

Pulses Domestic Fundamentals:

Today's Update:

- **With favorable weather condition rabi pulses sowing is running smoothly. Farmers have** planted 140.91 lakh ha area so far against normal of 144.89 lakh ha. Out of total farmers have covered 97.99 lakh ha area under gram against normal of 92.77 lakh ha. Farmers have covered 15.31 lakh ha under lentils(normal 14.24 lakh ha),9.78 lakh ha under field pea (normal 8.78 lakh ha),4.51 lakh ha under urad (normal 8.93 lakh ha),2.04 lakh ha under moong(normal 9.86 lakh ha),4.87 lakh ha under other pulses(normal 4.14 lakh ha).Gram area is running ahead by 10 % from last year so far, field pea down by 2.78%,lentils up by 4.72 % ,other pulses up by 11%. Moong coverage is up by 18 % so far. Farmers may increase sowing activities in coming weeks under moong and urad. See detailed table at page no-3
- **Cash urad market reeled under pressure in Nov despite losses in major producing** states like Madhya Pradesh, Maharashtra & Uttar Pradesh during Sep-Oct in kharif season and slightly lower production estimate (6.89 to 6.81 lakh MT for rabi crop. Demand for urad dal at higher level got disrupted and mills have restricted buying for bulk volume. So. lower demand, likely import in Nov-Dec and arrival from new crop in South Indian states in Jan-2021 would not allow market to move up in Dec. Nafed, FCI and private trades have started releasing stocks before new crop hits in the market in Jan-2021.Arrival from rabi crop is expected to be delayed by 10 days due to recent rains.
- **Nafed did not pass Tur bids in Mh. If procurement starts early and Nafed restrict sale below MSP,**some improvement in tur market might be seen. Right now Nafed is on driver's seat.
- **Given the low import duty structure till 31st Dec-2020 and resultantly good flow of import, lentils** market has declined sharply during October and November. According to the prevailing market fundamentals, prices may trade steady to weak and may decline further. Ample supply prospects in Dec- too would continue to weigh on market fundamentals. Sluggish demand from mills and commencement of offloading by stockists remain unsupportive to the cash market right now. The overall tone in the Masur market remains weak in December

Previous Update:

- **Tur Crop condition is good so far. Arrival started increasing in Sholapur and it was recorded** at 70-75 motors. It was traded at Rs 6000 to 6350 per qtl. It contains 15-16 % moisture level. Arrival from other region too is expected from the third week of Dec. No major loss of Tur crop has been reported from south India from recent rains and swift wind. Recent rains are said to be beneficial for the standing crops including tur in central and north India. There is good moisture level in the field and it may delay harvesting at least by 10 days in major tur producing districts. Import volume in Nov and Dec is expected to be around 125 to 150 thousand MT combined. As new crop is round the corner now, any spike in tur market is unlikely. There is an increasing possibility of downward trend and market may trade at Rs5500-5700 by end Dec, much lower than MSP of Rs6000.
- **Sources say that Nafed would sell chana PSS rabi 2020 stock in all states, where it is available, at** Rs 5100 or above in coming days (December-2020).Base price would be Rs 5100.It can offer 1.5 lakh MT chana in December. However, it has made clear that it reserves the right to revise it without prior notice. This decision would help market to recover once again. It may push up market 1500 to 200 up from current level. Notably, chana market had decline by Rs400 to 450 in last two weeks.It would be interesting to see next strategy of Nafed in coming weeks. Area is up 12-13% from last year. So any big jump is unlikely. Pressure still continues.
- **Arrival of peas (green) has started increasing in markets and its pressure is visible on price.** Yellow and green peas demand is weak. Green peas with chhilka is being traded at Rs 3200-3500 in markets. It may decrease further with increasing arrivals. So, yellow and green peas price may decrease by Rs 300 to 500 in coming weeks. There is no import and stock at port is negligible. Consumers have shifted from other cheaper daal like masur and chana. Overall tone remains weak

International Market Update:

- **Lentil export from Turkey increased significantly in Oct in comparison to Sep.** As per data released from Turkish Statistical Institute (TURKSTAT) lentil export reached at 32,112 metric tons (MT) in Oct, up by 27% from the 25,257 MT shipped in previous month. Movement so far total 349,054 MT, versus 202,372 in the same period the last calendar year. The top buyers during the month were Sudan, Iraq and Algeria..
- **According to official data from Federal Customs Service (of Russia) export of peas from Russia** continued to increase Russia exported 125,624 metric tons (MT) peas in Oct-2020, up by 41% from Sep. It had exported 88,955 MT in Sep. So far exports have reached 524,325 MT, up from 451,953 during the last calendar year. Pakistan, Turkey and Italy were major buyers.
- **Movement of field peas for Lithuania were up sharply from the previous month in September** as per data published by Eurostat Shipments reached 18,207 metric tons (MT) in Sep against 8,086 MT in Aug-2020. This brings total to 102,288 during the calendar year till Sep, down 34% last year. Netherlands was top buyer, receiving 7,341 MT in the month. United Kingdom was the second most important buyer buying 5,099 MT, followed by Norway at 2,750 MT.
- **Global Chickpeas market traded almost flat last week. However desi chickpeas traded** slightly weak due to higher production in Australia. Harvesting activities are on in parts of Australia. Australian exporters are hoping that India may reduce import duties on chickpeas in an effort to reduce food prices to urban consumers. Export in Sep was recorded up at 27,310 MT, up from 19,812 MT Aug-2020. This boosted shipments so far during the marketing year to 310,730, down 4% last year. Bangladesh brought 11,243 MT and Pakistan taking 5,971 MT, followed by United Arab Emirates at 3,592 MT.
- **In the US, the area seeded to lentils for 2020-21 is forecast by the USDA at just over 0.5 million acres,** 7% higher than 2019-20 due to higher area seeded in Montana being offset by lower seeded area in North Dakota. With higher yields and lower abandonment, US lentil production is forecast by USDA at below 0.3 Mt, up 21% from last year. The main US export markets for lentils are expected to continue to be Canada, India and the EU, particularly Spain
- **Dry peas production in Canada is expected to increase by 3% to 4.4 million tonne due to higher yield** in 2020-21. The major producing states like Alberta and Saskatchewan may contribute 4.1 MMT. Manitoba and Eastern Canada may harvest 0.3 MMT this year. So, supply side too is expected to be higher by 3% from last year to 4.7 MMT. Export is likely to stay steady at 3.8 MMT. The major buyers may be China, the US and Bangladesh like previous year. However, carry-out stocks are forecast to fall marginally despite likely improvement in domestic use. Average price may increase by 4% from previous year to \$275/tonne.
- **Lentils production in Canada is expected to increase by 29% to 3.1 MMT in 2020-21 due to higher yield** and coverage area. Out of total large green lentils may contribute 0.7 MMT while the share of red lentils may be 2.1 MMT, followed by other types at 0.3 MMT. Supply side seems to stay steady at previous year level due to lower carry-in stocks. Canada may export 2.7 MMT in 2020-21, lower by 2% from last year. Domestic use may decrease by 3% to 0.249 MMT this year. Carry out stocks are expected to increase by 31% from previous year to 0.3 MMT. Overall average price is likely to be higher by 20% from previous year.
- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons in 2020-21.** It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production..
- **According to official trade statistics from Australia Bureau of Statistics, chickpeas export** from Australia posted smart gains in Sep in comparison to Aug-2020. It was recorded at 27,310 MT higher by 19,812 MT from Aug-2020. This brings total to 310,730 MT during the ongoing MY. However, it is down by 4% from last year till Sep-2019. Bangladesh brought 11,243 MT while Pakistan 5,971 MT, followed by United Arab Emirates at 3,592 MT

Daily Outlook: -Pulses are likely to trade weak.
