

Pulses Domestic Fundamentals:**Today's Update:**

- **Sensing short supply in the market govt. has taken many steps to cool down prices of tur, urad and moong.** At tur front import quota of 4 lakh MT for 2021-22 has been given for trades, mills and others. Apart from it the DGFT has given green signal to import 2 lakh MT tur and other pulses from Mozambique under already signed MoU for 5 years with condition of presenting certificate of origin. It may have a cooling impact of price. Vessel movement from Myanmar started slowly and it is expected to return to normalcy by mid-April. We expect tur import to begin soon from Myanmar.
- **Even at urad front import quota of 4 lakh MT for financial year beginning from 1st April-2021** has already been given. Apart from it the DGFT has extended dead line for 1.5 lakh MT urad import from 31st March to 30th April-2021. All these developments would ensure better supply side in coming months. Market sources say that a vessel having 14,400 MT urad set for India last week. The second vessel having same quantity is expected to set out on 25th March-2021 while 3rd vessel may set out in the middle of April. This means 45-50 thousand MT would hit Indian ports in next 30 days. Govt has already signed a MoU with Myanmar for 2.5 lakh MT annual urad import for 5 years.
- **Govt has approved 1.5 lakh MT moong import quota for 2021-22. As prices are ruling higher in global market** import flow would be limited while summer arrival from local crop is expected from mid-April-May. So prices may cool down in coming weeks. Apart from it normal trade is expected only in April as traders are busy in settling the account due to march closing.
- **The Ministry of Agriculture has approved procurement of 14,350 tonnes of a gram and 32,175 tonnes of lentils at MSP, under the price support scheme, from farmers in Bihar in the current Rabi marketing season 2020-2021.** NAFED will procure gram and lentils from farmers in collaboration with state government agencies, and farmers are requested to register at the centers of state agencies.

Previous Update:

- **Madhya Pradesh changed the procurement date of gram, lentil and mustard to 22 March 2021** due to change in the weather, before the purchase of gram, lentil, mustard was to begin in Madhya Pradesh from 1 April.
- **Planting of pulses and maize has picked up even as paddy continues to make significant gains in the ongoing summer cropping season, with farmers bringing in more area under the cereal crop in West Bengal and Telangana.** As of March 12, pulses acreage has moved up by about a fifth, with both black gram and green gram gaining acreage in Tamil Nadu, West Bengal, and Bihar. Black gram was planted on 1.18 lakh ha (0.79 lakh ha in the previous year), while green gram area stood at 1.96 lakh ha (1.81 lakh ha).
- **Arrival of peas has started increasing in producing states. Stockists are waiting for dry peas.** Right now moisture level is higher and it will take at least 15 days to come it to normal level. They expect prices to decrease further, at least below chana. As demand too is weak amid increasing arrivals, prices are coming down. It is being traded at Rs 5100-5150 in Kanpur market. In Lalitpur market, around 14-15 thousand bags are arriving daily and it may increase to 20 thousand bags in next 10 days. In Jhansi market 3000-3500 bags are arriving daily. It is being traded at Rs 4500-4800. Agriwatch expects stockists buying from 20th March and it may restrict decreasing trend in peas market.

- **Chana arrival in cash market is about to increase and buying at this level may be risky.** Prices of chana in many market is ruling below MSP while demand for daal is weak. In south Indian markets including Gujarat arrivals are about to peak up and pressure might be seen in Chana market despite commencement of procurement drive. Some farmers are holding stock as they are unwilling to sell it below MSP. Investors may prefer to wait for correction in market. Availability is good despite fear of lower crop size as carry in stock is higher this year. In Delhi market chana is being quoted at Rs 5050-5100.
- **Arrival from summer moong crop is expected to hit market from April.** Crop condition of moong in Odisha, M.P. & Bihar is normal to good. Arrival from rabi crop is decreasing now. Demand is weak and prices are expected to decrease in coming weeks. As there is shortage of quality crop, prices are ruling around MSP. Stockists too have started offloading stock just ahead of summer crop. Steady to slight weak tone may be seen in next two three weeks. Thereafter, monsoon rains in June and July would be the driving force for prices thereafter.

International Market Update:

- **Australian lentil prices opened up in Canada and Australian lentils in early trade due** to increased demand from pulses mills, while urad prices remained stable with gram. Due to the improvement in futures prices, prices of gram remained stable in Delhi on Monday. On Lawrence Road, Rajasthan chana was quoted at Rs 5,150 per quintal, while the Madhya Pradesh line traded at Rs 5,100 per quintal.
- **Global peas market has been trading at higher note from last two months and major** buyers except India are buying aggressively in recent months. Apart from its stock is decreasing in producing/exporting countries. Major producers like Ukraine, Russia, France and America have sold out maximum crop in forward deals. However, prices are stable in Canada. As demand has been good so, there is a chance of higher area coverage in Canada. China is a major buyer of Canadian Matar and it has purchased around 58 % crop this year. The ratio of purchase has been 55% from last three years. Actually, China has replaced India in peas buying from Canada. Canada produces 45 to 48 lakh MT peas every year.
- **Lentil's production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield.** Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.77 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.
- **Dry peas production in Canada is expected to decrease from 45.94 lakh Mt in 2020-21 to 44.00 lakh MT in 2021-22** due to lower expected yield from 2.73 to 2.57 tonne in 2021-22. Total supply too would decrease from 49.22(2020-21) to 47.90 lakh MT in 2021-22. Export fig too is expected to decrease from 38 to 37 lakh MT in 2021-22. However, domestic usage may increase from 8.22 to 8.40 lakh MT in 2021-22. Carryout would decrease from 3 to 2.5 lakh MT. Yearly average price may hover at \$300 per MT in 2021-22 against 4330 in 2020-21.
- **Lentils export from Australia increased sharply in Dec-2020 as per data released by** Australia Bureau of Statistics. Total movement in Dec increased to 101,148 MT up by 189% from the previous month's total of 34,974. So far export sales have totalled 136,121 MT, up from 135,053 in the same period the last marketing year. India purchased 42,154 MT, B, desh 15,256 MT & Sri Lanka 14,970 MT

- **Chickpeas production in Australia is expected to increase from 2.81 to 7.55 lakhMt in 2020-21.** Even field peas production would increase from 2.19 to 2.94 lakh MT-n 2020-21. Even lentils production may increase from 5.34 to 6.34 lakh Mt in 2020-21.
- **Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres.** Lentil production is up by 40% from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres. Average yield is estimated at 1,442 pounds per acre in the U.S., as per data release by the National Agricultural Statistics Service.
- **The USDA has released its final pulses production report of the year this Tuesday, Jan. 12, 2021** by the National Agricultural Statistics Service. As per new data dry peas are compiled by the National Agricultural Statistics Service. Dry peas production for 2020 has been pegged at 985,976 MT on 973,000 acres. Dry pea production as an average of all U.S. pea growing regions is down approximately 2% of last year, sitting at 21.7 million cwt in 2020, almost 986,000 MT, with planted acreage hitting 1 million acres. Harvested acreage hit 973,000 with an average yield of 2,234 pounds, an increase of 111 pounds an acre, the highest yield recorded since 2004. The drop in total production for dry peas from 2019 reflects the decline in planted and harvested acres of 9% and 7% respectively.
- **Ukraine has emerged as a major exporter of pulses in recent years. Ukraine exports** yellow peas, Chickpeas, lentils and kidney bean. Major buyers of Ukrainian pulses are Europe, India, Turkey and Pakistan. The GPC's World Pulses Day Ukraine Market Outlook scheduled for February 17th will feature expert panels that will analyze the market conditions for each crop just as the country heads into its pulse-planting season as per information given in media sources.

Daily Outlook: -Pulses are likely to trade mixed.
