

Pulses Domestic Fundamentals:

Today's Update:

- **Rains and hailstorm in Jabalpur, Sagar, Bhopal, Shahdol, Hoshangabad and Indore region in MP and rains in some parts of Maharashtra, Gujarat and West Bengal may affect the quality of standing crops ready to be harvested. Fears have increased as weather may be wet next three days. If hailstorm occurs in more regions, proportion of damage may increase and it would not be good for pulses market, already ruling up. Govt. has a close eye on it.**
- **All India Daal Mills Association has requested govt. to allow daal mills to import 4 lakh MT(each) tur & urad and issue licenses for 2021-22. The association has tried to make govt. aware of emerging shortage of tur and urad due to crop loss in kharif season. Grains are comparatively small and supply side tight in case of tur and urad. If licenses are issued in time, millers will be able to import soon and help in easing supply side soon. If it is delayed, prices in global market too increase. Timely issuance of import quota and licenses for mills are the needs of the hour.**
- **Increasing fear of low chana yields in states has lent support to chana cash market. Real picture would emerge only by end February. Recent rains are beneficial to late shown crop too. New crop of chana started in south Indian states like Andhra Pradesh, Tamil Nadu, followed by Gujarat and Maharashtra. Crop condition is good in all states except some doubts in Rajasthan, where yield may be lower than normal expectation due to lower rains during growth stages up to now. Moisture stress in the field may affect normal yield in Rajasthan. Despite increasing fear of lower yield in Rajasthan overall supply side would be at comfortable level throughout the year as the new season would start around 2 MMT carry in stock. Pressure might be seen on chana price despite Nafed intension to buy over 2MMT chana this season.**

Previous Update:

- **Tur crop in Gujarat is said to be in normal condition barring some districts. Overall, there may be a marginal shortfall this year in Gujarat. However, demand factor is very crucial. Monsoon development too would play an important role in price driving factors. If prices continue to move up demand for daal is bound to soften. Stocks are now in strong hands and they would prefer to hold it at least for three –four months. Market is well aware that import volume would be lower and trade sanction on Myanmar may worsen situation further. Nafed has around 1 lakh MT stock. It is not enough to cool down prices.**
- **Stockists in Karnataka & Maharashtra have purchased tur as per their capacities and now buyers including mills are restricting purchase at higher level. Demand is likely to decrease in coming weeks. So, uptrend is unlikely to continue. Some profit booking might be seen at current level. Myanmar is offering lemon tur at \$750 while old at \$690 per MT basis C&F Indian ports. Markets are eyeing now on M.P. crop, followed by U.P. Crop condition is good so far in these states.**
- **Availability of urad at various ports is low right now. Kharif crop size was lower than normal expectation while size of rabi crop is low (6 to 7 lakh MT). So, prices continued to rule above MSP and may trade up by Rs200-300 in coming weeks too. Demand for south Indian states started increasing now. It drove urad price to \$865 and \$980 basis Indian ports. As rabi urad area is higher by 60,000 ha so far and crop condition is good so far, availability is expected to increase by mid -February. Urad FAQ is being traded at Rs7300 and new at Rs7400 at Mumbai port. Overall outlook seems firm.**

International Market Update:

- **Lentils export from Australia increased sharply in Dec-2020 as per data released by** Australia Bureau of Statistics. Total movement in Dec increased to 101,148 MT up by 189% from the previous month's total of 34,974. So far export sales have totalled 136,121 MT, up from 135,053 in the same period the last marketing year. India purchased 42,154 MT, Bangladesh 15,256 MT & Sri Lanka 14,970 MT
- **Chickpeas production in Australia is expected to increase from 2.81 to 7.55 lakh MT in 2020-21.** Even field peas production would increase from 2.19 to 2.94 lakh MT in 2020-21. Even lentils production may increase from 5.34 to 6.34 lakh MT in 2020-21.
- **Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres.** Lentil production is up by 40% from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres. Average yield is estimated at 1,442 pounds per acre in the U.S., as per data release by the National Agricultural Statistics Service.
- **The USDA has released its final pulses production report of the year this Tuesday, Jan. 12, 2021** by the National Agricultural Statistics Service. As per new data dry peas are compiled by the National Agricultural Statistics Service. Dry peas production for 2020 has been pegged at 985,976 MT on 973,000 acres. Dry pea production as an average of all U.S. pea growing regions is down approximately 2% of last year, sitting at 21.7 million cwt in 2020, almost 986,000 MT, with planted acreage hitting 1 million acres. Harvested acreage hit 973,000 with an average yield of 2,234 pounds, an increase of 111 pounds an acre, the highest yield recorded since 2004. The drop in total production for dry peas from 2019 reflects the decline in planted and harvested acres of 9% and 7% respectively.
- **Ukraine has emerged as a major exporter of pulses in recent years. Ukraine exports** yellow peas, Chickpeas, lentils and kidney bean. Major buyers of Ukrainian pulses are Europe, India, Turkey and Pakistan. The GPC's World Pulses Day Ukraine Market Outlook scheduled for February 17th will feature expert panels that will analyze the market conditions for each crop just as the country heads into its pulse-planting season as per information given in media sources.
- **Canadian dry pea exports for the August to November period were 15 lakh MT,** higher by 11% from the same period last year. China imported 12 lakh MT and emerged as the largest buyer, followed by Bangladesh and the US. Total Canadian dry pea exports for the crop year are forecast to rise marginally to 3.8 Mt due to higher export demand from China.
- **Peas seeded area in Canada in 2021-22 is forecast to rise marginally from 2020-21 to a near record** 1.75 million hectares due to good returns in comparison to other crops. Dry peas continue to be recognized as a beneficial part of a crop rotation plan. Production is expected to fall marginally to 4.4 Mt, with an expectation of trend yields. Supply is forecast to rise marginally to 49 lakh MT due to larger carry-in stocks. With the tariff in India expected to remain, exports to other countries are expected to be marginally lower than 2020-21 and carry-out stocks are expected to rise.
- **Dry pea's production in Canada is expected to increase by 3% to 4.4 million tonne due to higher yield** in 2020-21. The major producing states like Alberta and Saskatchewan may contribute 4.1 MMT. Manitoba and Eastern Canada may harvest 0.3 MMT this year. So, supply side too is expected to be higher by 3% from last year to 4.7 MMT. Export is likely to stay steady at 3.8 MMT. The major buyers may be China, the

US and Bangladesh like previous year. However, carry-out stocks are forecast to fall marginally despite likely improvement in domestic use. Average price may increase by 4% from previous year to \$275/tonne.

- **Lentils production in Canada is expected to increase by 29% to 3.1 MMT in 2020-21 due to higher yield and coverage area.** Out of total large green lentils may contribute 0.7 MMT while the share of red lentils may be 2.1 MMT, followed by other types at 0.3 MMT. Supply side seems to stay steady at previous year level due to lower carryin stocks. Canada may export 2.7MMT in 2020-21, lower by 2% from last year. Domestic use may decrease by 3% to 0.249MMT this year. Carry out stocks are expected to increase by 31% from previous year to 0.3MMT. Overall average price is likely to be higher by 20% from previous year.

Daily Outlook: -Pulses are likely to trade mixed.
