

Pulses Domestic Fundamentals:**Today's Update:**

- **Nafed may restrict selling of tur in coming weeks for supporting cash market at the time of peak arrival season.** At the beginning of the new year Nafed had 134481MT tur stock in its go-downs. In the second and the third week of Jan-2021 it sold another 70,000 MT tur. This means Nafed has now 60,000 MT old stock. Generally, Nafed stops selling in states where procurement starts. It may support tur cash market to some extent. As prices are ruling around MSP and private trades are active amid slow pace of arrival, Nafed would not be able to procure 2 lakh MT tur this year. Right now supply demand side seems balanced and steady to slightly firm tone may prevail in cash market in coming weeks.

Previous Update:

- **With favorable weather condition rabi pulses sowing is running smoothly.** Farmers have planted 167.38 lakh ha area so far against normal of 144.89 lakh ha. Out of total farmers have covered 112.00 lakh ha area under gram against normal of 92.77 lakh ha. Farmers have covered 16.54 lakh ha under lentils (normal 14.24 lakh ha), 10.69 lakh ha under field pea (normal 8.78 lakh ha), 8.09 lakh ha under urad (normal 8.93 lakh ha), 6.59 lakh ha under moong (normal 9.86 lakh ha), 6.44 lakh ha under other pulses (normal 6.04 lakh ha). Gram area is running ahead by 4.37 % from last year so far, field pea down by 2.55%, lentils up by 2.54 %, other pulses up by 11.79%. Moong coverage is down by 1.05 % so far. Farmers may increase sowing activities in coming weeks under moong and urad. See detailed table at page no-3.
- **Availability of urad at various ports is low right now. Kharif crop size was lower than normal expectation** while size of rabi crop is low (6 to 7 lakh MT). So, prices continued to rule above MSP and may trade up by Rs200-300 in coming weeks too. Demand for south Indian states started increasing now. It drove urad price to \$865 and \$980 basis Indian ports. As rabi urad area is higher by 60,000 ha so far and crop condition is good so far, availability is expected to increase by mid -February. Urad FAQ is being traded at Rs7300 and new at Rs7400 at Mumbai port. Overall outlook seems firm.
- **Moong cash market traded under pressure due to weak demand. Even import volume too is low.** New crop is expected to hit market from next month (mid –February). Quality of new rabi crop is expected to be good. Crop in Orissa is in very good. Sideways movement might be seen until new crop hits in. Moong may trade in the range of Rs 6000-7600 per qtl in Delhi, depending on quality.
- **New crop of desi chana is expected to hit market by mid Feb in south India,** followed by M.P. & Karnataka & Mh in March. Crop condition is good so far. However, stock is decreasing fast in producing regions. Private trades may start offloading while Nafed too is releasing stock at regular intervals. All these factors would not allow chana cash market to move up beyond a certain level. Chana in Delhi market traded at 4575-4625. Need based buyings are being seen by millers while demand for daal is yet to improve. Overall sentiment remains weak.
- **Lentils prices continue to cool down with easing supply side from import and** smooth sowing activities, supported by congenial weather condition in major producing states like Madhya Pradesh, Uttar Pradesh and Bihar. Agriwatch expects 13.25-13.50 lakh Mt production this year under normal weather condition. Major exporters like Australia and Canada are trying to sell as much as they can before duty revision from 10 to 30% from 1st Jan-2021. Pulses prices may be under pressure due to increasing rabi area and higher

flow of import this year. Lentils price may decrease to Rs-4750-4800 by end Feb. New crop would hit market in Feb end. Overall tone is bearish. Current uptrend is unlikely to continue.

International Market Update:

- **Ukraine has emerged as a major exporter of pulses in recent years. Ukraine exports** yellow peas, Chickpeas, lentils and kidney bean. Major buyers of Ukrainian pulses are Europe, India, Turkey and Pakistan. The GPC's World Pulses Day Ukraine Market Outlook scheduled for February 17th will feature expert panels that will analyze the market conditions for each crop just as the country heads into its pulse-planting season as per information given in media sources.
- **Canadian dry pea exports for the August to November period were 15 lakh MT**, higher by 11% from the same period last year. China imported 12 lakh MT and emerged as the largest buyer, followed by Bangladesh and the US. Total Canadian dry pea exports for the crop year are forecast to rise marginally to 3.8 Mt due to higher export demand from China.
- **Peas seeded area in Canada in 2021-22 is forecast to rise marginally from 2020-21 to a near record 1.75 million hectares** due to good returns in comparison to other crops. Dry peas continue to be recognized as a beneficial part of a crop rotation plan. Production is expected to fall marginally to 4.4 Mt, with an expectation of trend yields. Supply is forecast to rise marginally to 49 lakh MT due to larger carry-in stocks. With the tariff in India expected to remain, exports to other countries are expected to be marginally lower than 2020-21 and carry-out stocks are expected to rise.
- **Global Chickpeas market traded almost flat last week. However desi chickpeas traded** slightly weak due to higher production in Australia. Harvesting activities are on in parts of Australia. Australian exporters are hoping that India may reduce import duties on chickpeas in an effort to reduce food prices to urban consumers. Export in Sep was recorded up at 27,310 MT, up from 19,812 MT Aug-2020. This boosted shipments so far during the marketing year to 310,730, down 4% last year. Bangladesh brought 11,243 MT and Pakistan taking 5,971 MT, followed by United Arab Emirates at 3,592 MT.
- **In the US, the area seeded to lentils for 2020-21 is forecast by the USDA at just over 0.5 million acres**, 7% higher than 2019-20 due to higher area seeded in Montana being offset by lower seeded area in North Dakota. With higher yields and lower abandonment, US lentil production is forecast by USDA at below 0.3 Mt, up 21% from last year. The main US export markets for lentils are expected to continue to be Canada, India and the EU, particularly Spain
- **Dry pea's production in Canada is expected to increase by 3% to 4.4 million tonne due to higher yield in 2020-21.** The major producing states like Alberta and Saskatchewan may contribute 4.1 MMT. Manitoba and Eastern Canada may harvest 0.3 MMT this year. So, supply side too is expected to be higher by 3% from last year to 4.7 MMT. Export is likely to stay steady at 3.8 MMT. The major buyers may be China, the US and Bangladesh like previous year. However, carry-out stocks are forecast to fall marginally despite likely improvement in domestic use. Average price may increase by 4% from previous year to \$275/tonne.
- **Lentils production in Canada is expected to increase by 29% to 3.1 MMT in 2020-21 due to higher yield and coverage area.** Out of total large green lentils may contribute 0.7 MMT while the share of red lentils may be 2.1 MMT, followed by other types at 0.3 MMT. Supply side seems to stay steady at previous year level due to lower carry-in stocks. Canada may export 2.7 MMT in 2020-21, lower by 2% from last year. Domestic use may decrease by 3% to 0.249 MMT this year. Carry out stocks are expected to increase by 31% from previous year to 0.3 MMT. Overall average price is likely to be higher by 20% from previous year.

- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons in 2020-21.** It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production.

Daily Outlook: -Pulses are likely to trade mixed.
