. The main US export markets for lentils are expected to continue to be Canada, India and the EU, particularly Spain.

- **For 2020-21, the area seeded under chickpeas fell by 23.89% from 2019-20 to 121 thousand ha** due to the lower farm gate prices received in the previous year. It was 159 thousand ha in 219-20. Saskatchewan is expected to account for the majority of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 239 Kt, down 6.63% from the previous year, due to lower seeded area despite higher expected yields. Supply is forecast to rise from 2019-20 to 539Kt. Exports are forecast to rise from 105 to 125Kt and carry-out stocks are forecast to fall from 250 to 330 Kt in 2020-21. The average price is forecast to fall marginally due to a larger world supply, with the expectation of an average grade distribution. It may hover in the range of \$450 to \$475 per tonne.
- **Daily Outlook:** -Pulses are likely to trade sideways.
