

Pulses Domestic Fundamentals:

Today's Update:

- **FSSAI (The Food Safety and Standards Authority Of India) has directed to its authorized** officers at the ports of entries to facilitate the import clearance of pulses on priority basis. An order has been issued to concerned departments to expedite the clearance of the pulses. Higher volume of import is expected at ports like JNPT Mumbai, Chennai, and Mundra in coming weeks. The authorized officers at ports have been directed to expedite the clearance of the pulses without any delay. Even importers of pulses can carry out advance filing of Bills of Entries in Food Clearance System of FSSAI in advance.
- **As per market sources the Nafed is going to commence the disposal of one lakh Mt PSF tur** in A P and Telangana from 19th Nov-2020. The disposal schedule is expected shortly. Apart from it a vessel namely M V EVOLUTION having 13000 tonnes of Tanzania Tur is likely to hit Mumbai Port on 23th November, 2020. It may ease supply side for millers/traders in South India.
- **Nafed has procured total 3853.71 MT moong during kharif season -20 till 17th Nov-2020.** Out of total maximum quantity (2326.69 MT) has been procured in Rajasthan, followed by Haryana at 1099 MT and Mh at 381 MT. As prices have been ruling at higher level, Nafed is unable to procure higher quantity at MSP.

Previous Update:

- **With favorable weather condition rabi pulses sowing is running smoothly. Farmers have planted 62.72 lakh ha** area so far against normal of 144.89 lakh ha. Out of total farmers have covered 43.82 lakh ha area under gram against normal of 92.77 lakh ha. Farmers have covered 6.80 lakh ha under lentils (normal 14.24 lakh ha), 5.03 lakh ha under field pea (normal 8.78 lakh ha), 1.64 lakh ha under urad (normal 8.93 lakh ha), 0.21 lakh ha under moong (normal 9.86 lakh ha), 1.49 lakh ha under other pulses (normal 4.14 lakh ha). Gram area is running ahead by 41% from last year so far, field pea up by 80%, lentils up by 57%, other pulses up by 47%. However, moong coverage is lower by 44% so far. Farmers may increase sowing activities in coming weeks under moong and urad.
- **Nafed has reserved 8 lakh MT chana as buffer stock. Out of total procurement of around 21 lakh MT,** it has sold 6 lakh Mt chana so far. So around 7 lakh MT chana is available for sale during ongoing season. New crop is expected not before mid-Feb. So improvement in chana is expected in coming weeks. Sowing is running with smooth pace despite late start. It may affect yield. Arrival in major markets is likely to be poor this week. With improvement of price in cash market arrival too may increase. This year area under chana may improve and may cross 115 lakh ha. As prices are ruling higher than MSP. In Delhi market chana is being traded at Rs 5250-5350. It may move up to Rs 5400-5500 in coming weeks. India imported around 75500 MT kabuli and desi chana in Oct-2020.
- **Govt. has issues licenses for 1.5 lakh MT moong import and imported consignment should arrive** Indian port by 31st March-2021. Country of origin will mention all GCA countries. Besides, CIF value can be altered at the time of issuance of licenses. Port of entry can also be changed. Mills name with allocated quantity (150 MT per mill) has already been published. Import is possible only from Uzbekistan as availability in East Africa, Brazil, Argentina, Australia and Myanmar is negligible. So Uzbek moong can hit Indian market at higher price. Right now China is buying moong at \$1110 per MT actively. So every month, limited volume would come to India.
- **Indian Agriculture Ministry has approved public procurement of 45.10 Lakh MT pulses and oilseeds** for kharif season 2020 for several states and awaits proposal from others. As per latest update by reliable sources govt.'s agencies have procured 125% higher pulses and oilseeds till 9th Nov-2020.
- **Lentils Masur cash market traded lower and pressure is likely to continue to masur** market in coming weeks. Extended timeline for import till 31st Dec-2020 now would ease supply side as import flow at reduced duty would continue and volume may increase to 9 lakh MT during ongoing MY. Masur is being traded at Rs 5250-5300 in Mumbai market while it is quoted at Rs 5400 in Kanpur market. Masur area may increase this year by 5%.

International Market Update:

- **Movement of field peas for Lithuania were up sharply from the previous month in September** as per data published by Eurostat. Shipments reached 18,207 metric tons (MT) in Sep against 8,086 MT in Aug-2020. This brings total to 102,288 during the calendar year till Sep, down 34% last year. Netherlands was top buyer, receiving 7,341 MT in the month. United Kingdom was the second most important buyer buying 5,099 MT, followed by Norway at 2,750 MT.
- **Global Chickpeas market traded almost flat last week. However desi chickpeas traded** slightly weak due to higher production in Australia. Harvesting activities are on in parts of Australia. Australian exporters are hoping that India may reduce import duties on chickpeas in an effort to reduce food prices to urban consumers. Export in Sep was recorded up at 27,310 MT, up from 19,812 MT Aug-2020. This boosted shipments so far during the marketing year to 310,730, down 4% last year. Bangladesh brought 11,243 MT and Pakistan taking 5,971 MT, followed by United Arab Emirates at 3,592 MT.
- **According to Statistics Canada red lentils export from Canada posted smart improvement in Sep** in comparison to Aug-2020. Turkey, India and UAE were the major buyers in Sep-2020, buying 98,557 MT, 93,264 MT & 38,764 MT respectively. This brings total sales to 274,994 MT during ongoing MY, versus 230,634 in the same period the last marketing year.
- **According to official trade statistics from Australia Bureau of Statistics, chickpeas export from Australia** posted smart gains in Sep in comparison to Aug-2020. It was recorded at 27,310 MT higher by 19,812 MT from Aug-2020. This brings total to 310,730 MT during the ongoing MY. However, it is down by 4% from last year till Sep-2019. Bangladesh brought 11,243 MT while Pakistan 5,971 MT, followed by United Arab Emirates at 3,592 MT.
- **US chickpea area for 2020-21 is forecast by the USDA to fall by 44% to 0.25 million acres.** With similar yields and lower abandonment, 2020-21 US chickpea production is forecast by USDA at below 0.2 Mt, down 38% from the previous year. The main export markets are Pakistan, the EU and Canada.
- **In the US, the area seeded to lentils for 2020-21 is forecast by the USDA at just over 0.5 million acres,** 7% higher than 2019-20 due to higher area seeded in Montana being offset by lower seeded area in North Dakota. With higher yields and lower abandonment, US lentil production is forecast by USDA at below 0.3 Mt, up 21% from last year. The main US export markets for lentils are expected to continue to be Canada, India and the EU, particularly Spain
- **Dry peas production in Canada is expected to increase by 3% to 4.4 million tonne due to higher yield** in 2020-21. The major producing states like Alberta and Saskatchewan may contribute 4.1 MMT. Manitoba and Eastern Canada may harvest 0.3 MMT this year. So, supply side too is expected to be higher by 3% from last year to 4.7 MMT. Export is likely to stay steady at 3.8 MMT. The major buyers may be China, the US and Bangladesh like previous year. However, carry-out stocks are forecast to fall marginally despite likely improvement in domestic use. Average price may increase by 4% from previous year to \$275/tonne.
- **Lentils production in Canada is expected to increase by 29% to 3.1 MMT in 2020-21 due to higher yield** and coverage area. Out of total large green lentils may contribute 0.7 MMT while the share of red lentils may be 2.1 MMT, followed by other types at 0.3 MMT. Supply side seems to stay steady at previous year level due to lower carry-in stocks. Canada may export 2.7 MMT in 2020-21, lower by 2% from last year. Domestic use may decrease by 3% to 0.249 MMT this year. Carry out stocks are expected to increase by 31% from previous year to 0.3 MMT. Overall average price is likely to be higher by 20% from previous year.
- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons in 2020-21.** It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production..
- **For 2020-21, the area seeded under chickpeas fell by 23.89% from 2019-20 to 121 thousand ha** due to the lower farm gate prices received in the previous year. It was 159 thousand ha in 2019-20. Saskatchewan is expected to account for the majority of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 239 Kt, down 6.63% from the previous year, due to lower seeded area despite higher expected yields. Supply is forecast

to rise from 2019-20 to 539Kt. Exports are forecast to rise from 105 to 125Kt and carry-out stocks are forecast to fall from 250 to 330 Kt in 2020-21. The average price is forecast to fall marginally due to a larger world supply, with the expectation of an average grade distribution. It may hover in the range of \$450 to \$475 per tonne.

Daily Outlook: -Pulses are likely to trade mixed.
