

Pulses Domestic Fundamentals:

Today's Update:

- **Nafed may continue to sell chana in Gujarat , Haryana, Rajasthan, Madhya Pradesh and Uttar Pradesh** from 12th Nov-2020 despite rejection of bids recently. It would increase supply in market. Acceptance of bid level would be crucial for price direction. In Delhi market chana traded in the range of 5100-5250. Around 25 motors arrival was reported.
- **Tur market traded mixed despite rejection of tender by Nafed in MH. It supported cash market in Nagpur, Akola and Jalgaon.** It traded at Rs 6600 in Nagpur while Gulberga market traded steady. Nafed may continue to offer tur through auction in regulated way. Pressure from imported tur might be seen from third week of Nov. Apart from it, demand for dal may decrease after Diwali. So any spike is unlikely in tur market. As supply side is tight right now and Nafed is restricting sale, some improvement is expected in two three days. Nafed decision is crucial for price direction now. New crop may hit market in end Dec.
- **As per the latest update by The Department of Consumer Affairs, Food & Public Distribution,** in view of the rising prices of pulses, the imports are being facilitated to augment the availability of pulses. Import volume is likely to increase at ports like JNPT, Chennai & Mundra in coming days. Now for speeding up the clearing process importers of pulses may carry out advance filing of bill of entries in Food Import Clearance System of FSSAI and the authorize officers have been directed to facilitate and carry out food import clearance process on priority basis without delay for the consignments of imported pulses.

Previous Update:

- **With favorable weather condition rabi pulses sowing is running smoothly. Farmers have planted 36.43 lakh ha area so far against normal of 144.89 lakh ha.** Out of total farmers have covered 25.1 lakh ha area under gram against normal of 92.77 lakh ha. Farmers have covered 3.7 lakh ha under lentils(normal 14.24 lakh ha), 2.86 lakh ha under field pea (normal 8.78 lakh ha), 0.92 lakh ha under urad(normal 8.93 lakh ha), 0.11 lakh ha under moong(normal 9.86 lakh ha), 0.91 lakh ha under other pulses(normal 4.14 lakh ha). Gram area is running ahead by 44% from last year so far, field pea up by 101%, lentils up by 89% , other pulses up by 9.64%. However, urad and moong coverage is lower by 1 and 45 % so far. Farmers may increase sowing activities in coming weeks under moong and urad.
- **Stock of chana with Nafed has decreased considerably under free distribution scheme through PMGKY during last 5 months and It may restrict release in coming weeks to support market at current level.** Out of total stock of 28 lakh MT, available in April-2020, around 60 to 70 % has been consumed now. So pace of release by Nafed would be slow. Market sources say that Nafed has around 10 Lakh MT stock now while new crop is expected only in Feb-2021. So recovery is expected in cash chana market this week. Demand is normal right now. However, it may decline after Diwali. So any spike is unlikely in cash chana market. Sowing is on and area this year may cross 115 lakh MT. It may trade in the range of Rs5150-5500 in Nov-2020.
- **There was no trade deal reported yesterday in urad in Myanmar. Buyers was interested to buy at \$1100 for SQ** while sellers quoted \$1120. Difference may increase as Indian buyers are in no hurry. Nafed here in domestic market is ensuring supply by releasing old stock. Demand is weak so sideways movement is expected in the short term. However slight recovery was seen in cash market and it traded Rs 100 up to Rs7600 in Mumbai and Rs 7800 in Chennai.
- **Lentils Masur cash market traded lower and pressure is likely to continue to masur market in coming weeks.** Extended timeline for import till 31st Dec-2020 now would ease supply side as import flow at reduced duty would continue and volume may increase to 9 lakh MT during ongoing MY. Masur is being trade at Rs 5250-5300 in Mumbai market while it is quoted at Rs 5400 in Kanpur market. Masur area may increase this year by 5 %.

International Market Update:

- **Global Chickpeas market traded almost flat last week. However desi chickpeas traded slightly weak** due to higher production in Australia. Harvesting activities are on in parts of Australia. Australian exporters are hoping that India may reduce import duties on chickpeas in an effort to reduce food prices to urban consumers. Export in Sep was recorded up at 27,310 MT, up from 19,812 MT Aug-2020. This boosted shipments so far during the marketing year to 310,730, down 4% last year. Bangladesh brought 11,243 MT and Pakistan taking 5,971 MT, followed by United Arab Emirates at 3,592 MT.
- **Mixed tone was seen in global lentils market. Despite demand from countries like India** markets have doubt regarding exporter's capacity to finalize sales to India in time for the product to arrive before that country's import duties increase at the end of the year. Two factors may affect export to India. One is to buy at source, get containers and rail rake in time. Load them and deliver them to ports. Second is to send it to destination before Dec-2020 at Indian ports. So, import flow may be slower than market expectation in Nov and Dec.
- **According to Statistics Canada red lentils export from Canada posted smart improvement in Sep** in comparison to Aug-2020. Turkey, India and UAE were the major buyers in Sep-2020, buying 98,557 MT, 93,264 MT & 38,764 MT respectively. This brings total sales to 274,994 MT during ongoing MY, versus 230,634 in the same period the last marketing year.
- **According to official trade statistics from Australia Bureau of Statistics, chickpeas export from Australia** posted smart gains in Sep in comparison to Aug-2020. It was recorded at 27,310 MT higher by 19,812 MT from Aug-2020. This brings total to 310,730 MT during the ongoing MY. However, it is down by 4% from last year till Sep-2019. Bangladesh brought 11,243 MT while Pakistan 5,971 MT, followed by United Arab Emirates at 3,592 MT.
- **US chickpea area for 2020-21 is forecast by the USDA to fall by 44% to 0.25 million acres.** With similar yields and lower abandonment, 2020-21 US chickpea production is forecast by USDA at below 0.2 Mt, down 38% from the previous year. The main export markets are Pakistan, the EU and Canada.
- **In the US, the area seeded to lentils for 2020-21 is forecast by the USDA at just over 0.5 million acres,** 7% higher than 2019-20 due to higher area seeded in Montana being offset by lower seeded area in North Dakota. With higher yields and lower abandonment, US lentil production is forecast by USDA at below 0.3 Mt, up 21% from last year. The main US export markets for lentils are expected to continue to be Canada, India and the EU, particularly Spain.
- **Dry peas production in Canada is expected to increase by 3% to 4.4 million tonne due to higher yield** in 2020-21. The major producing states like Alberta and Saskatchewan may contribute 4.1 MMT. Manitoba and Eastern Canada may harvest 0.3 MMT this year. So, supply side too is expected to be higher by 3% from last year to 4.7 MMT. Export is likely to stay steady at 3.8 MMT. The major buyers may be China, the US and Bangladesh like previous year. However, carry-out stocks are forecast to fall marginally despite likely improvement in domestic use. Average price may increase by 4% from previous year to \$275/tonne.
- **Farmgate prices for green peas increased \$30/tonne in Saskatchewan, yellow peas prices** increased by \$20 in September-2020. Green dry peas prices are currently at a \$35/t premium to yellow dry peas compared to last year when green pea prices were a \$115/t premium to yellow peas.
- **Lentils production in Canada is expected to increase by 29% to 3.1 MMT in 2020-21 due to higher yield** and coverage area. Out of total large green lentils may contribute 0.7 MMT while the share of red lentils may be 2.1 MMT, followed by other types at 0.3 MMT. Supply side seems to stay steady at previous year level due to lower carry-in stocks. Canada may export 2.7 MMT in 2020-21, lower by 2% from last year. Domestic use may decrease by 3% to 0.249 MMT this year. Carry out stocks are expected to increase by 31% from previous year to 0.3 MMT. Overall average price is likely to be higher by 20% from previous year.
- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons in 2020-21.** It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production..

- **For 2020-21, the area seeded under chickpeas fell by 23.89% from 2019-20 to 121 thousand ha due to the lower farm gate prices received in the previous year. It was 159 thousand ha in 219-20. Saskatchewan is expected to account for the majority of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 239 Kt, down 6.63% from the previous year, due to lower seeded area despite higher expected yields. Supply is forecast to rise from 2019-20 to 539Kt. Exports are forecast to rise from 105 to 125Kt and carry-out stocks are forecast to fall from 250 to 330 Kt in 2020-21. The average price is forecast to fall marginally due to a larger world supply, with the expectation of an average grade distribution. It may hover in the range of \$450 to \$475 per tonne.**
- **Daily Outlook: -Pulses are likely to trade mixed.**
