

### Pulses Domestic Fundamentals:

#### Today's Update:

- **Chana continued to trade under pressure taking clue from weak futures and decision of sale through auction by Nafed from 5th Nov-2020 in Mumbai, Bangalore and Hyderabad.** Under prevailing condition private traders too may opt for releasing chana in parts. Area under chana is bound to increase this year by 5 to 8 % while availability is higher in domestic market. So, any spike is unlikely in Nov. If demands improves, recovery may be seen to a certain extent. New crop is four months away. Nafed can release more than one million MT chana in next four months while private traders too can release same quantity. Besides, import from LDC would continue. So, any jump in chana price is unlikely in Nov. Market may hinge in the range of Rs5000-5400 in Nov. Overall short term outlook is weak.
- **Tur import time line extension till Dec-2020 has affected the entire tur Daal Udyog negatively.** New crop would hit local market from mid-Dec and import too will continue till Dec. It has pressurized tur cash market considerably. Prices have decreased by Rs1000-1100 to Rs 6020-6300 per qtl. in Gulberga market. Prices may decrease further as govt too would provide 2 lakh MT tur to states and UTs in next 15days. Under prevailing condition millers are bound to lose money as they had brought tur at higher prices. Prices of tur would go down below MSP. So it would be very difficult to provide MSP for farmers in arrival season. Private buying would be limited while govt. would not be able to buy tur from every farmers.

#### Previous Update:

- **Demand for tur and tur dal is poor despite low rate. Changing import timeline and rules continue to affect market sentiments.** Arrival from the new crop is expected from mid- Dec-2020. There is a report of crop damage in Karnataka and MH. However, higher area coverage would compensate the loss to a certain extent. In other states, crop conditions are good. Under prevailing condition 38 to 39 lakh MT crop is expected. Millers have restricted buying while nafed has accepted bids at Rs7100 in Karnataka. If Nafed continues to accept bids at Rs 7000-7100, prices of tur should stabilize at Rs 6800-6900 in coming weeks. Overall tone seems weak in pulses market in the near term.
- **Lentils Masur cash market traded lower and pressure is likely to continue to masur market in coming weeks.** Extended timeline for import till 31st Dec-2020 now would ease supply side as import flow at reduced duty would continue and volume may increase to 9 lakhMT during ongoing MY. Masur is being trade at Rs 5250-5300 in Mumbai market while it is quoted at Rs 5400 in Kanpur market. Masur area may increase this year by 5 %.
- **Indian pulses sector has seen so many changes on import front during last few weeks and it has affected the entire sector in one way or other.** Govt. seems to ease supply side and control prices by using all available methods. With this background govt has extended time limit for 4 lakhMT tur import till Dec-2020. Apart from it 1.5 lakhMT import license for urad has been issued and can be imported till March -2021. Import duty on masur@10% duty will continue till Dec-2020.
- **Besides, for curbing prices decision of supplying moong , urad and tur to states/others from buffer stock has been taken.** Around 2 lakh MT tur will be sold through OMS in next 15teen days. The govt has also decided to extend MoU with Mozambique for 2 lakhMT tur import for another five years. The same MoU for 2.5 lakh MT per year urad import with Myanmar for 5 next years will be signed soon. All these factors would ensure ample pulses supply in India in coming years. There is good production prospects for rabi pulses too.
- **Urad stocks, imported or desi, with mills and markets are said to be lower than normal expectation at this point of time.** Even farmers have restricted selling sensing strong inner tonne. Import licenses for 1.5 lakh Mt has been issued but importers are unwilling to import at higher prices from Myanmar. Stocks of urad gota too has decreased to negligible level. Stocks of small grain urad are in strong hands and so they are dominating the market and quote higher prices. Right now prices are steady because of weak demand for dhoya and chika dal. As soon as demand improves, prices may move up again by Rs 200-300 per qtl. Nafed may increase sale to augment supply in the market.

### International Market Update:

- **Global lentil markets continued to trade firm and the firm tone may continue on demand from countries** such as India, Sri Lanka and the United Arab Emirates. Higher demand from these countries has fueled expectations among importers and exporters that prices are likely to maintain an upward trend through the balance of the marketing year. Comments during the online lentil sessions of the week's virtual Global Pulse Confederation lentil sessions suggest farmers in several countries had become disillusioned with prices over the past year, with many setting price targets at which they would be willing to sell remaining new and old crop product on their farms.
- **US chickpea area for 2020-21 is forecast by the USDA to fall by 44% to 0.25 million acres.** With similar yields and lower abandonment, 2020-21 US chickpea production is forecast by USDA at below 0.2 Mt, down 38% from the previous year. The main export markets are Pakistan, the EU and Canada.
- **In the US, the area seeded to lentils for 2020-21 is forecast by the USDA at just over 0.5 million acres,** 7% higher than 2019-20 due to higher area seeded in Montana being offset by lower seeded area in North Dakota. With higher yields and lower abandonment, US lentil production is forecast by USDA at below 0.3 Mt, up 21% from last year. The main US export markets for lentils are expected to continue to be Canada, India and the EU, particularly Spain
- **Dry peas production in Canada is expected to increase by 3% to 4.4 million tonne due to higher yield** in 2020-21. The major producing states like Alberta and Saskatchewan may contribute 4.1 MMT. Manitoba and Eastern Canada may harvest 0.3 MMT this year. So, supply side too is expected to be higher by 3% from last year to 4.7 MMT. Export is likely to stay steady at 3.8 MMT. The major buyers may be China, the US and Bangladesh like previous year. However, carry-out stocks are forecast to fall marginally despite likely improvement in domestic use. Average price may increase by 4% from previous year to \$275/tonne.
- **Farmgate prices for green peas increased \$30.00 in Saskatchewan, yellow peas prices** increased by \$20 in September-2020. Green dry peas prices are currently at a \$35/t premium to yellow dry peas compared to last year when green pea prices were a \$115/t premium to yellow peas.
- **Lentils production in Canada is expected to increase by 29% to 3.1 MMT in 2020-21 due to higher yield** and coverage area. Out of total large green lentils may contribute 0.7 MMT while the share of red lentils may be 2.1 MMT, followed by other types at 0.3 MMT. Supply side seems to stay steady at previous year level due to lower carry-in stocks. Canada may export 2.7 MMT in 2020-21, lower by 2% from last year. Domestic use may decrease by 3% to 0.249 MMT this year. Carry out stocks are expected to increase by 31% from previous year to 0.3 MMT. Overall average price is likely to be higher by 20% from previous year.
- **Global chickpeas market traded slightly up taking clue from a tight supply side and demand situation** on physical markets. However, supply side seems ample on longer term as higher production is expected in Turkey and India this year. The biggest change can be seen in desi chickpea output. Chickpeas harvesting is on in Australia. The last production estimates were released in September, at which time the crop was pegged at a record 1.18 million metric tons (MT) of desi and 58,500 MT of kabuli chickpeas.
- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons in 2020-21.** It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production..
- **For 2020-21, the area seeded under chickpeas fell by 23.89% from 2019-20 to 121 thousand ha** due to the lower farm gate prices received in the previous year. It was 159 thousand ha in 2019-20. Saskatchewan is expected to account for the majority of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 239 Kt, down 6.63% from the previous year, due to lower seeded area despite higher expected yields. Supply is forecast to rise from 2019-20 to 539 Kt. Exports are forecast to rise from 105 to 125 Kt and carry-out stocks are forecast to fall from 250 to 330 Kt in 2020-21. The average price is forecast to fall marginally due to a larger world supply, with the expectation of an average grade distribution. It may hover in the range of \$450 to \$475 per tonne.

- **Daily Outlook:** -Pulses are likely to trade sideways.
