

Pulses Domestic Fundamentals:

Today's Update:

- **Govt of India has renewed its import agreement with Mozambique for another 5 years.** It means import from the country would continue. Indian govt has signed an agreement with Mozambique in 2016 .
- **With favorable weather condition rabi pulses sowing is running smoothly. Farmers have planted 159.59 lakh ha area so far against normal of 152.66 lakh ha.** Out of total farmers have covered 108.39 lakh ha area under gram against normal of 103.79 lakh ha. Farmers have covered 16.37 lakh ha under lentils(normal 15.86 lakh ha),10.51 lakh ha under field pea (normal 8.78 lakh ha),7.12 lakh ha under urad (normal 8.93 lakh ha),4.35 lakh ha under moong(normal 9.86 lakh ha),5.46 lakh ha under other pulses(normal 6.04 lakh ha).Gram area is running ahead by 4.43% from last year so far, field pea down by 1.68%, lentils up by 3.22 %, other pulses up by 16.15%. Moong coverage is up by 58.18 % so far. Farmers may increase sowing activities in coming weeks under moong and urad. See detailed table at page no-3.
- **Pressure on lentils cash market is likely to continue despite some recovery in past few days.** Availability is higher than demand and good volume of import has eased supply side. New crop condition is good so far and new arrivals expected from mid-February. Crop size is expected to be over 13 lakh Mt. So supply side would be at comfortable level and prices of masur is likely to decrease from current level. It is good for stake holders to sell and book profit. Masur market is bound to decrease.
- **Chana cash market is likely to trade under pressure and recent recovery seems temporary** as Nafed's unstable chana releasing strategy continues to affect market directly at a time when area is up by 5 % and the new crop is hardly one and a half month away. Nafed continued to fix reserve price and changed it frequently from Rs 5600 to Rs5100,again Rs5100 to Rs4875. Apart from it it has offered 5 to 10 % discount over previous MSP on particular centers. As offtake from central pool is lower, Nafed may decrease price further to vacate storage space for new procurement. It would not allow chana cash market to go up beyond a certain level. Delhi chana is being traded at Rs4550-4650. Demand is weak. Weather condition in Jan –Feb remains crucial. Overall sentiments seems weak.\

Previous Update:

- **Crop condition of all rabi crops seems good so far and production is expected to increase this year.** Production of chana, lentils, urad and moong is expected to increase under prevailing weather conditions. Jan –Feb weather is still important to impact the final size of the standing rabi crops.
- **Spread of bird flu and decreasing use of chickens for protein may support pulses market in coming days.** Non-veg consumers may turn to pulses, vegetables and milk made products. It may give much needed support to chana, tur, moong and masur.
- **The lentil prices of Canada and Madhya Pradesh line rose in Delhi** due to increased demand from pulses mills. Although the trade was weak in the high prices, due to the agitation of farmers, and bad weather in Delhi, business was also limited in quantity. In Delhi, the prices of lentils of Canada and Madhya Pradesh line rose by Rs 50 to 100 to Rs 5,425 and Rs 5,700 per quintal respectively.
- **Urad FAQ and SQ prices rose in the Burma pulses market on Tuesday** due to fresh purchases from Indian importers. Indian buyers entered into import deals of around 200 containers FAQ and SQ Urad for Chennai on a FOB basis of \$ 725-780 and \$ 825-880 per tonne respectively. According to a local trader, prices of

urad are expected to rise further in Burma. New tur and urad crops have started to arrive in Burma's local market.

- **Govt. is considering the supply of masur dal in Jammu & Kashmir through tenders.** It may be supplied through PDS. It may be distributed in Punjab too. Govt. wants to ensure ample supply of masur daal in these states. If it happens, it may affect masur daal price to some extent

International Market Update:

- **Lentil export from Turkey increased significantly in Oct in comparison to Sep.** As per data released from Turkish Statistical Institute (TURKSTAT) lentil export reached at 32,112 metric tons (MT) in Oct, up by 27% from the 25,257 MT shipped in previous month. Movement so far total 349,054 MT, versus 202,372 in the same period the last calendar year. The top buyers during the month were Sudan, Iraq and Algeria..
- **According to official data from Federal Customs Service (of Russia) export of peas from Russia continued to increase** Russia exported 125,624 metric tons (MT) peas in Oct-2020, up by 41% from Sep. It had exported 88,955 MT in Sep. So far exports have reached 524,325 MT, up from 451,953 during the last calendar year. Pakistan, Turkey and Italy were major buyers.
- **Movement of field peas for Lithuania were up sharply from the previous month in September** as per data published by Eurostat Shipments reached 18,207 metric tons (MT) in Sep against 8,086 MT in Aug-2020. This brings total to 102,288 during the calendar year till Sep, down 34% last year. Netherlands was top buyer, receiving 7,341 MT in the month. United Kingdom was the second most important buyer buying 5,099 MT, followed by Norway at 2,750 MT.
- **Global Chickpeas market traded almost flat last week. However desi chickpeas traded slightly weak** due to higher production in Australia. Harvesting activities are on in parts of Australia. Australian exporters are hoping that India may reduce import duties on chickpeas in an effort to reduce food prices to urban consumers. Export in Sep was recorded up at 27,310 MT, up from 19,812 MT Aug-2020. This boosted shipments so far during the marketing year to 310,730, down 4% last year. Bangladesh brought 11,243 MT and Pakistan taking 5,971 MT, followed by United Arab Emirates at 3,592 MT.
- **In the US, the area seeded to lentils for 2020-21 is forecast by the USDA at just over 0.5 million acres,** 7% higher than 2019-20 due to higher area seeded in Montana being offset by lower seeded area in North Dakota. With higher yields and lower abandonment, US lentil production is forecast by USDA at below 0.3 Mt, up 21% from last year. The main US export markets for lentils are expected to continue to be Canada, India and the EU, particularly Spain
- **Dry pea's production in Canada is expected to increase by 3% to 4.4 million tonne due to higher yield** in 2020-21. The major producing states like Alberta and Saskatchewan may contribute 4.1 MMT. Manitoba and Eastern Canada may harvest 0.3 MMT this year. So, supply side too is expected to be higher by 3% from last year to 4.7 MMT. Export is likely to stay steady at 3.8 MMT. The major buyers may be China, the US and Bangladesh like previous year. However, carry-out stocks are forecast to fall marginally despite likely improvement in domestic use. Average price may increase by 4% from previous year to \$275/tonne.
- **Lentils production in Canada is expected to increase by 29% to 3.1 MMT in 2020-21 due to higher yield** and coverage area. Out of total large green lentils may contribute 0.7 MMT while the share of red lentils may be 2.1 MMT, followed by other types at 0.3 MMT. Supply side seems to stay steady at previous year level due to lower carryin stocks. Canada may export 2.7 MMT in 2020-21, lower by 2% from last year.

Domestic use may decrease by 3% to 0.249MMT this year. Carry out stocks are expected to increase by 31% from previous year to 0.3MMT. Overall average price is likely to be higher by 20% from previous year.

- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons in 2020-21.** It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production.
