

### Pulses Domestic Fundamentals:

#### Today's Update:

- **Lentils prices continue to cool down with easing supply side from import and smooth sowing** activities, supported by congenial weather condition in major producing states like Madhya Pradesh, Uttar Pradesh and Bihar. Agriwatch expects 13.50-14.00 lakh Mt production this year under normal weather condition. Major exporters like Australia and Canada are trying to sell as much as they can before duty revision from 10 to 30% from 1st Jan-2021. Pulses prices may be under pressure due to increasing rabi area and higher flow of import this year. Lentils price may decrease to Rs-4750-4800 by end Dec. New crop would hit market in Feb end. Overall tone is bearish.

#### Previous Update:

- **With favorable weather condition rabi pulses sowing is running smoothly. Farmers have** planted 116.56 lakh ha area so far against normal of 144.89 lakh ha. Out of total farmers have covered 82.18 lakh ha area under gram against normal of 92.77 lakh ha. Farmers have covered 13.11 lakh ha under lentils(normal 14.24 lakh ha),8.22 lakh ha under field pea (normal 8.78 lakh ha),3.39 lakh ha under urad (normal 8.93 lakh ha),0.88 lakh ha under moong(normal 9.86 lakh ha),3.26 lakh ha under other pulses(normal 4.14 lakh ha).Gram area is running ahead by 16 % from last year so far, field pea up by 15%,lentils up by 8 %,other pulses up by 26%. However, moong coverage is lower by 1.18 % so far. Farmers may increase sowing activities in coming weeks under moong and urad. See detailed table at page no-3
- **Sources say that Nafed would sell chana under PSS from all centers now. With this move Nafed** seems in a hurry to sell stock from 2020 crop rather than to control fluctuations in the market by increasing or decreasing supply. Impact of this news is visible on futures market. It may cap any smart recovery in the cash market in coming days. Selling from all centers would increase supply further in the market. Pressure continues on chana market as demand is weak after Diwali and supply from Nafed is likely to increase.
- **Apart from this area is bound to increase by 5 to 7 % this year and weather is congenial to sowing everywhere** except south Indian states. Chana in Delhi market is being traded at Rs 5000-5050.It may decrease Rs 100 more from current level. With improvement in demand prices may recover once again, but under a limit. Dec futures declined by Rs 29 to Rs4822.Its not a good omen for chana cash market.
- **Slight recovery was seen in urad cash market on fresh demand, fear of crop loss in AP and** restricted sale by private trades. Crop is in maturity stages in Kurnool and Nellore and is likely to be harvested within a fortnight from now. There is a chance of weather disturbance again and if rains occur, quality of urad may be affected. Stock is weak and the south Indian markets/Mills may depend on imported urad from Myanmar. Overall, sentiment seems firm at this point of time. FAQ urad is being traded at Rs 7350-7400 in Mumbai while rs7525-7550 in Chennai. Burma is offering FAQ urad at \$ 870 and SQ at \$975 per MT basis Indian port.
- **Despite improvement in demand tur price is likely to trade under pressure as import flow continues** from South African countries & Myanmar. Crop condition is good so far. No major loss of Tur crop has been reported from south India from recent rains and swift wind. Recent rains are said to be beneficial for the standing crops including tur. There is good moisture level in the field and it may delay harvesting at least for 15 days. Market is expecting arrival from new crop in the second fortnight of Dec. Import volume in Nov is expected around 60 to 70 thousand MT, while 50,000 MT is expected in Dec. As new crop is round the corner now, any spike in tur market is unlikely. There is an increasing possibility of downward trend and market may dip below MSP by Dec end.
- **Govt. has issues licenses for 1.5 lakh MT moong import and imported consignment should arrive** Indian port by 31st March-2021.Country of origin will mention all GCA countries. Besides, CIF value can be altered at the time of issuance of licenses. Port of entry can also be changed. Mills name with allocated quantity (150MT per mill) has already been published. Import is possible only from Uzbekistan as availability inEast Africa, Brazil, Argentina

Australia and Myanmar is negligible. So Uzbek moong can hit Indian market at higher price. Right now China is buying moong at \$1110 per MT actively. So every month, limited volume would come to India.

#### International Market Update:

- **Movement of field peas for Lithuania were up sharply from the previous month in September** as per data published by Eurostat Shipments reached 18,207 metric tons (MT) in Sep against 8,086 MT in Aug-2020. This brings total to 102,288 during the calendar year till Sep, down 34% last year. Netherlands was top buyer, receiving 7,341 MT in the month. United Kingdom was the second most important buyer buying 5,099 MT, followed by Norway at 2,750 MT.
- **Global Chickpeas market traded almost flat last week. However desi chickpeas traded slightly weak** due to higher production in Australia. Harvesting activities are on in parts of Australia. Australian exporters are hoping that India may reduce import duties on chickpeas in an effort to reduce food prices to urban consumers. Export in Sep was recorded up at 27,310 MT, up from 19,812 MT Aug-2020. This boosted shipments so far during the marketing year to 310,730, down 4% last year. Bangladesh brought 11,243 MT and Pakistan taking 5,971 MT, followed by United Arab Emirates at 3,592 MT.
- **According to Statistics Canada red lentils export from Canada posted smart improvement in Sep** in comparison to Aug-2020. Turkey, India and UAE were the major buyers in Sep-2020, buying 98,557 MT, 93,264 MT & 38,764 MT respectively. This brings total sales to 274,994 MT during ongoing MY, versus 230,634 in the same period the last marketing year.
- **According to official trade statistics from Australia Bureau of Statistics, chickpeas export from Australia posted smart gains in Sep** in comparison to Aug-2020. It was recorded at 27,310 MT higher by 19,812 MT from Aug-2020. This brings total to 310,730 MT during the ongoing MY. However, it is down by 4% from last year till Sep-2019. Bangladesh brought 11,243 MT while Pakistan 5,971 MT, followed by United Arab Emirates at 3,592 MT.
- **US chickpea area for 2020-21 is forecast by the USDA to fall by 44% to 0.25 million acres.** With similar yields and lower abandonment, 2020-21 US chickpea production is forecast by USDA at below 0.2 Mt, down 38% from the previous year. The main export markets are Pakistan, the EU and Canada.
- **In the US, the area seeded to lentils for 2020-21 is forecast by the USDA at just over 0.5 million acres, 7% higher than 2019-20** due to higher area seeded in Montana being offset by lower seeded area in North Dakota. With higher yields and lower abandonment, US lentil production is forecast by USDA at below 0.3 Mt, up 21% from last year. The main US export markets for lentils are expected to continue to be Canada, India and the EU, particularly Spain
- **Dry peas production in Canada is expected to increase by 3% to 4.4 million tonne due to higher yield in 2020-21.** The major producing states like Alberta and Saskatchewan may contribute 4.1 MMT. Manitoba and Eastern Canada may harvest 0.3 MMT this year. So, supply side too is expected to be higher by 3% from last year to 4.7 MMT. Export is likely to stay steady at 3.8 MMT. The major buyers may be China, the US and Bangladesh like previous year. However, carry-out stocks are forecast to fall marginally despite likely improvement in domestic use. Average price may increase by 4% from previous year to \$275/tonne.
- **Lentils production in Canada is expected to increase by 29% to 3.1 MMT in 2020-21 due to higher yield and coverage area.** Out of total large green lentils may contribute 0.7 MMT while the share of red lentils may be 2.1 MMT, followed by other types at 0.3 MMT. Supply side seems to stay steady at previous year level due to lower carry-in stocks. Canada may export 2.7 MMT in 2020-21, lower by 2% from last year. Domestic use may decrease by 3% to 0.249 MMT this year. Carry out stocks are expected to increase by 31% from previous year to 0.3 MMT. Overall average price is likely to be higher by 20% from previous year.
- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons in 2020-21.** It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production.

- For 2020-21, the area seeded under chickpeas fell by 23.89% from 2019-20 to 121 thousand ha due to the lower farm gate prices received in the previous year. It was 159 thousand ha in 219-20. Saskatchewan is expected to account for the majority of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 239 Kt, down 6.63% from the previous year, due to lower seeded area despite higher expected yields. Supply is forecast to rise from 2019-20 to 539Kt. Exports are forecast to rise from 105 to 125Kt and carry-out stocks are forecast to fall from 250 to 330 Kt in 2020-21. The average price is forecast to fall marginally due to a larger world supply, with the expectation of an average grade distribution. It may hover in the range of \$450 to \$475 per tonne.

**Daily Outlook:** -Pulses are likely to trade mixed.
