

**Pulses Domestic Fundamentals:****Today's Update:**

- **Nafed has fixed chana procurement target in major all states. It will procure 32,67,325 MT this year. It will support cash chana market. Out of total It will procure 14,50,000 MT in Madhya Pradesh, 6,17,000 MT in Maharashtra,, 6,14,900 MT in Rajasthan, 2,12,850MT in U.P., 1.67,000nMT in Karnataka, in A.P. 1,39,900 MT, Telangana 51,325 MT & 14,350 MT.** Market expect this move good to support market. However, it would be very crucial when Nafed would start procuring and how long it will continue?
- **Chana cash market traded weak taking clue from weak futures and increasing arrivals** in various markets. Millers have slowed down buying activities sensing weak inner tone. More downward tone is unlikely as procurement drive remains supportive to cash market. Crop size in Rajasthan, Madhya Pradesh & Rajasthan is lower than normal expectation. AW would revise chana production down after finalizing the yield assessment, undergoing right now, by the end of this month. AW preliminary production estimate for chana is 110.63 lakh MT. Chana decreased by 125 to 175 per qtl to Rs4900-5000 in various markets during the week under review. Steady to slightly weak tone may prevail in the near term. Nafed entry for procurement may push up price again.

**Previous Update:**

- **Rains & hails storm in parts of central and north India has raised fears among farmers as it has potential to damage standing and matured crop ready to be harvested. Chana and masur crops are being harvested and 30 to 40% are still in the field. If rains continue with hailstorm, it may affect moong crop too.in case of tur buyers are out of market. Investors/mills are gauging the immediate impact of import approval. Immediate tone remains weak.**
- **Sensing short supply in the market govt. has taken many steps to cool down prices of tur, urad and moong.** At tur front import quota of 4 lakh MT for 2021-22 has been given for trades, mills and others. Apart from it the DGFT has given green signal to import 2 lakh MT tur and other pulses from Mozambique under already signed MoU for 5 years with condition of presenting certificate of origin. It may have a cooling impact of price. Vessel movement from Myanmar started slowly and it is expected to return to normalcy by mid-April/May. We expect tur import to begin soon from Myanmar.
- **Even at urad front import quota of 4 lakh MT for financial year beginning from 1<sup>st</sup> April-2021 has already been given. Apart from it the DGFT has extended dead line for 1.5 lakh MT urad import from 31<sup>st</sup> March to 30<sup>th</sup> April-2021.** All these developments would ensure better supply side in coming months. Market sources say that a vessel having 14,400 MT urad set for India last week. The second vessel having same quantity is expected to set out on 25<sup>th</sup> March-2021 while 3<sup>rd</sup> vessel may set out in the middle of April. This means 45-50 thousand MT would hit Indian ports in next 30 days. Govt. has already signed a MoU with Myanmar for 2.5 lakh MT annual urad import for 5 years.
- **Govt has approved 1.5 lakh MT moong import quota for 2021-22. As prices are ruling higher in global market import flow would be limited while summer arrival from local crop is expected from mid-April-May. So prices may cool down in coming weeks.** Apart from it normal trade is expected only in April as traders are busy in settling the account due to March closing.

- **Arrival of peas has started increasing in producing states. Stockists are waiting for dry peas.** Right now moisture level is higher and it will take at least 15 days to come it to normal level. They expect prices to decrease further, at least below chana. As demand too is weak amid increasing arrivals, prices are coming down. It is being traded at Rs 5100-5150 in Kanpur market. In Lalitpur market, around 14-15 thousand bags are arriving daily and it may increase to 20 thousand bags in next 10 days. In Jhansi market 3000-3500 bags are arriving daily. It is being traded at Rs 4500-4800. Agriwatch expects stockists buying from 20<sup>th</sup> March and it may restrict decreasing trend in peas market.
- **Arrival from summer moong crop is expected to hit market from April.** Crop condition of moong in Odisha, M.P. & Bihar is normal to good. Arrival from rabi crop is decreasing now. Demand is weak and prices are expected to decrease in coming weeks. As there is shortage of quality crop, prices are ruling around MSP. Stockists too have started offloading stock just ahead of summer crop. Steady to slight weak tone may be seen in next two three weeks. Thereafter, monsoon rains in June and July would be the driving force for prices thereafter.

**International Market Update:**

- **Bangladesh and Pakistan continue to buy chickpeas from Australia and so prices hinge around \$660-670 per MT basis CiF at destinations.** Pakistan has been regular buyer of containerized Australian chickpeas, and its peak figure of recent years is believed to be 37,759t in December 2020, the biggest volume seen since 34,805t in April 2018. The February 2021 export figure could well be above that to reflect containerized exports as well as the 25,000t of bulk to Pakistan, and further bulk sales to Bangladesh.
- **Prices for mung beans stayed steady at previous month level at around \$1300/t for No. 1 grade, \$1200/t for processing and \$1100/t for manufacturing.** Harvesting is expected to begin soon in Queensland. Recent rains are beneficial to standing crop in the field. Production prospects have improved a lot. Chinese buyers are active and most of the mung beans booked for shipment from April onward. Containers are readily available for China right now.
- **Major pulses in Australia traded slightly firm as export demand is likely to continue in the second half of 2021.** Apart from it freight for some destinations in the Middle East & South Asia too moved up and it too has helped keeping prices up of chickpeas & lentils for bulk exports volume. On production front, most of Australia's moong growing areas in New South Wales & Queensland received good rains in recent days and more rains expected in northern South Wales, Victoria. The crop would be ready for harvest in April-May. It has increased better sowing prospects for winter crops like Chickpeas, Lentils and Fababeans.
- **Lentil's production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield.** Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.77 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2020-21 it is \$ 600 per MT.
- **Dry peas production in Canada is expected to decrease from 45.94 lakh Mt in 2020-21 to 44.00 lakh MT in 2021-22 due to lower expected yield from 2.73 to 2.57 tonne in 2021-22.** Total supply too would decrease from 49.22(2020-21) to 47.90 lakh MT in 2021-22. Export fig too is expected to decrease from 38 to 37 lakh MT in 2021-22. However, domestic usage may increase from 8.22 to 8.40lakhMT in 2021-22. Carryout would decrease from 3 to 2.5 lakh MT. Yearly average price may hover at \$300 per MT in 2021-22 against 4330 in 2020-21.

- Lentils export from Australia increased sharply in Dec-2020 as per data released by Australia Bureau of Statistics. Total movement in Dec increased to 101,148 MT up by 189% from the previous month's total of 34,974. So far export sales have totalled 136,121 MT, up from 135,053 in the same period the last marketing year. India purchased 42,154 MT, B, desh 15,256 MT & Sri Lanka 14,970 MT**
- Chickpeas production in Australia is expected to increase from 2.81 to 7.55 lakh Mt in 2020-21. Even field peas production would increase from 2.19 to 2.94 lakh MT-n 2020-21. Even lentils production may increase from 5.34 to 6.34 lakh Mt in 2020-21.**
- Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres. Lentil production is up by 40% from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres. Average yield is estimated at 1,442 pounds per acre in the U.S., as per data release by the National Agricultural Statistics Service.**

**Daily Outlook:** -Pulses are likely to trade mixed.
