

**Pulses Domestic Fundamentals:****Today's Update:**

- **No major trade was reported on Monday.**
- **With favorable weather condition rabi pulses sowing is running smoothly. Farmers have planted 165.34 lakh ha area so far against normal of 144.89 lakh ha. Out of total farmers have covered 110.98 lakh ha area under gram against normal of 92.77 lakh ha. Farmers have covered 16.53 lakh ha under lentils (normal 14.24 lakh ha), 10.64 lakh ha under field pea (normal 8.78 lakh ha), 7.90 lakh ha under urad (normal 8.93 lakh ha), 5.87 lakh ha under moong (normal 9.86 lakh ha), 6.43 lakh ha under other pulses (normal 6.04 lakh ha). Gram area is running ahead by 4.19 % from last year so far, field pea down by 2.65%, lentils up by 2.67 %, other pulses up by 11.83%. Moong coverage is down by 4.86 % so far. Farmers may increase sowing activities in coming weeks under moong and urad. See detailed table at page no-3.**

**Previous Update:-**

- **Chana cash market continues to trade under pressure due to increasing area, good crop condition so far, weak demand ahead of new crop and higher availability of old crop. Nafed may face difficulty to release stock at Rs 4875 per qtl. As new crop is hardly 40-45 days away, pressure of releasing stock would continue on Nafed. It may prompt Nafed to give discount and release stock before new crop hits in. Even private traders too would prefer to release stock whenever market improves. It would not allow chana market to go up beyond 4600-4750 in coming weeks. If weather turns rough (rains & hail storm) in Feb & March prices may move up. Under normal condition overall sentiments remain weak.**
- **Lentils prices continue to cool down with easing supply side from import and smooth sowing activities, supported by congenial weather condition in major producing states like Madhya Pradesh, Uttar Pradesh and Bihar. Agriwatch expects 13.25-13.50 lakh Mt production this year under normal weather condition. Major exporters like Australia and Canada are trying to sell as much as they can before duty revision from 10 to 30% from 1st Jan-2021. Pulses prices may be under pressure due to increasing rabi area and higher flow of import this year. Lentils price may decrease to Rs-4750-4800 by end Feb. New crop would hit market in Feb end. Overall tone is bearish. Current uptrend is unlikely to continue.**
- **Tur cash market with help of ongoing procurement drive despite increasing arrivals in major markets of Karnataka, Maharashtra, Gujarat and Madhya Pradesh and higher import flow. Nafed has slowed down sale of tur. As crop is coming market is likely to trade stable to slightly firm. Private mills are active. All these factors may support cash market to some extent. Arrivals are likely to increase in Kurnool and Yammiganur during the week under review. It was registered at 4254 bags in Kurnool and will continue to increase in other markets also. Crop condition in south Indian states is good despite some crop loss (around 5,000 ha) in AP due to recent storm and rains. Prices have slipped below MSP. and intervention through procurement activities is required to speed up.**
- **Short supply of quality crop and low flow of import amid restricted arrivals from rabi crop may support urad market to some extent in coming weeks. Mills are depending on imported volume and central pool stock. As impact of rabi arrival would be limited due to lower crop size, any major decline at all India level is unlikely. As there is a gap in supply-demand side, cash market may continue to trade sideways. Farmers**

have covered 7.12 lakh ha so far against 6.30 lakh ha last year. Farmers in AP have covered 2.67 lakh ha area against 2.42 lakh ha last year. It is higher by 13.02% in AP while it is up by 6.58% in Tamil Nadu.

- **Moong cash market traded stable with weak bias likely to continue in coming weeks.** Import flow & weak demand in recent weeks have pushed moong price down by Rs300-400 in south India. Prices in market like Gannavaram traded down at 7600-7700 during the week. In north and central India prices have decreased below MSP. However, quality crop is still ruling above MSP. Tone remains weak as supply from central pool is expected soon. Arrival from rabi crop is expected from end Feb-Mar. Overall tone remains weak

#### International Market Update:

- **Global chickpea markets closed a little changed against a tight supply and demand** situation on spot markets. However, the longer term supply outlook looks increasingly ample against efforts by India and Turkey to encourage pulse production as well as an anticipated production response in other origins because of this year's high market values. The major change will be in desi chickpea output. Australia is now harvesting its crop. The last production estimates were released in September, at which time the crop was pegged at a record 1.18 million metric tons (MT) of desi and 58,500 MT of kabuli chickpeas.
- **Lentil export from Turkey increased significantly in Oct in comparison to Sep.** As per data released from Turkish Statistical Institute (TURKSTAT) lentil export reached at 32,112 metric tons (MT) in Oct, up by 27% from the 25,257 MT shipped in previous month. Movement so far total 349,054 MT, versus 202,372 in the same period the last calendar year. The top buyers during the month were Sudan, Iraq and Algeria..
- **Global Chickpeas market traded almost flat last week. However desi chickpeas traded slightly weak** due to higher production in Australia. Harvesting activities are on in parts of Australia. Australian exporters are hoping that India may reduce import duties on chickpeas in an effort to reduce food prices to urban consumers. Export in Sep was recorded up at 27,310 MT, up from 19,812 MT Aug-2020. This boosted shipments so far during the marketing year to 310,730, down 4% last year. Bangladesh brought 11,243 MT and Pakistan taking 5,971 MT, followed by United Arab Emirates at 3,592 MT.
- **In the US, the area seeded to lentils for 2020-21 is forecast by the USDA at just over 0.5 million acres,** 7% higher than 2019-20 due to higher area seeded in Montana being offset by lower seeded area in North Dakota. With higher yields and lower abandonment, US lentil production is forecast by USDA at below 0.3 Mt, up 21% from last year. The main US export markets for lentils are expected to continue to be Canada, India and the EU, particularly Spain
- **Dry pea's production in Canada is expected to increase by 3% to 4.4 million tonne due to higher yield in 2020-21.** The major producing states like Alberta and Saskatchewan may contribute 4.1 MMT. Manitoba and Eastern Canada may harvest 0.3 MMT this year. So, supply side too is expected to be higher by 3% from last year to 4.7 MMT. Export is likely to stay steady at 3.8MMT. The major buyers may be China, the US and Bangladesh like previous year. However, carry-out stocks are forecast to fall marginally despite likely improvement in domestic use. Average price may increase by 4% from previous year to \$275/tonne.
- **Lentils production in Canada is expected to increase by 29% to 3.1 MMT in 2020-21 due to higher yield and coverage area.** Out of total large green lentils may contribute 0.7 MMT while the share of red lentils may be 2.1 MMT, followed by other types at 0.3 MMT. Supply side seems to stay steady at previous year level due to lower carryin stocks. Canada may export 2.7MMT in 2020-21, lower by 2% from last year.

Domestic use may decrease by 3% to 0.249MMT this year. Carry out stocks are expected to increase by 31% from previous year to 0.3MMT. Overall average price is likely to be higher by 20% from previous year.

- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons in 2020-21.** It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production.

**Daily Outlook:** -Pulses are likely to trade weak except urad.
