

Pulses Domestic Fundamentals:**Today's Update:**

- **Govt has allocated 4lakhMT urad quota for next financial year almost one month earlier.** Refiners/mills/processors can import urad.If the DGFT goes through physical verification o mills /processors like last year, it would take 1.5 to 2 month time. So import cannot be expected before June – July. If political unrest continues in Myanmar, further delay might be possible. Allocation may not impact market much. Its impact may be seen for a shorter period. Supply may ease from Aug-Sept when kharif crop from local market starts.Govt has taken right decision through early allocation.
- **Govt may consider to allocate higher matar quota to ease supply side. Availability of matar is very poor** right now and matar daal is selling higher than lentils and chana daal. Matar is available at \$400 per MT in the international market. If MIP is removed and quota is extended, it may cool down other pulses price too.

Previous Update:

- **Tamil Nadu pulses importers and exporters association has made a request to Ministry of Commerce and Industry to extend the validity of urad and green moong quota licenses from 31March-2021 to 31st May-2021** due to political unrest in Myanmar, which has disturbed the shipment movement from Myanmar, especially from Yangon port to Indian ports. Right now there is no Cargo movement from Myanmar. Under prevailing condition importers would not be able to import allocated quota for moong and urad till 31st March-2021. If extension is not given, prices may move up again to some extent. Currently, govt.'s offices are not working including ports officials and no-body knows when the situation will return back to normalcy. It would be interesting to see whether govt. extends timeline and issue new quota for next financial year.
- **After poor yield realization in Rajasthan (Bikaner, Jodhpur, Barmer and Jaisalmer)** due to moisture stress and canal closure, deficient rains in critical growth period, chana crop in eastern parts of M.P. is said to be affected by unseasonal rains. Even in Maharashtra crop size is lower than normal expectation. So, downward revision in production size is obvious.AW preliminary estimate was 11 MMT, now revision, based on feed back by farmers, trades, is under ways. Raw data hints at least 1 MMT lower production than preliminary estimates. Market has already started reflecting it on price. Arrival pressure is expected from mid-March. Price range in the short to medium term is expected to move in the band of Rs4700-5200.As availability of old crop is higher, supply side seems to be at comfortable level despite lower crop size.
- **Strong hold on tur by stockists, active buying by private trade and no clarity over import timeline** has kept market well supported at current levels. Around 30 % stock of tur is now with Stockists in Karnataka while 20 % crop is with farmers and around 20 % is with mills. Market is aware of tight supply side and may hold stock to push market up in the coming weeks. Arrivals in A.P. & Gujarat is about to increase while crop from U.P. is expected in April.
- **Masur continues to trade firm despite new arrivals from producing regions in M.P.** It is likely to commence soon in Bihar, followed by U.P. and West Bengal. Crop is in good condition. Import flow is limited as Canada is quoting high price due to lower carry in this year. Right now demand for masur daal is weak. Landed price at Mumbai is Rs 5450-5500 while it is being traded at Rs 5400 in Kanpur. Price may come down as soon as arrival increases in major producing states.

International Market Update:

- **Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield.** Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.77 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.
- **Dry peas production in Canada is expected to decrease from 45.94 lakh Mt in 2020-21 to 44.00 lak MT in 2021-22** due to lower expected yield from 2.73 to 2.57 tonne in 2021-22. Total supply too would decrease from 49.22(2020-21) to 47.90 lakh MT in 2021-22. Export fig too is expected to decrease from 38 to 37 lakh MT in 2021-22. However, domestic usage may increase from 8.22 to 8.40 lakh MT in 2021-22. Carryout would decrease from 3 to 2.5 lakh MT. Yearly average price may hover at \$300 per MT in 2021-22 against 4330 in 2020-21.
- **Lentils export from Australia increased sharply in Dec-2020 as per data released by Australia Bureau of Statistics.** Total movement in Dec increased to 101,148 MT up by 189% from the previous month's total of 34,974. So far export sales have totalled 136,121 MT, up from 135,053 in the same period the last marketing year. India purchased 42,154 MT, B, desh 15,256 MT & Sri Lanka 14,970 MT
- **Chickpeas production in Australia is expected to increase from 2.81 to 7.55 lakh Mt in 2020-21.** Even field peas production would increase from 2.19 to 2.94 lakh MT in 2020-21. Even lentils production may increase from 5.34 to 6.34 lakh Mt in 2020-21.
- **Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres.** Lentil production is up by 40% from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres. Average yield is estimated at 1,442 pounds per acre in the U.S., as per data release by the National Agricultural Statistics Service.
- **The USDA has released its final pulses production report of the year this Tuesday, Jan. 12, 2021 by the National Agricultural Statistics Service.** As per new data dry peas are compiled by the National Agricultural Statistics Service. Dry peas production for 2020 has been pegged at 985,976 MT on 973,000 acres. Dry pea production as an average of all U.S. pea growing regions is down approximately 2% of last year, sitting at 21.7 million cwt in 2020, almost 986,000 MT, with planted acreage hitting 1 million acres. Harvested acreage hit 973,000 with an average yield of 2,234 pounds, an increase of 111 pounds an acre, the highest yield recorded since 2004. The drop in total production for dry peas from 2019 reflects the decline in planted and harvested acres of 9% and 7% respectively.
- **Ukraine has emerged as a major exporter of pulses in recent years. Ukraine exports yellow peas, Chickpeas, lentils and kidney bean.** Major buyers of Ukrainian pulses are Europe, India, Turkey and Pakistan. The GPC's World Pulses Day Ukraine Market Outlook scheduled for February 17th will feature expert panels that will analyze the market conditions for each crop just as the country heads into its pulse-planting season as per information given in media sources.

Daily Outlook: -Pulses are likely to trade mixed.
