

Pulses Domestic Fundamentals:**Today's Update:**

- **Chana arrival in cash market is about to increase and buying at this level may be risky.** Prices of chana in many market is ruling below MSP while demand for daal is weak. In south Indian markets including Gujarat arrivals are about to peak up and pressure might be seen in Chana market despite commencement of procurement drive. Some farmers are holding stock as they are unwilling to sell it below MSP. Investors may prefer to wait for correction in market. Availability is good despite fear of lower crop size as carryin stock is higher this year. In Delhi market chana is being quoted at Rs 5050-5100.
- **Arrival from summer moong crop is expected to hit market from April.** Crop condition of moong in Odisha, M.P. & Bihar is normal to good. Arrival from rabi crop is decreasing now. Demand is weak and prices are expected to decrease in coming weeks. As there is shortage of quality crop, prices are ruling around MSP. Stockists too have started offloading stock just ahead of summer crop. Steady to slight weak tone may be seen in next two three weeks. Thereafter, monsoon rains in June and July would be the driving force for prices thereafter.

Previous Update:

- **Shipment from Myanmar is likely to be disrupted till 14th March-2021.** Political unrest has disturbed all trading and movement activities in and outside countries. Myanmar is a major exporter of pulses and rice. Its impact might be seen on Indian markets. Right now tur, urad prices are stable while moong prices are expected to decrease due to good summer crop condition and decreasing prices in Tanzania due to lack of demand.
- **Govt has allocated 4lakhMT urad quota for next financial year almost one month earlier.** Refiners/mills/processors can import urad. If the DGFT goes through physical verification of mills/processors like last year, it would take 1.5 to 2 month time. So import cannot be expected before June – July. If political unrest continues in Myanmar, further delay might be possible. Allocation may not impact market much. Its impact may be seen for a shorter period. Supply may ease from Aug-Sept when kharif crop from local market starts. Govt has taken right decision through early allocation.
- **Govt may consider to allocate higher matar quota to ease supply side. Availability of matar is very poor** right now and matar daal is selling higher than lentils and chana daal. Matar is available at \$400 per MT in the international market. If MIP is removed and quota is extended, it may cool down other pulses price too.
- **Tamil Nadu pulses importers and exporters association has made a request to Ministry of Commerce and Industry to extend the validity of urad and green moong quota licenses from 31March-2021 to 31st May-2021** due to political unrest in Myanmar, which has disturbed the shipment movement from Myanmar, especially from Yangon port to Indian ports. Right now there is no Cargo movement from Myanmar. Under prevailing condition importers would not be able to import allocated quota for moong and urad till 31st March-2021. If extension is not given, prices may move up again to some extent. Currently, govt.'s offices are not working including ports officials and no-body knows when the situation will return back to normalcy. It would be interesting to see whether govt. extends timeline and issue new quota for next financial year.

- **Strong hold on tur by stockists, active buying by private trade and no clarity over import timeline** has kept market well supported at current levels. Around 30 % stock of tur is now with Stockists in Karnataka while 20 % crop is with farmers and around 20 % is with mills. Market is aware of tight supply side and may hold stock to push market up in the coming weeks. Arrivals in A.P. & Gujarat is about to increase while crop from U.P. is expected in April.
- **Masur continues to trade firm despite new arrivals from producing regions in M.P.** It is likely to commence soon in Bihar, followed by U.P. and West Bengal. Crop is in good condition. Import flow is limited as Canada is quoting high price due to lower carry in this year. Right now demand for masur daal is weak. Landed price at Mumbai is Rs 5450-5500 while it is being traded at Rs 5400 in Kanpur. Price may come down as soon as arrival increases in major producing states.

Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres. Average yield is estimated at 1,442 pounds per acre in the U.S., as per data release by the National Agricultural Statistics Service.
- **The USDA has released its final pulses production report of the year this Tuesday, Jan. 12, 2021** by the National Agricultural Statistics Service. As per new data dry peas are compiled by the National Agricultural Statistics Service. Dry peas production for 2020 has been pegged at 985,976 MT on 973,000 acres. Dry pea production as an average of all U.S. pea growing regions is down approximately 2% of last year, sitting at 21.7 million cwt in 2020, almost 986,000 MT, with planted acreage hitting 1 million acres. Harvested

acreage hit 973,000 with an average yield of 2,234 pounds, an increase of 111 pounds an acre, the highest yield recorded since 2004. The drop in total production for dry peas from 2019 reflects the decline in planted and harvested acres of 9% and 7% respectively.

- **Ukraine has emerged as a major exporter of pulses in recent years. Ukraine exports** yellow peas, Chickpeas, lentils and kidney bean. Major buyers of Ukrainian pulses are Europe, India, Turkey and Pakistan. The GPC's World Pulses Day Ukraine Market Outlook scheduled for February 17th will feature expert panels that will analyze the market conditions for each crop just as the country heads into its pulse-planting season as per information given in media sources.

Daily Outlook: -Pulses are likely to trade mixed.
