

Pulses Domestic Fundamentals:**Today's Update:**

- **Cash market traded steady to slightly weak as demand at higher level was seen** depleting. Market is expecting arrivals to increase in coming weeks. Even some stockists may prefer to release their stock at current level. Tur and Moong traded steady while chana and masur traded weak. Sideways movement was seen in urad.
- **New rabi crop of moong from Bharuch is over now and market is expecting it from AP and Tamil Nadu** soon. Summer crop sowing continues from Jan to April and varies from region to region. Summer crop would hit market in end April to July. Right now Rajasthan has good quantity of stock. Market is likely to trade stable and may move slightly up in March till new crop hits in. Demand for moong increases in March and April too. However, pressure of summer crop may drag down the moong price and stake holders should release stock before end April.

Previous Update:

- **Tur crop in Gujarat is said to be in normal condition barring some districts. Overall, there may be a** marginal shortfall this year in Gujarat. However, demand factor is very crucial. Monsoon development too would play an important role in price driving factors. If prices continue to move up demand for daal is bound to soften. Stocks are now in strong hands and they would prefer to hold it at least for three –four months. Market is well aware that import volume would be lower and trade sanction on Myanmar may worsen situation further. Nafed has around 1 lakh MT stock. It is not enough to cool down prices.
- **Stockists in Karnataka & Maharashtra have purchased tur as per their capacities and** now buyers including mills are restricting purchase at higher level. Demand is likely to decrease in coming weeks. So, uptrend is unlikely to continue. Some profit booking might be seen at current level. Myanmar is offering lemon tur at \$750 while old at \$690 per MT basis C&F Indian ports. Markets are eyeing now on M.P. crop, followed by U.P. Crop condition is good so far in these states.
- **Cash chana market traded under pressure in the first half of January and** recovered slightly in the second half on the back of confusion over cess for least developed countries. Apart from it expected delay in arrivals too played an important role to push market up. Nafed's decision to sell stock not below 4875 helped market to move up by Rs100-200. However, 4.37% higher area coverage (112 lakh ha) from last year, good crop condition and likely 11 MMT production would not allow chana market to move up beyond a certain extent despite Nafed's intention to buy around 2 MMT chana on MSP. New arrival starts in Gujarat and south Indian states in limited quantity and arrivals may increase by the end of this month. So inner tone in chana cash market remains weak. The new season is likely to start with 2.1 MMT carry in. So, Supply seems at comfortable level throughout the year.
- **Availability of urad at various ports is low right now. Kharif crop size was lower than** normal expectation while size of rabi crop is low (6 to 7 lakh MT). So, prices continued to rule above MSP and may trade up by Rs200-300 in coming weeks too. Demand for south Indian states started increasing now. It drove urad price to \$865 and \$980 basis Indian ports. As rabi urad area is higher by 60,000 ha so far and crop condition is good so far, availability is expected to increase by mid -February. Urad FAQ is being traded at Rs7300 and new at Rs7400 at Mumbai port. Overall outlook seems firm.

International Market Update:

- **Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres.** Lentil production is up by 40% from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres. Average yield is estimated at 1,442 pounds per acre in the U.S., as per data release by the National Agricultural Statistics Service.
- **The USDA has released its final pulses production report of the year this Tuesday, Jan. 12, 2021** by the National Agricultural Statistics Service. As per new data dry peas are compiled by the National Agricultural Statistics Service. Dry peas production for 2020 has been pegged at 985,976 MT on 973,000 acres. Dry pea production as an average of all U.S. pea growing regions is down approximately 2% of last year, sitting at 21.7 million cwt in 2020, almost 986,000 MT, with planted acreage hitting 1 million acres. Harvested acreage hit 973,000 with an average yield of 2,234 pounds, an increase of 111 pounds an acre, the highest yield recorded since 2004. The drop in total production for dry peas from 2019 reflects the decline in planted and harvested acres of 9% and 7% respectively.
- **Ukraine has emerged as a major exporter of pulses in recent years. Ukraine exports** yellow peas, Chickpeas, lentils and kidney bean. Major buyers of Ukrainian pulses are Europe, India, Turkey and Pakistan. The GPC's World Pulses Day Ukraine Market Outlook scheduled for February 17th will feature expert panels that will analyze the market conditions for each crop just as the country heads into its pulse-planting season as per information given in media sources.
- **Canadian dry pea exports for the August to November period were 15 lakh MT**, higher by 11% from the same period last year. China imported 12 lakh MT and emerged as the largest buyer, followed by Bangladesh and the US. Total Canadian dry pea exports for the crop year are forecast to rise marginally to 3.8 Mt due to higher export demand from China.
- **Peas seeded area in Canada in 2021-22 is forecast to rise marginally from 2020-21 to a near record 1.75 million hectares** due to good returns in comparison to other crops. Dry peas continue to be recognized as a beneficial part of a crop rotation plan. Production is expected to fall marginally to 4.4 Mt, with an expectation of trend yields. Supply is forecast to rise marginally to 49 lakh MT due to larger carry-in stocks. With the tariff in India expected to remain, exports to other countries are expected to be marginally lower than 2020-21 and carry-out stocks are expected to rise.
- **Dry pea's production in Canada is expected to increase by 3% to 4.4 million tonne due to higher yield in 2020-21.** The major producing states like Alberta and Saskatchewan may contribute 4.1 MMT. Manitoba and Eastern Canada may harvest 0.3 MMT this year. So, supply side too is expected to be higher by 3% from last year to 4.7 MMT. Export is likely to stay steady at 3.8 MMT. The major buyers may be China, the US and Bangladesh like previous year. However, carry-out stocks are forecast to fall marginally despite likely improvement in domestic use. Average price may increase by 4% from previous year to \$275/tonne.
- **Lentils production in Canada is expected to increase by 29% to 3.1 MMT in 2020-21 due to higher yield and coverage area.** Out of total large green lentils may contribute 0.7 MMT while the share of red lentils may be 2.1 MMT, followed by other types at 0.3 MMT. Supply side seems to stay steady at previous year level due to lower carry-in stocks. Canada may export 2.7 MMT in 2020-21, lower by 2% from last year. Domestic use may decrease by 3% to 0.249 MMT this year. Carry out stocks are expected to increase by 31% from previous year to 0.3 MMT. Overall average price is likely to be higher by 20% from previous year.

- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons in 2020-21.** It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production.

Daily Outlook: -Pulses are likely to trade mixed.
